# Advanced Civ

Mod for BtS 3.19

version 0.89b

25 October 2017

by Georg W. (firpo)

### **User Manual**

AdvCiv is a modpack for advanced players, building on karadoc's K-Mod. AdvCiv does not add content, and, so far, makes few balance changes apart from changes to the Al. It hasn't been tested for multiplayer. For questions, comments and current activities, please visit the development thread on CivFanatics.

### Installation

AdvCiv is installed like any other mod into <code>Beyond the Sword\Mods</code>, except that, if you rename the AdvCiv folder, you'll also need to change the name in <code>Assets\XML\Art\CIV4ArtDefines\_Misc.xml</code> (see Known Issues); <code>AdvCiv.ini</code> inside the (renamed) AdvCiv folder should then be renamed as well. When the mod is loaded for the first time, it creates a folder <code>My Games\Beyond the Sword\AdvCiv</code> for the <code>BUG</code> settings. You'll have to remove this folder manually to fully uninstall AdvCiv.

The above assumes a BtS installation from optical disc on Windows 8 or earlier, though I understand that it works the same way on Windows 10. A Steam installation may require a <u>patch</u> in order to run any mods. There is, <u>apparently</u>, no way to play this mod on macOS.

To start the mod through a Windows shortcut, create a shortcut to <code>Civ4BeyondSword.exe</code>, open the shortcut's file properties, and add a space and <code>mod=\AdvCiv</code> to the <code>Target</code> field.

### **Mod components**

- <u>UWAI</u>: Utility-Based War AI. Rewrite of the AI parts dealing with decisions on war and peace. Based on a single function to evaluate the utility of any war plan, whether it's hypothetical, in preparation or ongoing. The new AI is more consistent, more adjustable and much more complex.
- <u>DDiplo</u>: Dynamic Al Diplo. Revision of Al relations modifiers, aimed, in part, at making it easier to reconcile after a war. Makes it harder to get the Al attitude to "pleased".
- <u>BBarb</u>: Better Barbarians. An overhaul of all things Barbarian. Barbarian activity increases gradually until 67% of a continent is settled; fewer Barbarians on poor-yield tiles; creation rate adjusted to game speed; land units can spawn aboard Galleys; fogbusting nerfed; Great Wall reworked; more plausible development on all-barbarian continents (e.g. Terra map).
- <u>Immortal Culture</u>: Culture of dead civs stays in the game and can cause anger and revolts. Revolts can occur in any cities, not just near a border. Shortened occupation countdown in conquered cities, but the countdown decreases only probabilistically based on the strength of the occupying force.
- <u>K-Mod</u> by karadoc: substantial AI improvements (incl. <u>BBAI</u>); usability improvements (incl. <u>BUG</u>, which in turn includes <u>Civ4lerts</u>, <u>reminder</u>, <u>Exotic Foreign Advisor</u> and several optional advisor screens); bugfixes (incl. the <u>unofficial patch</u>); improved developer tools (<u>AIAutoPlay</u>, <u>Civ Changer</u>); performance tweaks; minor balance changes (several from <u>PIG</u>, incl. <u>Lead From Behind</u>); practically no flavor changes other than <u>Actual Quotes</u>. As far as I can tell, the main BBAI contributors are jdog, EmperorFool, Afforess, Fuyu and LunarMongoose. For credits for BUG, see the BUG help file (Alt + Ctrl + O in game).
- Show Hidden Attitude Mod by DaveMcW
- My own changes and fixes in the spirit of K-Mod; see chapter <u>Misc. changes</u>.
- <u>SPaH</u>: Start Points as Handicap. Game option that gives an Advanced Start to the Al civs, but not to the human civs. Start points can also be assigned unequally to the Al civs; the mod then places the civs with the most points the farthest away from the human civs initially.
- R&F: Rise and Fall. Game option that divides the game into chapters; you take control
  of a different civ in each chapter. A score is awarded after each chapter based on how
  the standing of your civ has changed. The overall objective is to maximize the total of
  the awarded scores.
- PerfectMongoose map script (v3.2; main authors: Cephalo and LunarMongoose)

To enable UWAI, leave the "Aggressive AI" option disabled. For players unfamiliar with K-Mod, I've written a <u>chapter</u> summarizing the gameplay changes. I also recommend taking a look at the chapter on <u>Start Points as Handicap</u> before using that option. Other than that, I haven't made any *fundamental* changes. Still, some BtS tactics will not work as well in AdvCiv. All major changes are listed in the following. Most of the AI and UI changes are low-key though, and only covered by the (extensive) <u>changelog</u> after the last chapter. I've assigned an id to each batch of changes; when an id is mentioned, there's always a link to further details and rationales in the changelog.

The components written by me (UWAI, BBarb, DDiplo, Immortal Culture, SPaH and R&F) are not available as separate mods, except for an <u>earlier version</u> of SPaH.

### **Utility-Based War Al**

UWAI is enabled by default, but players who prefer the K-Mod AI, can use the "Aggressive AI (K-Mod)" option on the Custom Game screen to disable UWAI; that option also enables the Aggressive AI mode. There aren't separate options for UWAI and Aggressive AI because UWAI doesn't have an aggressive or non-aggressive mode (see also change 019), and the K-Mod AI is notoriously belligerent with and without Aggressive AI. (K-Mod without Aggressive AI can still be configured in GlobalDefines\_advc.xml.) The K-Mod AI is probably the better choice for team games; UWAI should, in principle, work too, but these types of games haven't been given much thought and hardly any testing.

The table below shows the major differences between UWAI and BtS/K-Mod. I've written briefly about differences between K-Mod and BtS with regard to decisions on war and peace <u>here</u> on the CFC forums (and <u>here</u> only about BtS).

UWAI BtS/K-Mod

Military analysis: UWAI predicts how ongoing and hypothetical wars might develop in the medium-term, i.e. over the next 25 to 50 turns. The projection is based on power ratings for various military branches, namely the army (land and air units available for offensives), home guard (only available for defense), fleet (sea units), logistics (cargo ships) and nukes. Simulates military build-up (based on estimated per-turn production), clashes of army stacks, naval landings and attempted conquests of specific cities. The outcomes include cities lost and conquered by the various war parties, invested production and lost military power. These predictions aren't intended to be accurate: they only need to be plausible enough to result in plausible AI behavior.

The BtS military analysis simply compares present power ratings. Each cives has a single power rating, i.e. land and sea units aren't distinguished. K-Modadds a projection of military build-up.

**Power**: Power ratings are based on per-unit military power values that are, essentially, computed as combat strength raised to the power of 1.7. E.g. Swordsman has about 21 power and Cuirassier 93; this value also accounts for the faster movement and other useful abilities of Cuirassiers.

Caveat: The power graph on the Info screen is still based on BtS power ratings.

Power values are usually equal to combat strength values; e.g. two Swordsmen count as much as one Cuirassier. That is, BtS underestimates the power of technologically advanced units.

The **evaluation** of the expected military outcomes is broken down into 26 aspects, each dealing with one specific reason for war (e.g. greed for conquered assets or loathing for a war opponent) or against (e.g. diplomatic ill will or invested production). The result of the evaluation is a utility value indicating how worthwhile the war (plan) in question is.

The AI considers attitude, military power, geographical proximity and victory strategies. These factors are combined in an arcane manner by a function called startWarVal.

Peace is evaluated separately by the endwarval function, which is based on war successes, finances and the tactical situation, i.e. very different from startWarVal.

K-Mod has expanded startWarVal, but it's still inconsistent with endWarVal, leading to war-peace oscillation, and too ad hoc for this important part of the AI.

War plans are fully **re-evaluated** each turn while in preparation, and canceled if they no longer appear worthwhile. The target of a war plan can change during preparations.

War plans in prepration are only canceled in exceptional circumstances. The target can't change.

The only necessary condition for beginning (and continuing) war preparations is a **positive** war utility. Attitude, power and proximity are all covered by the war utility computation and no longer work as hard requirements. That said, attitude has a particularly strong impact on war utility, so that a relatively peaceable leader like Saladin doesn't go to war against a civ that he is Pleased with unless there are unusually strong reasons for the war. Once preparations are concluded and war is imminent, it's too late for a change in attitude to stop the war.

Thresholds for attitude, power ratio and shared borders serve as necessary conditions for war; in particular, many Al leaders never start war preparations against civs they're Pleased with. (K-Mod ignores this restriction in some cases during the endgame.)

If war utility is positive, the AI begins war preparations with a per-turn probability based on personality and the utility value. As a result, the AI can be **quick to declare war** in response to another declaration of war or some rapid shift in power (e.g. after upgrading to Riflemen).

The per-turn probability is based only on personality and attitude.

The AI **makes peace** if and only if war utility is negative or outweighed by reparations.

Apart from an endWarVal check, there are some special conditions for peace, such as having fought to a long draw or being alone in what had started as a dogpile war.

After a declaration of war, the AI **refuses to talk** for just one turn. After that, the AI can be contacted unless the price for peace would be more than the other side could pay.

The refuse-to-talk duration is based on Al personality and war success. Possible reparations don't play a role.

Exception: If war was declared at the request of a third party or through a defensive pact, the refuse-to-talk duration is as in BtS.

The AI can start a war while already in another war. It's possible to hire an AI civ for war even if that AI civ is already preparing or fighting a war, but the price is often prohibitive.

The AI doesn't consider war preparations when it's already in a war; K-Mod relaxes this restriction in the endgame. In both BtS and K-Mod, the AI can't be hired for war while already conducting or planning war.

The AI refuses requests for starting a war regardless of war utility if either its attitude towards the proposed target is too high, or its attitude towards the sponsor is too low. (Such plans are too sensitive to even discuss with anyone who isn't a trusted partner.)

Same: "We couldn't betray close friends" or "We don't like you enough".

Otherwise, the necessary payment is computed based on war utility. If the result exceeds a threshold, the AI refuses to declare war, stating "We are afraid of their military might" if the power ratio is highly unfavorable, and "We have enough on our hands right now" otherwise. Thus, "enough on our hands" doesn't imply that the AI is already preparing another war.

The AI also refuses categorically if the power ratio is too unfavorable or when already preparing or fighting a war.

AdvCiv shows an alert message (regardless of whether UWAI is enabled; change <u>210a</u>) when an AI leader becomes willing to discuss a sponsored war.

In BtS, if the trade screen says "enough on our hands", then the AI is definitely preparing a war. In K-Mod, other reasons for not wanting to start a war can block the enough-on-hands tell, and, unlike BUG, K-Mod does not show a fist icon on the scoreboard when an AI civ is preparing war; see karadoc's explanation here.

While the utility of a war plan against a human player is positive but small, and the AI hasn't begun war preparations yet, there's an increased probability of demands for **tribute** or a gift or a change of religion or civics.

Tribute demands are made randomly against any disliked and militarily weaker human civ. Whether the AI is currently ready to start a war doesn't play a role.

UWAI continues to use almost all of the AI **personality** values from BtS. Many work differently, but, in most cases, to a similar effect.

Each AI leader has some 20 personality values affecting war and peace, set in CIV4LeaderHeadInfos.xml.

For example, in UWAI, a high MaxWarNearby-PowerRatio leads to an optimistically biased military analysis, which can make an AI leader willing to start wars that he or she may well lose.

MaxWarNearbyPowerRatio is a threshold that rules out war if the military power ratio is too unfavorable.

Hiring war allies, granting or denying tribute, UN peacekeeping and some **other decisions** that imply war or peace are made based on war utility.

Separate heuristics for these decisions, based on some combination of power ratio and attitude.

Decisions about vassal agreements are still largely made by the K-Mod AI (with many adjustments; change <u>112</u>); ditto defensive pacts.

The AI is *more* willing to make peace when there are hostile units near its cities, but can't evaluate if these units actually pose a threat. This can be

Unless a city is clearly about to fall, the AI is less inclined to make peace when there are enemy units near its cities.

Positions of units have no bearing on whether the AI is willing to capitulate.

exploited for better peace deals.

This does not apply to capitulation; the Al capitulates only when faced with a threatening number of hostile units inside its borders (change 112b).

This is the only part of UWAI that cares about positions of units on the map. UWAI does not control *how* war is conducted, only *if*.

### **Dynamic Al Diplomacy** (DDiplo)

One very noticeable change is in the mapping from relations values to AI attitude:

Relations	≥ 10	≥ 4	< 4	≤ -2	≤ -8
AI attitude	Friendly	Pleased	Cautious	Annoyed	Furious

For comparison, in BtS, Cautious begins at -2, Pleased at +3 and Friendly at +10. However, DDiplo also turns the (hidden) -1 penalty to human-AI relations on Noble difficulty and above into a +1 bonus to AI-AI relations, meaning that, in effect, the thresholds for Pleased and Cautious stay the same and the threshold for Friendly is one lower than in BtS. To win an AI civ's vote for a Diplomacy victory, Friendly attitude is now required. (In BtS: +8 relations suffice.) Change id: <u>148</u>.

The following changes to relations modifiers should make diplomacy more consistent, more dynamic and less exploitable. Changes to vassal agreements are described at the end of the chapter.

- "Our mutual military struggle ...": A bonus of more than 1 now requires getting involved in the war, that is, to inflict or incur losses. The bonus decays over time. (In BtS, it's sufficient to be formally at war, and, once accumulated, the bonus stays for the rest of the game.) Fighting inside an ally's borders is especially effective at increasing the diplo bonus. Fighting barbarians inside another civ's borders counts too, even when there is no shared war. 130m
- "You agreed to come to our aid in wartime": Joining a war at the request of an AI civ results in a +1 relations bonus that is remembered for 100 turns on average. 130s
- When a war ally is brought in, the two allies automatically sign a 10-turn peace treaty.
   146
- "Years of peace" only start to count once a civ is met. 130a
- "You stopped trading with us": It's no longer possible to propose an embargo against

one's own trade partner; will first have to cancel those trades. The target of the embargo refuses to talk with both the civ that proposed the embargo, and the one that agreed to it. (Except when a master asks its vassal to stop trading.) The embargo severs even recent deals that couldn't otherwise be canceled. 130f

- "You made an arrogant demand" now only applies when a tribute demand is granted; no diplo penalty if the AI refuses to pay. However, if a player declares war on an AI civ that remembers having paid tribute, that civ and all AI civs it has met refuse tribute and help requests by the player for (on average) 80 turns. When an AI civ declares war, it forgets all tribute demands, i.e. it can be attacked without repercussions. <a href="mailto:1300">1300</a>
- "You press us too hard": There is always a chance that the AI refuses a request for a gift for no particular reason. A refused request is therefore not a reliable way to determine if the AI is preparing war against the player who makes the request. The AI is willing to grant a gift about every 30 turns (20 in BtS). <a href="#ref144">144</a>
- "You're getting ahead of us": Al civs dislike civs that are ranked slightly higher on the scoreboard, but not those ranked much higher. These rank-based modifiers work differently in BtS (and BtS hides them from the player). 130c
- "A first impression is a lasting one": Another hidden BtS modifier; this one remains static for the entire game. It is based on leader personalities and affects mostly inter-Al relations. DDiplo reduces the modifier a bit, specifically the impact of "peace weight", to make diplomacy less preordained. <u>130b</u>
- "We oppose your ruthless expansionism": Having a high number of cities with foreign majority culture results in relations penalties from everyone. These penalties complement the ones for having vassals ("worried about our rivals being vassals to your empire"). 130w
- "Our trade relations have been fair and fortright" and "You have traded with our worst enemies": No longer based (primarily) on how recently a civ was met, and more difficult to max out in the late game. Open Borders contribute to the enemy-trade penalty. <u>130p</u>
- Friendly AI civs are more angered by bad actions than pleased and cautious AI civs; annoyed and furious AI civs are the least bothered they expect nothing better. Conversely, positive actions have a stronger/ longer effect on disgruntled AI civs than on friendly ones. For example, a declaration of war causes -4 relations with a (heretofore) friendly civ, but only -2 with one already annoyed or furious. 130j
- All Al memory decays. For example, memory about how "you razed our cities" decays by one city every 60 turns on average. <u>130r</u>
   The other decay times (no decay in BtS):

Turns
60
150
40
30
150
10x30

Memory type	Turns
"You nuked us"	120
"You nuked our friends"	80
"You negotiated a trade embargo"	60
"You declared war on our friends"	120
"You brought in a war ally"	70
"You declared war on us"	150

 "You declared war on us" penalty reduced to -2 if the declaration of war is triggered by a defensive pact. <u>130y</u>

- The AI forgets actions of other civs, like "You gave us help", a little less randomly, whereas the tracking of e.g. "years of peace" or years of supplied resources is now a bit randomized. (In BtS, e.g. "years of peace" pay off after exactly 50 turns.) 130k/130i
- "Our Open Borders have brought our peoples together": The time that it takes to attain and increase this bonus depends on the distance and trade routes between the two peoples' cities. <u>130i</u>
- "All the years you have supplied us with resources": This can take many, many years if the recipient already has many resources. <u>149</u>
- "We are upset that you have signed Defensive Pacts with our rivals": Not if we like these rivals, or have our own defensive pacts with them, or if we're too weak to attack them anyway. Also no penalty about voluntary vassals ("our rivals being vassals to your empire") if we like those vassals. <u>130t</u>
- The AI refuses to sign a Defensive Pact if it was recently canceled (same mechanism as for canceled Open Borders). 130p
- "We care for our brothers and sisters of the faith"/ "You have wisely chosen your civics": If many civs share a religion or civic (e.g. Hereditary Rule), the relations bonuses are reduced. Conversely, the AI is more tolerant towards different religions if its own religion is shared by few. The AI only gets upset about another religion once it encounters a city with that religion. <a href="mailto:130x">130x</a>
- "You accepted our state religion/ favorite civic": The bonus applies only so long as the player keeps running that religion or civic. <u>145</u>
- Got rid of some odd special cases: a civ being its own vassal's worst enemy; war-on-friend penalties in addition to war penalties when attacking a civ with vassals; deals not getting canceled despite soured relations; vassal tribute deals continuing after the vassal agreement has ended; becoming a civ's worst enemy by trading with their worst enemy; Open Borders signed right after a war ends. 130d/130h/133/130p/130r

AdvCiv eliminates most of the diplomatic drawbacks associated with capitulated vassals (change 130v). They have Friendly attitude toward the master, share the master's attitude toward rivals (but no better than Cautious), can't be anyone's worst enemy and are ineligible as war targets and for elections (014). On the flip side, the master civ is now held responsible for grievances caused by its capitulated vassals, in particular, razed cities, border troubles and trades with someone's worst enemy. The master is not blamed for things that the vassal civ did prior to the vassal agreement, nor for the vassal's religion.

Peacefully acquired vassals still work as in BtS, i.e. as largely independent. I've tweaked the conditions under which an AI agrees to a vassal agreement though: civs only look for a master if they feel threatened – having fallen behind isn't reason enough (112). If a master civ fails to protect its voluntary vassal (35% territorial loss or nuked repeatedly), the vassal cancels the agreement (143). A vassal that gets close to a victory condition also cancels the vassal agreement (112).

When a vassal makes peace or breaks free, its memory about past war declarations is decreased. When a capitulated vassal is freed because its master capitulates, the freed vassal gives +2 "You granted us independence" to the master of its former master. Freed vassals automatically make peace with their liberator (though without signing a peace treaty). These changes should make it easier to have productive relations with former vassals after helping them break free. 130y

Happiness from vassals ("We influence other civilizations") is now only gained from voluntary vassals, and it's capped at +1.  $\underline{142}$ 

#### **Better Barbarians**

I've revised most aspects of Barbarians, mainly for improved game balance.

**Barbarian activity increases gradually**: The activity peak is reached when two thirds of a continent is claimed by cultural borders. This happens typically by the early Medieval era, which fits historically with the Migration Period in Europe and the Sixteen Kingdoms in China. In contrast, BtS Barbarians peak shortly after they first appear.

**Fewer Barbarians on low-yield tiles**: The number of Barbarians that appear on a continent is based on the number of (culturally) owned and unowned tiles; in BtS, all land tiles count equally. AdvCiv disregards tiles with 0 food yield, but adds 50% of the number of coastal tiles surrounding the continent. Thus, continents with large (arctic) deserts produce fewer Barbarians than in BtS, whereas snaky continents with long coasts produce more.

Barbarians can no longer appear on tiles with 0 food. They're less likely to appear on tiles with a total yield of 1, i.e. jungle and tundra, and more likely on all other tiles. The aim of this change is to help civs that are surrounded by poor land, and to disadvantage civs that have much good land to settle.

**"Fogbusting" nerfed**: In BtS, Barbarians can't appear within two tiles of any unit. This makes it easy to keep Barbarians at bay with just a few Warriors. AdvCiv removes this 2-tile restriction. That said, Barbarians still can't appear on tiles visible to any civ. So, fogbusting remains a useful tactic (ideally from hills for extra visibility), but covering the entire frontier is often infeasible.

**Adjustment for game speed**: The rate at which defeated Barbarians are replaced is now adjusted to the game speed setting. In BtS, Barbarians tend to be much more dangerous on slow settings than on fast ones; this should not be the case in AdvCiv.

**The Great Wall reworked**: TGW now has two out of the three following abilities depending on whether Barbarians are raging (RB), standard or disabled (no Barbarians, NB):

- +1 trade route in cities on the same continent except when playing with RB;
- prevents Barbarians from entering your borders on this continent except with NB;
- +100% emergence of Great Generals inside your cultural borders if RB or NB.

To match the flavor of the trade route ability, TGW generates **Great Merchant** points instead of Great Spy points. TGW now **requires Archery**, costs **250 production** instead of 150 and requires **two Walls** (i.e. Masonry is still required indirectly). The prerequisite Walls can be in arbitrary cities (like the Monuments for Statue of Zeus). The ability to shut out Barbarians for just 150 production (75 with Stone) is, in my estimation, too powerful when playing with RB, and it's useless with NB. The new abilities should be reasonably balanced for all Barbarian settings. As for the increased cost, bear in mind that Barbarians don't become a major threat until the Classical era in AdvCiv, so there is no need to build this wonder very early.

A high number of extra trade routes can incentivize city spam, therefore, TGW goes **obsolete with Corporation**, and I've taken this opportunity to weaken The **Great Lighthouse** (GLH): Now obsolete with Astronomy instead of Corporation. The **Colossus** goes obsolete with Chemistry instead of Astronomy.

**Barbarian naval assaults**: Barbarian land units can appear aboard Barbarian Galleys in the fog of war. Once a Galley has cargo, it moves towards some nearby city for a naval assault. The units can also be dropped along the way, randomly, or in order to attack an unprotected non-combat unit. The intention is to make Barbarian Galleys harder to ignore, especially for civs without seafood at stake.

Barbarian sea units are now created for each continent separately, based on the number of surrounding coastal tiles. A low-profile change; for one thing, Barbarian ships no longer pile up near remote islands.

**Great General points (GGP) from Barbarians**: In BtS, up to 10 XP per unit can be gained from combat with Barbarians, but that XP doesn't translate into GGP. This is probably to disincentivize "farming" of Barbarians in tiles that are deliberately left unobserved. AdvCiv counts 50% of XP from Barbarians as GGP, rounded down. To avoid farming, XP from attacks on Barbarians is reduced to 75%. This results e.g. in only 1 XP and 0 GGP from a successful attack at 90% odds – no risk, no GGP.

**Animals (minor changes)**: There is now a "No Animals" option on the Custom Game screen, taking the place of the useless "No Espionage" option. "No Barbarians" still means that no animals appear. Patrolling animals now favor their native terrain and features; they still enter other tiles, but with a smaller probability. I took this idea from Mongoose SDK.

**New World Barbarians**: I've made numerous changes for maps that have initially unsettled continents like Terra. To me, Terra still doesn't work because cities founded in late Renaissance often take too long to pay off, and the AI doesn't make a coordinated effort to settle the New World. So, there is more work to do (see also change <u>040</u>), but the Barbarians are ready.

- Barbarian cities begin to appear on continents without any civs earlier than they do in BtS. This way, a patchy network of Barbarian cities tends to be cover the New World by the time it is discovered; reminiscent of Sid Meier's Colonization. Since these cities produce lots of units by themselves, I've disabled the placement of (free) Barbarian units on continents without civs, and I've added a mechanism that disbands Barbarian units when a continent (or shelf) becomes too crowded. Barbarians act relatively peacefully so long as their cities on a continent outnumber those of all civs taken together. This gives civs settling the New World time to establish themselves before the Barbarians undertake concerted attacks.
- Barbarians now stop advancing technologically once they stop sharing a continent with any civ. This usually prevents the New World Barbarians from reaching the Medieval era. Once the New World is colonized, Barbarian research catches up quickly, allowing the New World Barbarians to adopt gunpowder weapons. I've unlocked Musketman, Cavalry, Anti-Tank and SAM Infantry for use by the Barbarians.
- To reinforce the notion that each Barbarian city represents a separate tribe or city state, I've made sure that the borders of Barbarian cities don't meet. Barbarians can no longer build any cultural buildings, and they don't build culture directly either. Consequently, their borders don't expand beyond the inner city ring. When Barbarian cities are created, the city site is chosen only based on the inner ring. This is for plausibility, but also to make conquered Barbarian cities a bit less useful. Barbarian Workers only improve their home cities and don't build roads to other cities.

For more details, see change ids 300 et seq. in the changelog.

#### **Immortal Culture**

- Eliminating a civ no longer removes that civ's tile culture. The remaining culture can cause anger, now listed as "We resent being ruled by a foreign culture" instead of "We yearn to join our motherland". <u>099</u>
- Revolts can occur in any cities, not just those close to foreign borders, and culture of dead civs can cause revolts. However, only border cities can flip. Cities can never flip from a master to its vassal. If a city can't flip, it loses one population on the third revolt and on subsequent revolts. <u>099c</u>
- The occupation timer after conquest or revolt decreases only with a per-turn probability. That probability is computed based on the city's revolt probability. The nationality bar on the city screen shows both probabilities. The occupation timer after conquest starts at no more than 3 turns (in BtS: 3 + 50% population).

Revolts can happen during occupation unless the city owner is at war with the owner of the foreign culture.

Siege units, tanks and damaged units are less effective at suppressing revolts. <u>023</u>

- "Cruel oppression" anger in a city makes revolts considerably harder to suppress.
   (Otherwise, Slavery would be a too obvious answer for anger from foreign culture.) 101
- A message is shown when a city's revolt chance becomes positive. 210b
- Flipping-after-conquest is enabled by default. (The game option is now called "No City Flipping after Conquest" and it's unchecked by default.) 101
- K-Mod also makes changes to culture and revolts. AdvCiv keeps some of these changes – see the first few bullets in the next chapter –, and reverses others:
  - Revolt chance is again proportional to the percentage of foreign culture, as in BtS;
     K-Mod sometimes required infeasibly large garrisons to bring the revolt chance down all the way to 0. 101
  - AdvCiv disables culture from trade routes (still optional via XML). 125

#### K-Mod

See also the K-Mod thread on CFC.

**BUG** (Better Unaltered Gameplay): Many BUG options are disabled in K-Mod, but can be enabled from the in-game main menu. K-Mod does not include <u>BULL</u>, meaning that some help text and unit actions added by BULL are unavailable; cf. this <u>Git Issue</u>. I've merged the Show Hidden Attitude Mod (included in BULL but not BUG; change <u>advc.sha</u>) and added Sentry behavior to Fortify-Heal (change <u>004l</u>). The decay of invested worker turns (<u>Misc. changes</u>; <u>011</u>) should make BULL's pre-chop action dispensable. So, I don't think there's anything crucial in BULL that isn't in AdvCiv.

For players who aren't familiar with K-Mod, I'm listing the major gameplay changes. For players who *are* familiar with K-Mod, I'm also listing the K-Mod changes that I've reverted (end of this chapter).

 Culture system: Culture levels (e.g. "Influential") matter less in culture wars, and specific city culture values matter more. Moreover, the range at which the culture of a city affects borders has been increased, meaning that the number of border cities and their culture are less decisive. Some roads to culture victory have been nerfed:

- Cathedrals, Mosques etc. increase culture by 40% instead of 50% and cost only 240 instead of 300.
- Free Speech increases culture by 50% instead of 100%.
- Culture from Great Works ("culture bomb") is adjusted to the game era.
- Sid's Sushi Co. provides less culture per resource.
- · About a dozen Great Wonders have their culture output reduced a bit.
- The Spread Culture mission only affects tile culture, i.e. can no longer be exploited for an "espionage victory".
- City flipping: Revolts happen faster, but cities don't flip until the third revolt. "The net effect of these changes is that (...) it's a bit more predictable and less dependant on luck." (from the K-Mod changelog)

The revolt probability is halved if a unit with the Leadership promotion is present.

- Vassal agreements: Can instruct vassals to start war preparations via "Let's discuss something else". The impact of vassals on number-of-cities maintenance is more noticeable than in BtS.
- The number-of-cities maintenance cost is no longer capped, meaning that very large empires can incur very high city maintenance.
- Expendable units are chosen as defenders when no defender has favorable odds.
   (Lead From Behind mod component)
- Buffed considerably:
  - Serfdom +1 commerce on farms and plantations; -1 on towns
  - All cargo ships +1 capacity
  - XP from Great Warlord increased based on the number of units in the tile
- Production overflow: In the late game, cities can produce two or more units of a kind within the same turn. (BtS turns the overflow into gold in these cases.)
- Trades offered by the AI can come with a discount. The discount is foregone if the player makes a counter-proposal. (In AdvCiv, the offer can also include more gold than the AI would normally consider; change <u>026</u>.)
- When a religion spreads, one of the older religions is sometimes (randomly) removed.
- Cities that the AI isn't willing to trade aren't shown in the trade screen, and unrevealed AI cities are treated as secret; no BUG alerts about AI cities being founded on invisible plots either.
- Al uses espionage more for various "take that" missions.
- Nerfed slightly:
  - War Elephant +10 cost
  - Quechua cost +5 cost
  - The Colossus +100 cost

- Buffed slightly (incomplete list):
  - Vassalage -25% number-of-cities maintenance
  - Mercantilism upkeep Low
  - Grenadier +10% city attack
  - Machine Gun +10% vs. Mounted units
  - Watermill +1 commerce initially, but only another +1 from Electricity
  - Drill I -15% collateral damage
  - Protective trait production bonus to Security Bureau
  - Aggressive trait production bonus to Jail; Jail gets -2 espionage (regardless of trait)
  - Industrial Park +1 free Engineer (i.e. 2 in total), +50 cost
  - · Nuclear Plant meltdowns less disastrous
  - Ship of the Line can be built with Copper (or Iron)
  - Ironclad +1 speed
  - Guided Missile +1 range
  - Space Elevator another +50% production to spaceship parts
  - Forest Preserve +1 commerce
  - Environmentalism doesn't penalize corporations, yields +1 happiness from Public Transportation, but has High upkeep. Environmentalism and Public Transportation both reduce bad health from population instead of granting good health.

Some that I couldn't put better, quoted from the K-Mod thread:

- "Barbarian Galleys get -10% strength"
- "Tech requirements for corporations changed: (...) Sushi Co: Refrigeration, Cereal Mills: Medicine, Creative Constructions: Steel, Standard Ethanol: Combustion"
- "Mining Inc now uses Aluminium and Uranium instead of Gold and Silver (this should make Mining Inc slightly weaker, and Civ Jewelers more viable)"
- "Cereal Mills also has +0.25 food output"
- "In the diplomacy screen, pressing ``Lets stop this fighting...' will now bring up the trade screen with the Al's suggested peace terms. (Originally, it just made peace instantly without any trades it was a horrible button.)"
- "Tech trades in which the receiving player is more than 2/3 of the way through researching the tech or when the tech is two eras behind the 'game era' no longer count towards tech trade memory; i.e. they don't contribute to causing ``we fear you are becoming too advanced´´."
- "Global warming has less of an impact on the map, but (in long games) causes unhappiness to those civs contributing to pollution. There's a new advisor screen [Environment tab on the Economics Advisor] about this."

#### Reverted by AdvCiv:

See <u>Immortal Culture</u> about reverted changes to culture and revolts.

- Gifting Great People to the AI does not provide a relations bonus. <u>141</u>
- No impact of global research on inflation; instead, adjusted start turn and tech costs based on difficulty for a more realistic tech pace. Immortal games now start on turn 10 and Deity games on turn 20. 251
- Some minor balance changes undone that weren't pulling their weight in terms of added complexity (change <u>200</u>):
  - Colosseum back at cost 80, no culture boost
  - 2 culture from Monastery, not 1; 4 culture from Madrassa, not 3
  - Eiffel Tower back at Radio
  - Civilized Jewelers back at Mass Media (not Corporation)
  - 1 Artist from Hippodrome (K-Mod 2, originally 0)
  - Drill does not lead to additional promotions
  - No change to maintenance of individual corporations (all at 100% as in BtS)

#### **Revised** by AdvCiv:

- Changes made in order to smoothen/ reinforce K-Mod balance changes:
  - Forest Preserve at Biology instead of Scientific Method. <u>901</u>
  - Watermill takes 4 turns to build, and Lumbermill 5 (instead of 8 both). 902
  - Serfdom has Medium upkeep instead of Low. 912
  - Colossus is obsolete with Chemistry. 310
  - The Great Lighthouse obsolete with Astronomy; cost 250 (300 in K-Mod, 200 in BtS).
  - Submarine gets 2 first strikes and another 10% withdrawal chance instead of the 25% attack bonus from K-Mod. For consistency, Attack Submarine gets the same abilities, but also loses 2 strength. Slightly raised cost of Battleship and Stealth Destroyer to make subs more effective against those units. Strength of Stealth Destroyer reduced to 33 (36 in K-Mod, originally 30). 906
- Changes kept from K-Mod versions prior to 1.45:
  - Scientific Method +1 research per specialist (1.45 moves this to Computers and has Scientific Method provide +10% commerce)
  - Lumbermill at Guilds with +1 commerce, but no production bonus until Replaceable Parts (1.45 gives them +1 production already at Guilds)
- Fixed AI issues introduced by BBAI and K-Mod:
  - Al razes fewer cities and less randomly; <u>116</u>
  - uses Slavery and Drafting less aggressively; <u>121</u>, <u>017</u>
  - uses malicious espionage only against civs it dislikes; 120
  - replaces Forts on worked tiles. 121

### Important miscellaneous changes in AdvCiv

- Attacking a Worker or Settler no longer yields a captured Worker; the attacked unit just dies. I.e. no more Worker stealing. <u>010</u>
- Trade routes can only come from revealed cities, and the paths to those cities need to be revealed as well. Cities are temporarily unavailable for trade when in occupation or anarchy. Trade along rivers doesn't require any tech (as in Warlords/ Vanilla; BtS demands Sailing). When borders of a war enemy block trade, a naval blockade can override this. 124
- Al leaders are reluctant to sign Open Borders with civs that they haven't located yet (not a single revealed land tile) – "We would have nothing to gain." At Pleased, most Al leaders sign Open Borders regardless of revealed tiles. <u>124</u>
- When mountain peaks block off part of a landmass, the parts are treated as separate continents. This is relevant for the placement of barbarians, colony maintenance and wonders that affect only one continent, though the main point is to make things easier for the AI. 030
- Starting positions worsened a bit overall. Large clusters of Gold or Gems made less common. Hidden resources are now disregarded when assigning starting locations, meaning that resources are no more likely to be revealed near a starting plot than anywhere else. <u>108</u>, <u>129</u>
- Forest and Jungle provide only 25% defense, and none if the tile is owned by the attacker. 012
- Can no longer chop Forests and Jungles on unowned tiles. <u>119</u>
- Al trains more Workers and chops more Forests. <u>117</u>
- All evacuates land units that can't defend well from cities that are about to be attacked and untenable. <u>139</u>
- Granary stores only 40% food, but provides food also after starvation. <u>160</u>
- Praetorian strength reduced from 8 to 7, cost from 45 to 40, starts with March, still no city attack bonus, and renamed to "Legionary". <u>907a</u>
- Galley, Trireme and Caravel +1 move. Cost of Galley and Trireme reduced from 50 to 45. Trireme gets no bonus vs. Galley, but 3 strength, which makes it the most efficient warship until Chemistry. 905
- Switched the no-war-probability of Roosevelt and Darius, meaning that Darius can start wars when pleased, and Roosevelt (normally) cannot. <u>005a</u>
- When more than 3 messages would be displayed at the beginning of a turn, the Event Log is opened instead. Great Person births in faraway lands are no longer reported. <u>106</u>
- "Show friendly moves" and "Show enemy moves" (player options) cause much less delay during AI turns: I've disabled most of the pointless AI patrols and excluded Worker moves from being shown to the player. <u>102</u>

- Espionage slider not shown on the main interface if it's at 0. Can adjust the slider on the Espionage screen. <u>120c</u>
  - About other minor user interface improvements, see <u>004</u>.
- The Spy unit can investigate rival cities as in Vanilla/Warlords. 103
- Get to choose from more civics and religions when using the "Change civics/religion"
   Spy mission, or when negotiating peace or trading with a vassal. <u>132</u>
- Can no longer bypass the Theocracy restriction by gifting missionaries. 123/dlph.4
- Defensive pacts aren't canceled when triggered by a third party that declares war on one of the signatories. dlph.3
- In Hotseat, resource bubbles are no longer automatically deactivated at the end of a turn, and BUG alerts now work in Hotseat. <u>135</u>

### **Start Points as Handicap (SPaH)**

I see three motivations for giving an Advanced Start only to the AI:

- A) You find the game too easy on moderate difficulty, and dislike the crass ongoing Al bonuses on the high difficulty settings, perhaps for reasons of immersion; this is where I'm coming from. A big head start for the AI can be taken to mean that the AI civilizations emerged earlier than mine, like how the Romans appeared later than the Egyptians, whereas the ongoing AI bonuses on Immortal are hard to rationalize or overlook.
  - A big AI head start can narrow down the viable strategies in the early game. It helps to assign start points unequally to the AI civs because this leaves some targets for early warfare, and a few far-ahead AI civs can't build all the early wonders.
- B) You find the game too easy on moderate difficulty, and dislike the big AI head start on the high difficulty settings (e.g. a free Settler and Worker on Deity), perhaps because it makes the early game too tense and narrow (see above). Since Advanced Start replaces the AI freebies from the difficulty setting, you can reduce the AI head start by setting a modest amount of AI start points, e.g. Deity with 400 start points.
- C) If you like the balance between AI head start and ongoing bonuses in BtS, you may still not want every AI civ to receive the exact same freebies because it creates some distortions. For instance, the Zulu get only one additional tech (Archery) on Immortal because they start with Hunting and Agriculture in any case.

#### **Usage** (id <u>250b</u>):

You'll need to check the "Advanced Start" option on the Custom Game screen in order to unlock the "Base Points" box; without Advanced Start, the SPaH option has no effect. If you enter at most 9999 Base Points, then each AI civ simply receives the amount of points entered. If you enter a five- or six-digit number, SPaH assigns start points unequally. The box is then assumed to contain two distinct numbers: a percentage in the two digits to the right and an integer in the three or four digits to the left. E.g. 110045 means 1100 and 45%. The left number says how many start points the bottommost AI civ receives, i.e. the civ in the bottommost AI slot. The topmost AI civ (topmost AI slot) receives a *fraction* of the bottommost's points equal to the percentage. In the example, that's 45% of 1100 = 495. The remaining AI civs receive values in between those two bounds. (Combined with Monarch difficulty, the 1100/45% setting should be a challenge close to Immortal.) Of course, it would be much simpler to use two separate text boxes, but, sadly, mods can't

add text boxes to the Custom Game screen.

SPaH never gives an Advanced Start to human civs, i.e. they start as normal with a Settler and Warrior or Scout. Humans receive starting locations based on the difficulty setting, i.e. the best ones on Settler and the (almost) worst ones on Deity. Then, if an unequal point distribution is used, the AI civs with the fewest points (top AI slots) are placed in the locations closest to the human civs, and the AI civs with the most points (bottom AI slots) are placed the farthest away.

Once the game has started, the start point distribution is shown on the Settings tab of the Victory screen. You'll also notice that the game doesn't start on turn 0. This is done to reinforce the notion that the human civs are late arrivals, and to have the game year match the overall development of the world.

Unequal distributions are incompatible with team games, which is to say, they should technically work, but the assignment algorithm makes no effort to balance the teams' start points and locations.

Al civs receive at least the 150 start points needed for a city, even if fewer points are entered. An Al civ with a small number of points may have difficulties repelling a human Warrior rush, so I recommend against going far below 400.

#### **General changes to Advanced Start (250c)**:

BtS allows start points to be converted 1:1 into production, which is usually far better than a 1:1 conversion into research. In order to make technologies a bit more attractive in Advanced Start, I've changed the conversion rate to 1:1.5 for production, meaning that cities, units and buildings now cost 50% more. Improvements, visibility and culture still seemed overcosted in comparison, so I've reduced the costs of these.

Advanced Start costs are no longer adjusted to the game speed setting. This makes it unnecessary to manually adjust the start points entered on the Custom Game screen to match the game speed. When playing without SPaH and on a difficulty higher than Noble, the AI receives more start points than entered. This was apparently intended by the BtS developers but not correctly implemented. Conversely, human start points are no longer adjusted based on difficulty (this was working in BtS); you get exactly as many points as you enter.

For reference, the AI freebies for each difficulty setting, and the number of start points that would be needed to buy those freebies (given the above changes to Advanced Start costs):

Difficulty	Prince	Monarch	Emperor	Immortal	Deity
Free initial items	1 Settler	1 Settler	1 Settler	1 Settler 1 Worker	2 Settlers 1 Worker
per AI civ		1 Archer	2 Archers	3 Archers	4 Archers
	1 Warrior	1 Warrior	2 Scouts	2 Scouts	2 Scouts
		Archery	Archery Hunting	Archery Hunting Agriculture	Archery Hunting Agriculture The Wheel
Worth in pts.	187	330	466	699	992

Includes 15 extra points for the 10 free initial production that the AI civs receive on all difficulty settings. In AdvCiv, the AI civs do not receive this free production after an Advanced Start. On Prince and Monarch, if an AI civ starts with Hunting, one of the Warriors becomes a Scout.

### Rise and Fall (R&F)

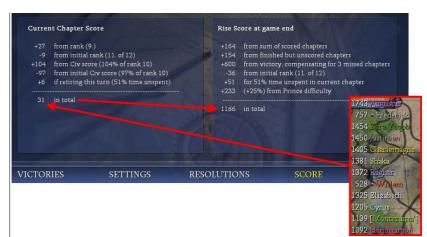

If the R&F game option is enabled on the Custom Game screen, the game gets divided into several *chapters* (of history). During the first chapter, you play as the leader and civ set on the Custom Game screen (random also works). Once a chapter ends, you have to select one of the other civs in the game. During the next chapter, you control the selected civ, while your previous civ is controlled by the Al. After each chapter, a score is awarded that measures how much your civ has improved since the start of the chapter. If you manage to fulfill a victory condition, the game ends, and you score a premium, which is, again, based on the standing of your civ at the start of the chapter. To maximize the total score, you need to pick civs that are doing badly, but have the potential for improvement. If you play well, civs will "rise" under you control, and begin to decline after Al control resumes – this is the "fall" part. (I.e. there is no special collapse mechanism like in the Rhye's and Fall mod.) The goal behind R&F is to tell more interesting stories than the usual 6000 years of one civ being successful, and doing so without hinging on the capabilities of the Al. The High to Low challenge in Kael's Assimilation mod has been an inspiration.

**Supported and recommended game settings**: Single-player only, no teams, no Permanent Alliances. The number of chapters is 6 on Quick speed, 7 on Normal, 8 on Epic and 9 on Marathon, provided that there are enough civs in the game. Since a different civ is supposed to be played in each chapter and some are usually eliminated before the final chapter, it's advisable to configure at least 1.5 times as many civs as chapters. If you dislike playing on Huge maps, you can fit enough civs on a Large map (up to 16 I'd say) or even a Normal map (up to 11) if you set the sea level to Low (assuming a standard map script like Fractal or Continents). You may want to take a look at the "Score" tab of the Victory screen at game start in order to verify that the number and length of chapters is as intended.

I haven't tested unusual settings much, but R&F should, in principle, work with any map script or scenario (except Earth1000AD). Advanced Start should be fine too, but not <u>SPaH</u>. Later-era start results in fewer chapters.

R&F is intended to be played at a difficulty that wouldn't normally be challenging, but that makes it challenging to take a civ from a rank near the bottom to a rank near the top over the course of a chapter. That's probably going to be two or three difficulty levels lower than what you normally play on.

Objective: The objective is to maximize what I'm calling the *Rise* score. When the game ends, that score is computed as the sum of the *chapter* scores plus a premium for victory. What the scoreboard on the main interface shows are scores based on population, technology etc.; this score is computed as in BtS, and I'm calling it *CIV* score to distinguish it from the chapter score. Chapter score is based on the change in CIV score

The CIV score from the scoreboard on the lower right feeds into the chapter score on the left of the Score tab, which feeds into the Rise score on the right of the Score tab.

and rank since the beginning of a chapter. Lastly, there is the *normalized* score which is shown on the Dan Quayle screen. In non-R&F games, the normalized score is computed directly from the CIV score. With R&F, it's computed from the Rise score, and should give you an impression of how close to optimal your Rise score is.

**Delayed scoring, AI changes**: A chapter isn't scored right after it ends, but during the subsequent chapter. This is done to disincentivize shortsighted plays toward the end of a chapter, e.g. conquering cities that aren't tenable in the long run. The first chapter is scored in the middle of the second chapter. With each chapter, the scoring delay decreases a little; the penultimate chapter is scored one quarter into the final chapter. The exact turns on which scoring happens are shown on the upper half of the Score tab. On those turns, a popup with a breakdown of the chapter score appears.

A side-effect of delayed scoring is that you have a stake in two civs during the first portion of each chapter: the one you're currently playing and the one from the previous chapter. This creates an awkward incentive for helping the civ from the previous chapter. Similarly, toward the end of a chapter, there can be an incentive for helping whichever civ you're going to take control of in the next chapter. In order to limit such collusive help, I've made the following changes to the AI:

- Doesn't accept unsolicited gifts, and asks for gifts less frequently than normal. No units can be gifted.
- Rejects offers that are heavily lopsided in favor of the Al.
- Is reluctant to get paid for things of questionable value to the player: civics and religion changes, embargoes, sponsored war and brokered peace.

These restrictions do not apply to AI civs that have already been scored, nor to any vassals of the player; and during the final chapter, the restrictions only apply to the civ from the penultimate chapter (until that civ is scored).

**Intermediate periods**: In between every two consecutive chapters, there is an "intermediate" period of 5 to 10 turns (depending on game speed) during which you control no civ. During an intermediate period, most elements of the user interface aren't updated, meaning that you have practically no vision and agency. A countdown on the upper right shows how many turns remain until the start of the next chapter. The main purpose of the

intermediate periods is to prevent military cooperation between the civs played in two consecutive chapters.

Civ selection: When an intermediate period ends, you're prompted to select a civ for the upcoming chapter. Each civ should be played for at most one chapter. Sometimes, this is impossible because too many civs have been eliminated already; therefore, it's allowed to play the same civ repeatedly, but the chapter score is halved then. Playing the same civ for two chapters in a row is not possible, and any vassals of the most recently played civ are off-limits too.

The selection popup lists civs in order of

Popup for civ selection

recommendation: First, non-vassals not previously played, inversely ordered by rank, then, vassals not previously played and, last, civs previously played. Civs known to the most recently played civ are listed by name, the others as "unknown". Hovering over an entry shows the civ's current CIV score, whether it's a vassal, and if so, if capitulated or voluntary and the identity of the master, and lists any war enemies. A victory stage between 1 and 4 is shown if the civ is close (at least stage 3) to fulfilling a victory condition. All this information is provided even if the name of the civ is unknown. It's often unwise to take over a civ that is at war with a stronger opponent. If you select a voluntary vassal, you'll be able to cancel the vassal agreement at any time. As a capitulated vassal, you'll have to acquire enough land and population in order to break free.

**Chapter scoring function**: The computation of chapter score isn't entirely simple, but it's not necessary to know the specifics: Simply playing for victory as if the chapter would never end, if done well, results in a good score.

• When a chapter is scored, 0 to 100 points are awarded based on the rank *r* of the scored civ on the CIV scoreboard at the time of scoring:

```
100 * (worst rank - r) / (worst rank - 1)
```

That's 100 when ranked first (*r*=1) and 0 when ranked last. In this context, the civ currently controlled is always considered to be ranked behind the civ that is being scored; this way, success in the current chapter can't hurt the score for the previous one. A score for the *initial* rank, i.e. the rank at the time that the scored civ came under human control, is computed in the same way, and subtracted from the score for the current rank. Thus, the total score

Chapter score breakdown (Score tab)

from rank is maximized (100 points) by starting in the last place and climbing all the way to first. A civ that starts in rank 1 can at best gain 0 points from rank by staying in rank 1, and otherwise loses points.

- Points are also awarded directly for CIV score; otherwise, it would be pointless to continue a chapter when it's clear that the current civ can't climb another rank. The CIV score of the next best rank is used as a point of reference. In the example on the right, Rome is currently fourth, so its score of 929 is divided by that of the fifth rank (Ethiopia, 922), and the resulting percentage (101) is added to the chapter score. At the start of the chapter, Rome's score of 352 was 65% of the fifth rank (Charlemagne, 541), and that percentage is subtracted, resulting in a net gain of 36 points from CIV score.
- If the chapter was ended prematurely through retirement (see "End of chapter" below), the chapter score from rank and CIV score is increased by half the percentage of the turns remaining at the time of retirement. For example, if 14 out

963 Justinian
962 Shaka
597 Zara Yaqob
949 Charlemagne
929 [Augustus']
562 Elizabeth
562 Elizabeth
561 Charlemagne
922 Zara Yaqob
853 Elizabeth
477 Ragnar
852 Ragnar
796 Cyrus
796 Cyrus
792 Hammurabi
739 Roosevelt
730 Louis XIV
730 Louis XIV
727 Montezuma
671 Brennus
587 Willem
587 Sustinian
6848 Justinian
682 Justinian
682 Elizabeth
484 Willem
498 Willem
582 Fagnar
466 Cyrus
446 Roosevelt
739 Louis XIV
739 Roosevelt
730 Louis XIV
737 Montezuma
356 Montezuma
552 [Augustus']
587 Willem

Example: Current scoreboard (left) and scoreboard at the start of the current chapter

remaining at the time of retirement. For example, if 14 out of 65 turns remain, the portion of unspent time is 22%, so the chapter score is increased by 11%.

If the bottom line is -10 or worse, a square root is applied in order to reduce the loss of points. This is done so that a single failed chapter can't ruin the total Rise score.

**End of chapter**: All chapters have the same length except for the last one, which can be a

bit longer or shorter than the others. The chapter length depends on the number of chapters and the game speed. To see how many turns remain, hover the mouse over your civ's flag on the main interface. During the last three turns of a chapter, a countdown is shown directly on the main interface, and at the beginning of the final turn, there is a popup reminder.

As the end of a chapter approaches, you should try to put your civ in a state that its Al leader can work with because the civ comes under Al control for some time before scoring happens. E.g. Gandhi might not continue your war of conquest. Don't rely on preprogramming decisions for the Al: When the Al takes over, the mod clears your slider positions, governor settings and the queues for city production, research and unit missions.

You can end a chapter early by selecting "Retire" from the main menu. This button, which normally concedes the entire game, works very differently with R&F. By retiring early, you earn a bonus to your chapter score (see "Chapter scoring function" above) and the chapter continues on Al Auto Play until its regular end turn. Retiring makes sense when your civ is getting so far ahead of the others that the Al might run away with the game once the chapter ends.

Chapter		The second second		
	Zululand	Turn 0 to 64 (1440 BC)	57 points	Scored on Turn 118
2	England	Turn 73 to 137 (540 AD)	107 points	Scored on Turn 191
3	Rome	Turn 146 to 210 (1500 AD)	154 points	Scored on Turn 264
4	Aztec	Turn 219 to 283 (1826 AD)	31 points (turns remaining: 34)	Scored on Turn 337
		Turn 292 to 356 (1936 AD)		Scored on Turn 410
6		Turn 365 to 429 (2009 AD)		Scored on Turn 483
7		Turn 438 to 499 (2049 AD)	?	Scored on Turn 499
		Total so far:	349	

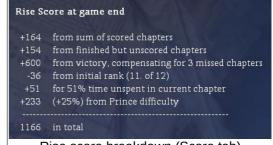

List of chapters on the Score tab, showing start and end turn (with end year), chapter score and scoring turn for past chapters, the current chapter and future chapters. The chapters with score values in bold have already been scored; score values not shown in bold indicate the score that would be awarded if the chapter were scored right now.

**Game end**: The game ends immediately when one of the BtS victory conditions is fulfilled by any civ. If the previous chapter hasn't been scored yet, it is scored now. If an Al civ wins, then the current chapter is scored as well and the Rise score is simply the sum of the chapter scores. If the human civ wins, then the current chapter is not scored, i.e. rank and CIV score don't matter. Instead, a victory premium is added to the total score from the earlier chapters. This is, once again, a bit complicated; in short, the incentive is to win as early as possible if it can be done from a poor position, but not to win a quick victory by picking a civ that is already about to win.

- 150 points plus 150 for each chapter that hasn't started yet.
- The premium above (P) is reduced based on the rank  $r_0$  at the start of the chapter (initial rank) by subtracting

```
(P/1.5) * (worst rank -r_0) / (worst rank -1).
```

However, even when the initial rank is 1, the premium is never reduced below a lower bound of P/3.

Rise score breakdown (Score tab)

• In the endgame, score isn't a good measure of a civ's standing. Therefore, whenever R&F considers ranks, those civs close to a victory condition (stage 3 or 4) are con-

sidered to be ranked higher than those not close to any victory, and civs at stage 4 outrank those at stage 3. Victory stages are normally only used for AI decision making; see change <u>115</u> for some more information about them.

- Regardless of the initial rank, the percentage of turns remaining in the chapter in which victory has been achieved is added.
- Finally, the Rise score is multiplied by a factor based on the difficulty setting.

On the Hall of Fame screen, the Rise score is shown in the "final score" column. Use the "score victory" filter in order to display only results of R&F games.

A defeat of the human civ does not cause the game to end unless it happens in the final chaper. Instead, human defeat causes the game to continue on Auto Play until the chapter ends, and then a new civ is selected as normal. A defeated civ is scored immediately and is treated as having 0 CIV points.

For some additional technical details, see change ids <u>700</u> et seq.

### PerfectMongoose (PM)

The PM map script is based cephalo's <u>PerfectWorld3</u> (PW3), which employs models of plate tectonics, wind patterns and hydrology. The basic ideas are best described in the old CFC <u>thread</u> for PerfectWorld2. LunarMongoose ported PW3 from Civ 5 to Civ 4, incorporated changes by AlAndy and Fuyu, and made changes of his own, which are listed in the PM <u>thread</u> on CFC.

- PM vs. Tectonics: LDiCesare's Tectonics script, which is included in BtS, also models
  plate tectonics and wind, but, as far as I can tell, in simpler ways. PM has about three
  times as many lines of code as Tectonics does if that's any indication. An updated
  version of Tectonics is also included with AdvCiv (change id 021a).
- PM vs. Totestra: <u>Totestra</u> is a PW2 fork by vktj. Totestra offers more custom map options than PM, but PM has a more advanced terrain generator.

I've customized PM (change <u>021b</u>) because I felt that the starting locations were too unbalanced and it played too differently from the standard map scripts. In particular, there was too little arable land and too much dense forest. <u>Civ 4 Reimagined</u> has changed Totestra in similar ways, and I've adopted some of those changes.

In many ways, PM can supersede the Fractal map script, but since PM tends to generate more continents than Fractal, the space available for expansion tends to be distributed less evenly. Some other caveats:

- Huge maps might take a couple of minutes to compute.
- Duel maps often have way too little land. I'd say that Duel size isn't really supported.
- The Old World Start option doesn't always manage to create multiple continents. If you get just one continent, the map is still playable just be aware that a New World isn't guaranteed to exist. I think Normal and High sea level almost always lead to multiple continents, so this is perhaps only an issue with Low sea level.

I've removed the custom map options for using the (legacy) PW2 land generator and climate system, and the option to "break Pangaea with meteors". Instead, the script tries to break Pangaea if and only if the Old World Start option is set.

### **Known issues**

- No known serious bugs, but the mod is generally still in an experimental state. I recommend setting a narrow AutoSaveInterval in My Games\Beyond the Sword\CivilizationIV.ini. If UWAI (which contains the bulk of the new code) causes errors, that component can be disabled even in a running game by saving, exiting and setting either UWAI\_IN\_BACKGROUND Or DISABLE\_UWAI in Assets\XML\GlobalDefines\_advc.xml, and then restarting and reloading.

The <u>update history</u> since v0.8 might give you an idea about the sort of bugs that are still getting fixed.

- Most of the Custom Game settings have been tested only superficially through Al Auto Play. Permanent Alliances have hardly been tested at all; might crash.
- Networked multiplayer hasn't been tested. K-Mod is known to be a stable multiplayer mod, it's just my additions that I'm concerned about. I did play some 50 turns, and it didn't crash and didn't go out of sync. Haven't tested PBEM either. Hotseat has been tested a little.
- If the mod folder "AdvCiv" is renamed, the name also has to be changed in Assets\
  XML\Art\CIV4ArtDefines\_Misc.xml. Otherwise, the mod will crash while loading: "Failed to initialize the primary control theme". This is a side effect of change <u>002b</u>.
- Translations: There are German translations for everything except the changes to Civilopedia (id <u>008</u>). I've only translated short bits of text into the Romance languages (and not very well).

### For developers

The modified source code files can be found in AdvCiv/CvGameCoreDLL. In all modified files, changes and additions are labeled in-line with "advc.id" or enclosed in XML-style: <advc.id> ... </advc.id>, where id is one of several three-digit numbers I've (somewhat arbitrarily) assigned to sets of related changes. In retrospect, I should've used a version control system from the beginning; I've only now (v0.8) put the code on GitHub.

Changes from K-Mod-Extended are instead marked with kmodx, and those adopted from DarkLunaPhantom with dlph. (Some of these have been merged into K-Mod 1.45, but I had merged them into AdvCiv before 1.45 was released).

Developer documentation for UWAI is not included in this file; the changelog (id 104) only describes the integration of UWAI into BtS. Parts of UWAI are adjustable through AI\_Variables\_GlobalDefines.xml. If you've enabled logging (LoggingEnabled = 1 in My Files/My Games/Beyond The Sword/CivilizationIV.ini), you can change REPORT\_INTERVAL in GlobalDefines\_advc in order to have UWAI log AI internals to My Files/.../Logs/debug.log. The logfile is formatted in Textile. I've been using Borgar Porsteinsson's Textile-JS to parse it (free web interface). If cheats are enabled, AI war plans can be checked ingame by holding down the Alt key and hovering over the AI leaders on the scoreboard; same as in the BBAI mod.

## Changelog

Not a chronological record; the change ids are assigned pretty arbitrarily. Changes since v0.8 are tracked through Git: <u>commit history</u>.

001	Minor bugfixes (not a complete list)				
See also	Fixes merged from other mods: kmodx, dlph.				
	Corrected the city culture output shown during disorder by K-Mod/BUG with enabled Building- Actual-Effects option.				
war success		ed on a war success ratio in BtS, not absolute before stack combat could make the AI willing to ses.			
	no longer spare a single target city pe er that city intactly.	r continent from pillaging. In BtS, they apparently			
Reduced the (No clue if it	9 ,	om 80% to 20%, which, I suspect, was intended.			
		ture cities if they contained a visible non-combat d 1.45, but I've kept my own fix instead.			
	Al civs can no longer do diplomacy. In n Al is eliminated by another Al.	BtS, there is a slim chance for this to happen			
Al no longer	trades for resources needed only for	obsolete units (merged from <u>Better BUG AI</u> ).			
	flow when a large amount of culture i out the issue on <u>CFC</u> .	s added through WorldBuilder. Thanks to xaster			
Attitude cac	he updated when the ranks on the sc	oreboard are updated.			
001b	Can't build air units in cities already filled with air units.				
Rationale	A bit of a judgment call; could argue that the cap should only matter when construction finishes, but this isn't practical.				
001c	Displayed GP birth probabilities comp	outed based on current GPP per turn			
AdvCiv	BtS				
help text of	Corrected the birth probabilities shown in the elp text of the GP bar on the City Screen. Now project the city's current per-turn GPP into the adjust only gradually when a specialist is reassigned.				
Tbd.	Should perhaps take into account a foreseeable increase of the GP threshold due to other cities finishing their GP earlier. And Golden Age length if currently in a Golden Age. That said, I might at some point change the way the threshold increases; better to leave the UI-side alone for now.				
001d	Unrevealed cities shown as "Unknown" on Top 5 cities (K-Mod: "Unknown" only if owner not met).				
Rationale	Not exactly a bugfix. Before v0.88, this change also hid national wonders of other teams from the BUG Wonders tab, and I thought showing them was a bug because a comment said "only display national wonders for the active player's team", and that isn't what the code does. However, it's better to display the wonders. Which is to say, the game game really shouldn't make all buildings of all revealed cities visible to the				

	player; it's way too much information, but it's difficult or possible to hide them, and since the info is available it should also be on the Wonders tab.		
001e	No more stop-trading requests about a civ that has just stopped being worst enemy; and no offers for Defensive Pact from a civ that has just been attacked.		
001f	Foreign cities no longer become unre	evealed upon conquest by a third party	
	y is conquered, it remains revealed to the knew the city prior to conquest.	When a city is conquered, it is treated as a new city, revealed only to the new and former owner, and any third parties that happen to have visibility of the city at the time that it is conquered.	
Rationale	Hard to say if this is really unintentional. The BtS code explicitly sets the city to be revealed to the former owner. Were third parties not considered?  Doesn't make sense to me that third parties learn about the conquest, but not about the aftermath.		
001g	Deleted duplicate MemoryAttitude entries about Suleiman and all leaders after him in Leader Head XML (it's ordered alphabetically); used the mean when two values contradicted each other. Those before Suleiman didn't have duplicates.		

001h	Industrial bad health		
AdvCiv	1	BtS	
strategic resources (Factory, Coal Plant, Industrial Park with Coal or Oil), the AI assumes		Only bad health that the city will suffer directly, i.e. from currently available resources, is taken into account. E.g. Factory counts as just 1 bad health so long as Coal/ Oil aren't available.	
doesn't have	e Industrial era, so long as a city power yet, the AI treats the city's the as 1 less when evaluating the health.	The AI does not aim at keeping a health surplus available; just aims at balanced health given the immediate effect of the building.	
	e (negative) weights of bad health icit in building evaluation.		
loss from bad health in Industrial Al cities.		Al ends up building Factories and Coal Plants before getting Oil and Coal. If health is just balanced at that point, once Coal and Oil are connected, the city is at -8 health. The Al then shrinks the population gradually by 8 to avoid wasted food (more with Industrial Park, not to mention Poisoned Water).	
		BBAI and K-Mod have largely rewritten the building evaluation code, but this bit works as in BtS.	
Rationale	Treating health as one less should lead to some leeway for later bad health, especially from power.		
See also	160 makes Poisoned Water less dangerous, and 120d improves the AI response to that mission.		
Tbd.	The bad health effects are very badly balanced. Too much at once, bad health for no reward (Factory doesn't actually get better with Coal or Oil), punishing for tall		

strategies. Shouldn't even be possible to build a Coal Plant without Coal.

	Replaced a couple of isOpenBorders calls with isFriendlyTerritory – had apparently been missed when BtS introduced vassal agreements (which allow passage even without an OB agreement). All evaluation of Missionaries should be improved now.
	Deleted two (K-Mod) calls to CvPlayerAI::AI_getNumTrainAIUnits because CvPlayerAI::AI_totalAreaUnitAIs already counts those units.
See also	017 fixes a bug that also has to do with confusing these two function.

001k	Al plot-danger checks no longer (indirectly) check isMadeAttack		
AdvCiv		BtS	
of being atta whether tha As a side ef that shelf ice	I checks whether a plot is in danger acked by a unit, it doesn't check t unit has already attacked this round. fect, the AI may not be able to tell plots are in no danger from nonships; hopefully no other problems	Vanilla Civ 4 did not check for an earlier attack; BtS added this clause.	
Rationale	Plot danger is only checked during Al turns, and the active Al civ then wants know if another civ could attack on that other civ's next turn; it doesn't matter if the unit could immediately attack. Perhaps the BtS developers hadn't realized that the MadeAttack flag persists for an entire round of turns.		
	, ,	is; the plotDanger functions are called in dozens noticed it; some situation in which the AI clearly	

001l	Fixed an inconsistency in the AI trade value modifier for gold		
AdvCiv		K-Mod	
trade value o human propo	the same modifier for computing the of gold regardless of whether a osal is put before the AI, or if the AI rade involving gold.	When one side is in financial trouble and the other isn't, the AI can be brought to propose deals that it won't accept if the player proposes them.	
	Perhaps the modifier shouldn't depend on financial trouble; just use a fixed value (of 200%). I don't think the code works as intended anyway, i.e. doesn't make the Al reluctant to trade away gold when in financial trouble.		
	See karadoc's comment about the deficient BtS trade Al above CvPlayerAI::  AI_cityTradeVal in CvPlayerAI.cpp.		

001m	Scoreboard gets updated when a leader name changes	
AdvCiv		BtS
When the player enters a different leader name		The scoreboard isn't updated until end of turn

(Alt + D), the name is immediately updated on	unless the player manually closes and reopens
the scoreboard after clicking "OK".	the scoreboard.

<b>001n</b> Potential OOS b	ougs (just 1 so far)
-----------------------------	----------------------

Improper use of random numbers, unsynchronized user input and uninitialized memory are the usual causes of out-of-synch errors in multiplayer. Of course, uninitialized memory is also problematic in singleplayer (and difficult to debug).

CFC post by karadoc on the subject of OOS errors: link

001o	Military happiness only from units of the same team or vassal/master	
AdvCiv		BtS
A city that fears for its safety or that is under Hereditary Rule can receive happiness from military units only if those units belong to the same team as the city or to a vassal or master of that team.		Any (non-hostile) units cause military happiness.
Rationale Comes up rarely, but highly counterintuitive when it does.		

002	Cosmetic changes	
002a	Minimap shows lighter player colors on water tiles (like in Military Advisor)	
Rationale	CFC forum post (also with screenshots)	
Config	Switch in GlobalDefines_advc.xml. Also allows uncolored water tiles like in Civ 3.	
002b	Increased font sizes.	
	Shortened some leader names, e.g. "Augustus Caesar" ${\scriptscriptstyle  ightarrow}$ "Augustus" when used outside of Civilopedia.	
	Shortened "Native American Empire" to "Amerindian Empire".	
Rationale	People play on rather high resolutions nowadays, and the fonts don't scale properly.	
	Long leader names take up (even) more room with the larger fonts. This is a problem for Native America because the text covers up the civics icons during diplo. Would be better to use only short descriptions there, but that seems to be programmed outside the SDK.	
Credits	Inspired by <u>VIP</u> mod and I also took a look at vincentz's setup. This <u>tutorial</u> was helpful, although neither the downloadable package nor the code in the tutorial actually worked for me.	
Tbd.	Can't seem to change font sizes without defining a custom theme, which appears to mandate copying 25 thm text files. I was at least able to avoid copying all the tga files, which make up 15-30 MB – this would've been prohibitive for distribution.	
	I think there may be a way to make this work by copying just one or two files, but I can't figure it out (and I don't think other modders have).	
	Had to hardcode the mod folder name in Assets\XML\Art\CIV4ArtDefines_Misc.xml in order to plug in the custom theme.	
	Several boxes are now a little too small for their text and could use some adjustment. The help text area should be a little wider; has some stupid linebreaks for units with many promotions. Perhaps not possible	

	outside the EXE; HELP_TEXT_MINIMUM_WIDTH doesn't do the trick.		
002c	Added a couple of translations for K-Mod game text entries.		
Credits	Also merged translations by Zholef. I haven't marked these changes in the XML files.		
002d	Changed the icon of the specialist-commerce ability introduced by K-Mod 1.45 to show a Scientist; was Citizen. (Depending on which commerce type gets increased, the icon could also show a different specialist, e.g. Engineer for production.)		
002e	Disabled glow effect on units ready for promotion except for the currently selected unit and foreign units.		
Rationale	Too obtrusive. Players don't select units just to assign promotions; they select them in order to move or heal, and assign promotions at that opportunity. No need to constantly indicate unassigned promotions on the world map.		
	The glow is needed on foreign units because there is no other way of telling that a foreign unit has unassigned promotions. Shouldn't be a secret either. (Rarely relevant in singleplayer as the AI always assigns promotions right away.)		
Config	Can be toggled in GlobalDefines_advc.xml		
002f	Changes to city icons: Defense icon moved behind the defense modifier; city network icon removed.		
Rationale	Should be easier to guess now that the tower icon isn't some status indicator, but just stands for the word "defense". The city network icon is at best helpful in the early game, though probably not at all for experienced players (and inexperienced players may be unaware of the icon). Can always look at the list of trade routes on the city screen.		

Minor refactoring, utility functions, comments about unused or otherwise dubious code; in particular:

Macros TEAMREF and TEAMID that I use a lot to shorten code. E.g.

GET\_TEAM(GET\_PLAYER(ePlayer).getTeam())

#### becomes

TEAMREF(ePlayer)

Some utility functions for dealing with floating point numbers. Floating point arithmetic is easier to read and less error prone than the iSomethingPercent stuff. I also try to round values as late as possible in order to avoid rounding artifacts.

	Misc. performance tweaks 003d: Faster Quick Load	
occ arso	occa. Faster Quick Edua	

003c	Addded an assertion that checks if XML data loaded through GC.getDefineINT	
	actually exists. Found just one (unimportant) error this way and corrected it. Had to	
	change some calls that happened before XML was even loaded; no functional change.	

003d	Faster loading of savegames	
AdvCiv	BtS	

When using Shift+F8 to Quick Load in fullscreen mode, the game exits to the main menu for a second before loading the Quick Save slot.		When loading any savegame while playing in fullscreen mode, the game hangs on "Initializing" (doing who-knows-what) for a period of time that appears to depend on the complexity of the game state. Can easily be 30 seconds. This delay does not occur when loading from the main menu (nor when exiting to the main menu).	
Rationale	This (apparent) bug has been long known, though these three <u>CFC threads</u> are the only web sources I can find that mention it. It's possible that it only occurs on some systems.		
	My fix only covers Quick Load. Since probably all I can do. Workarounds:	the "Load Game" menu is outside the SDK this is	
	a) manually exit to the main menu be	fore loading; or	
<ul><li>b) play in windowed mode; or</li><li>c) (my preferred choice) press Alt+Tab two times when the delay begins. This to finish the "Initializing" stage immediately.</li></ul>			
	Could easily replace the "Initializing" text with a recommendation to minimize the game if loading is taking long. I've tested this and found it quite helpful because I keep forgetting about this. But the recommendation would also show up when generating a map, and this is misleading because Alt+Tab does not speed up the map script. The replacement text also needs to be very short; no room to explain that it only applies when loading a savegame. Had to leave it at a regular loading screen hint (008d) that shows up randomly.		
Tbd.	Italian and Spanish translation.		
See also	009 is a prerequisite because it repairs BUG code for finding the My Games directory where savegames are located.		
	004m enables resource bubbles at game start. They normally stay enabled when loading a savegame, but not when it's done via the main menu. Therefore, 004m, keeps track of the status of resource bubbles, and 003d restores that status after loading.		

Minor usability improvements		
101 adds help text to the Nationality bar (city screen). 120c hides the espionage slider when it's at 0. 210 adds BUG-style alerts.		
Misc: Show the turns-left countdown only when at most 30 turns away from time victory (instead of 100); inspired by RFCEurope.  Health from trait shown on city screen as "from Trait" instead of "from Civilization".		
Bulb button shows next bulb targets		
AdvCiv K-Mod/BUG		
all techs that the GP will be able to an additional tech is researched, e.g. Astronomy (with Printing Press)".	The help text only says which tech the GP can discover right now.  BUG Tech Advisor shows bulb paths. Enabled by	
	101 adds help text to the Nationality when it's at 0. 210 adds BUG-style al rns-left countdown only when at most RFCEurope.  trait shown on city screen as "from Tr Bulb button shows next bulb targets at for the bulb ("Discover") button of a all techs that the GP will be able to a additional tech is researched, e.g. Astronomy (with Printing Press)".	

		default.
Rationale	For players who don't plan their bulbs (long) in advance, the added help text should usually suffice. Moreover, the BUG bulb paths look confusing, and aren't integrated well into the Tech Advisor.	
Config	fig BUG Tech Advisor can be enabled from the in-game BUG menu.	
AdvCiv		BtS
	researched by a (e.g.) Great elp text on technologies.	Help text on a technology says whether that technology could currently be discovered by a particular GP.
Rationale	the GP to find out which techs it can by the time a GP is born, the informa	discover. If the player doesn't have the GP, then, tion may no longer be accurate. Most of the time, player needs to know about bulb paths, he/she.
004b	Found button shows projected health	n, city tile yield and increase in city costs
Tbd.	Should also show free initial building	s (Palace, more with Medieval start or later).
AdvCiv	ı	BtS
current tile. the new city The increase i maintenanc vassal cities increased m temporarily plus increased c decrease in decrease in	increased civic upkeep plus decrease in unit cost (from the +1 population) plus decrease in unit supply and cost from the lost Settler	
Tbd.	` ,	apparently at most 1 gold that I can't figure out.
The help text on the found button shows health from features, traits (Expansive) and freshwater. All features revealed in the (full) city radius count. While a Settler is selected, the help text of any tile shows health effects.  Forests provide +0.5 health, Jungles -0.25, Flooplains -0.4 and Fallout -0.5.  City tile yield only shown once a city has been		
Found-button help text shows the projected city tile yield.		founded. Usually just 2 food, 1 production, 1 commerce, but occasionally more.
See also	016 changes the effect of extra yields	s from random events on city tiles.
004c	Changes to bombardment	
city defense from recovering.		Can't bombard cities with 0 defense. If a city isn't bombarded for a turn, its defense begins to recover on the next turn.
		The ability of Wall and Castle says "+ defense (except vs. Gunpowder-based units)" and those Gunpowder-based units have the XML tag

example, when a city that has 100% defense from a Castle, but just 60% from culture, is bombarded by a Cannon (bombard rate 12), city defense is reduced by 20 percentage points. Units that ignore defensive buildings see 48% defense, the others 80%.		IgnoreBuildingDefense. However, Siege units with the tag don't actually ignore defensive buildings; they only ignore the bombardment reduction effect that Wall and Castle also have. In the example on the left, the Cannon player would see 60% before bombardment, and 52% after.
Rationale	units, but the implementation is unac often consist entirely of units that ign	ving defensive abilities against post-Medieval ceptable from a UI pov. By the Modern era, stacks ore building defense, and then the player only which somehow doesn't decrease as fast as it
	unit is selected; in the example, the p 100% to 88%. Not trivial to implement because siege units still need to igno	now city defense including buildings when a siege player would then see defense decrease from at (can't just take away IgnoreBuildingDefense are bombardment reduction), and my solution is siege units entirely ignore defensive buildings.
Tbd.	Clearly, Walls and Castles could use	a buff.
	Would be nice to have the help text for the Bombard button state the bombard rate.	
004d	Al says "not right now" to peace whe	n war is recent
AdvCiv		K-Mod
Screen say too recent. with a third	yer tries to broker peace, the Trade is "not right now" if the war is still The AI will agree to brokered peace civ as part of a peace treaty with the if the AI would normally still refuse at third civ.	Says "we'd love to, but you'd have to ask them" instead. Often, both sides say this.  (As far as I recall, peace could be brokered even when a war was recent in BtS.)
004e	Leads-to info added to promotion but	ttons
AdvCiv		BtS
The help text for promotion buttons lists the promotions enabled by the current promotion.  E.g. "Flanking I Leads to Flanking II, Navigation, Sentry"		Can only look this up in Civilopedia.
004f	Disabled celebrations	
No celebrations (We-Love-The-King Day) ever.		If a city has at least 8 population, no anger and no bad health, celebrations happen with a probability of population / 1000. The reward is 0 maintenance for 1 turn.
Rationale Celebrations grant just -3% maintenance on average in a size 30 city, which is insignificant. I'm not even listing this as a balance change. Celebrations were potent in Civ 2, but already irrelevant in Civ 3. They've only confused players. Something no one will miss who doesn't know it's disabled.		
004g	Misc. changes of confusing help text	(not a complete list)
"Our shared	d borders spark tensions"	"Our close borders spark tensions" Too similar to "closed", and doesn't imply that they're touching.

		Sounds like this is the only obstacle, but often isn't.
	attacked a y: 22% damage". ne minus sign.	"Your x has attacked a y: -22% damage"
"Some wonders on this continent are making us happy" for the Notre Dame ability. (Only changed in English and German)		"Some buildings are making us happy", listed twice when there is also e.g. a Colosseum.
Financial Ac Credit to <u>Th33</u>	dvisor says commerce from "Trade" 4	"Foreign trade" in K-Mod (but it's actually all trade)
"The anarchy is over" in white letters		In red letters, like it's a bad thing.
"We are afraid of their military might" when sponsored war refused on account of nukes "Surely, you must be joking."		"Surely, you must be joking."
Polar desert	t called "Snow" instead of "Ice".	Both polar desert and shelf ice are called "Ice".
In-game ma	in menu called "Game Menu".	Called "Main Menu", same name as the menu where you go after "Exit to Main Menu".
004h	(Disabled for now.) Highlight full city	adius when Settler selected
	tler is selected, both the inner city he full city radius are highlighted.	Only the inner radius, i.e. the adjacent tiles are highlighted.
Rationale	Highlighting the adjacent tiles isn't helpful at all; showing the full city radius is at least somewhat helpful.	
Config	Disabled through CvUnit::showCityCross	
Tbd.	Showing both inner and outer ring separately is too distracting. I see no way to get rid off the inner ring from within the DLL. The outer ring alone might still be too obtrusive. It would probably be best to show no city radius at all (use Alt + X for that instead), and also no yield display. Since none of this appears possible (the "Show City Radius" graphics option has no apparent effect either), it's best to leave it as it is.	
	also no yield display. Since none of tl	nis appears possible (the "Show City Radius"
004i	also no yield display. Since none of tl	nis appears possible (the "Show City Radius" ct either), it's best to leave it as it is.
004i Credits	also no yield display. Since none of the graphics option has no apparent effe	nis appears possible (the "Show City Radius" ct either), it's best to leave it as it is.
	also no yield display. Since none of the graphics option has no apparent effection message about gold stolen by enemy	nis appears possible (the "Show City Radius" ct either), it's best to leave it as it is.
Credits  004j In singleplay regenerated	also no yield display. Since none of the graphics option has no apparent effective Message about gold stolen by enemy ldea from Civ 4 Reimagined 1.2	nis appears possible (the "Show City Radius" ct either), it's best to leave it as it is.
Credits  004j In singleplay regenerated regenerate a After regenerate (DoM) screen	also no yield display. The DoMscreen isn't shown after regenrating, and the game tries to center the camera on the player's starting plot, but somehow this has no effect; camera stays at the previous starting plot.  Inerally see no reason to prohibit regeneration rate function can't handle diplomatic contacts, or it tried it. I'm also not sure if regenerate can Safer to remove the option after a couple of the main menu.  Ither the DoM screen should appear after ows the camera to move (though the line that

Rationale	No one seems to use it; leaner interface is better.		
Tbd.	Would prefer to leave the mission available via its keyboard shortcut. That's not so easy to implement. (Shortcuts are handled in handleAction, which checks, ultimately, canDoMission, which is also responsible for the displayed mission buttons.)		
004l	Fortify-Heal works like Sentry-Heal outside cities		
city, that uni unit approad	is fortified "until healed" outside a t will ask for orders when a hostile ches. Forts behave like cities in this units healing in Forts don't wake up aled.  Units that are fortified until healed only ask for orders once they're healed.		
Rationale	BULL has a separate Sentry-Heal mission that is missing from K-Mod. My change to Fortify-Heal should result in the desired behavior in most cases. Units already have so many rarely used buttons; don't want to add another.		
Tbd.	The help text should say "Sentry until Healed" when not in a city. I've written the help text (Civ4GameText_advc.xml), but showing it dynamically based on whether a unit is in a city isn't straightforward. Will have to implement a separate Sentry-Heal mission, and disable Fortify-Heal outside of cities (and disable Sentry-Heal inside cities). And make sure that it works in networked multiplayer; the current implementation should be fine, but new action buttons can introduce OOS bugs.		
004m	Increased initial camera distance and enabled resource bubbles by default		
Rationale	I always zoom out a bit at game start, and I recall reading somewhere that customer research (on Civ 4?) had shown that most players play from rather far away.		
Tbd.	Would be better to (re-)store the status of resource bubbles by means of some .ini file; I've no experience with this sort of thing. The SDK doesn't even say whether the layer is enabled, but I've worked around this (function CvGame::isResourceLayer) for change <u>003d</u> .		
Config	Both optional through GlobalDefines_advc		
004n	Arrow button on city screen shows all local units		
	click on the right-arrow button on the shows icons for all local units.  One full row of unit icons is shown when opening the city screen. If there are more units in the city tile than fit in one row, each click on the right arrow next to the unit icons shows one additional unit. If Ctrl is held when clicking, 10 more units are shown.		
Rationale	At least at 1280x1024 resolution – and I think most players have that much –, even 100 units don't really obstruct the city screen. Showing them one by one is needlessly slow and complicated.		
004o	No start-revolution button on the new-civic popup		
	-civic popup only has the buttons "Let's get this revolution started" directly starts a ways are best" and "Let's see the big revolution.		
Rationale	Players sometimes forget other civic changes that could be made along with the one suggested by the game (especially if more than one civic becomes available at a time). This is frustrating and happens easily.		
004р	No commerce breakdown in city screen if slider at 0		
When show	ing help text for any of the four Raw commerce is shown even when the slider is		

	above 0.	0. E.g. "Culture: 1000 ====  Base commerce: 50 +50% for Capital 0% of 75 = 0"	
Rationale		er to read, and could be confusing for new or der isn't even available at the start of a game.	
Don't show the player's total culture output on the Total culture output (sum of the culture rate main interface.			
Rationale	Not an important statistic; not worth bas total culture doesn't have any effective	eing constantly on display. Even a bit confusing ct of its own.	
See also	120c hides the espionage slider wher	n it's at 0	
004q	Sum of the relations modifiers shown	along with diplo breakdown	
e.g.		Players have to sum up the modifiers by themselves to find out the total relations value:	
Pleased <b>(+7</b> +1: "Years o	7) towards Gandhi of peace	Pleased towards Gandhi +1: "Years of peace	
004r	Report resources discovered on uncla	aimed tiles	
unowned ar well, and th		Only resources on the player's current territory are reported.	
Rationale	All sources could be interesting to the but mustn't flood the screen with mes	player, including those owned by other teams, sages.	
	The warning about no source probab forget to check whether Horses have	ly matters most for Animal Husbandry; easy to been revealed anywhere.	
004s	Economy ("GNP") curve doesn't cour moving average	nt culture and espionage; yield curves show	
AdvCiv	1	K-Mod	
The Economy graph on the Info screen is named 'GNP (Gold+Research)" and shows the net sum of the gold generated by all cities plus the sum of the research generated by all cities. This sum doesn't include any costs (e.g. city maintenance or civic upkeep). It does include (no change) all gold and research modifiers (e.g. Bank, Library) and commerce from trade routes, buildings (Shrine) and specialists.			
	All the yield curves show moving averages based All curves show the game state at a given turn, not an average.		
Economy and Industry ("goods produced")  Curves show a (very short) straight line for revolution turns.  When a revolution turn is sampled for one of the curves, a sharp, brief decline is shown.			
Rationale		n curves. Both can reach far higher rates than a settled Great Spy produces 12 espionage per	

turn, a settled Great Scientist only 6 research. This makes it hard to tell from the Economy curve if a civ has a strong economy or if it's merely focusing on culture or espionage. A single curve for gold and research is OK; they're on the same scale.

By including costs, the curve would essentially become a research curve, which is probably more useful than some commerce curve, but then it would seem like a "Gold" curve is missing. Another issue is that <u>UWAI</u> uses the Economy history for some important computations, and removing costs roughly cancels out the removal of culture and espionage, so I don't have to revise the UWAI formulas. Excluding costs is also consistent with the Agriculture curve ("crop yield"), which doesn't include food consumption.

As for research modifiers: Any modifiers that apply only to the currently researched tech (which can change any turn) are misleading. Perhaps tech diffusion should be included; if they're behind on the current tech, they may well be behind on the next one ...

Moving average: The Economy and Industry curve fluctuate a lot in BtS, to the point of being hard to read, and removing culture and espionage (which rarely fluctuate) from the Economy curve makes it worse. The fluctuation is caused by AI juggling of citizens. Apart from usability, the average is also supposed to obscure the changes from one turn to the next a bit. I can't make much sense of them, but it might be possible to derive some specific information, e.g. about AI war planning or wonder building, that the player isn't supposed to have. The power curve has that issue too; however, it might be confusing if the enemy power curve doesn't immediately drop after defeating an enemy stack.

Revolution turns: The negative spikes are confusing because revolution turns aren't always sampled when drawing the curves.

Tbd. "GNP" is a bad name because "Goods produced" would have to be included in a GNP.

004t	No tech and production recommendation unless Sid's Tips enabled	
AdvCiv	,	BtS
recommendat popups.	ion is given in the tech and production chooser	Disabling Sid's Tips only gets rid of the summary texts in the tech/ production chooser; still says "Recommended by suchand-such advisor" next to the top two items.
Rationale	Disabled this change again because it looked strange to have the two recommended production choices on top without explanation, and though the recommendations are pretty bad, they're still better than starting the list with Settler and Worker all the time.	
Config	Can enable this change (i.e. disable the recommendations) through ENABLE_POPUP_ RECOMMENDATIONS in GlobalDefines_advc.xml.	

004u	More info in message about Great General (GG) death	
AdvCiv		BtS
owner of the killed the Go	GG and the owner of the unit that	The player only learns the name of the GG. Can only search the Turn Log for the birth message (if it hasn't expired) to find out the GG's owner.
Rationale	Debatable if the location should be in	dicated; more flavorful this way I think.

004v	Changes to scoreboard help	
AdvCiv		BtS
The hint about Ctrl for trade table and Alt for DoW are merged into a single line.		Two lines of UI help, one above the line about worst enemy, the other below.
Rationale	Cleaner this way.	
See also	106d changes BUG settings concerning the scoreboard.	

004w	Removal of unnecessary help text		
AdvCiv	ı	BtS	
requirement unique build starts a Gold	s already completed, don't show ts in help text, and don't show if it's a ding, if it founds a corporation, if it den Age, if it centers the map, if it's another building, if it can be built by a on).	Help text for buildings in a city's building list shows e.g. that the Palace requires at least 4 cities and that the Trading Post is a unique building replacing Lighthouse.	
Help text for wonders and projects only says how many instances are allowed if more than 1 instance is allowed, which is only the case for some spaceship parts. The remaining slots for National Wonders are only shown in help text on the city production buttons, not on the list of completed buildings.		Says e.g. "Wold Wonder: 1 Allowed" or "(National Wonder: 0 Left)".	
Civiliopedia no longer shows whether a building appears for free when starting in a later era.			
Yield bonuses of resources not in city and trade screen.		Always shown, though K-Mod at least makes clear that the bonus applies "on plot" (and not to all connected cities).	
Some abilities that require a tech are not shown in help text when the player's era is more than 1 behind the tech era.		E.g. Workboat: "Can Create Oil Rig" shown in the Ancient era.	
Rationale	tionale This text is at best distracting, at worst misleading.		
Tbd.	Civilopedia should list the free buildings from later-era start along with the description of the later-era start settings.		
See also	004a removes "can be researched by a" from technologies. 002b (larger fonts) makes it a bit more urgent to reduce the amount of help text.		
	Help text for obsolete buildings in the building list No indication in the building list whether a of a city says that it's obsolete.		
Rationale	While I was at it.		
	1		

005	Minor flavor changes	
005a	Leader personality tweaks	
AdvCiv		BtS
MaxWarMinAdjacentLandPercent=2 for Bismarck. While he eventually gave up his reluctance to off-shore colonies, he was never keen on distant parts of Europe (let alone Asia): "The Balkans are not worth the healthy bones of a single Pomeranian grenadier."		Was 0. It's a preference for long-distance land wars, ranging between 0 and 4. 0 means Bismarck treats neighboring civs no different from other civs on the same continent when it comes to war planning.

Also lowered his attitude threshold for defensive pacts to Cautious (realpolitik, Triple Alliance), and increased his weight for diplomatic victory and lowered the one for domination victory. Conversely, gave Brennus higher weight think they actually have a big impact on the game. for domination and lowered weight for diplo.

While I was at it (further minor changes): Shifted Catherine's weights from conquest towards domination and science. Added a bit of science weight to Ramesses, and reduced his conquest weight. Increased Saladin's weight for diplomacy a bit at the expense of conquest and space.

MaxWarDistantPowerRatio=70 for Napoleon. Napoleonic France fought few off-shore wars and even ceded Louisiana to the US.

MaxWarMinAdjacentLandPercent=2 for Charlemagne and Cyrus. Charlemagne extended his borders gradually in all directions; Cyrus conquered several empires that weren't exactly at his doorstep.

MaxWarRand=150 for Willem, i.e. now a bit less willing to Was 100. start "total" wars. In part, because wars of conquest seem out of character for the small Netherlands; in part, because he's doing a bit too well in AdvCiv games in my experience (and more so than other Financial leaders – the overpowered trait is obviously the bigger issue). Also shifted his victory weight a bit from Conquest to Culture and made him a little less interested in dogpile wars.

to 100 and at Cautious to 70, but increased his Build-UnitProb to 25. Decreased NoWarAttitudeProb for Brennus at Cautious to 50 and for Darius at Pleased to 90.

Threshold is at Pleased, like most other leaders.

Victory condition weights have been added by BBAI. I don't

Was 100. A preference for naval war. Napoleon is tied for the highest value, while his MaxWarNearbyPowerRatio (land wars) is only moderate.

Was 1 and 3 respectively.

Increased Roosevelt's NoWarAttitudeProb at Pleased Was 90 at Pleased, 50 at Cautious, 20 BuildUnitProb. Was 70 (Brennus, Cautious) and 100 (Darius, Pleased).

Rationale	(of the Roosevelt change): 90/50 NoWarAttitudeProb is the same as the Mongol leaders or Napoleon. Some peaceful leaders like Mansa Musa and Elizabeth also have it, but along with a low BuildUnitProb. This makes for leaders that are ruthless but powerless. This doesn't fit for Roosevelt at all. He's the leader most representative of the present-day America that doesn't invade partners, but has a big military. Changed Brennus and Darius to keep the overall balance. I don't know if that balance is exactly right, but if anything there are too many leaders that don't normally attack at Pleased.	
Tbd.	May have to lower buildUnitProb for Willem (currently 25%, which isn't really that high). Nerf Financial trait first, and see what difference that makes.	
005b	GP names assigned chronologically	
AdvCiv	BtS	

GP names are assigned in the order they're listed When a GP is born, the name is chosen in Civ4UnitInfo.xml, i.e. roughly ordered by uniformly at random from among the GP with date of birth; no more Ancient Heisenberg. About matching type. Heisenberg is just as likely to be every second name is skipped at random, so that the first Great Scientist as Socrates.

GP names aren't the same in every game.

There is an additional offset when starting in the Medieval era or later, i.e. early names are skipped.

Corrected a few misspelled GP names, e.g. "Frank" Kafka.

Replaced the two Great Generals that also appear as civ leaders with two new ones

(Charlemag	(Charlemagne → Zizka; Boudica → Hai Ba Trung).	
005с	City ruins bear the name of the former city	
in a tile with meaning th	Help text shows the name of the most recent city in a tile with city ruins. Can't pillage city ruins, meaning they can only be removed by building an improvement on top.	
Rationale	For flavor. No pillaging because the name of a destroyed city could have strategic importance (albeit very little), and I wouldn't want players to destroy ruins in order to monopolize information (in multiplayer). Also, one can't really pillage ruins	
005d	Spurious/ misattributed tech quotes corrected or marked as "ascribed to"	
Credits	CFC discussion about Civ6 tech quotes: <u>link;</u> offshoot about BtS: <u>link</u>	

## Disabled some assertions

Disabled assertions that are supposed to be rare and were still under investigation by earlier modders. In some cases, I've tried to resolve these myself, in others I've disabled them because they were interfering with my testing of more immediate issues.

007	Changes to info shown in debug mode	
Few so far.	Few so far. No confirmation needed for entering WorldBuilder if already in debug mode. Red	
circles from	BBAI only shown if Show-Yields view was enabled before entering debug mode. (Can	
also toggle the circles by toggling Show-Yields and entering and leaving a city screen.)		

800	Changes to Civilopedia content and hints	
	I've only changed content that is no longer accurate, and for some Game Concept pages, I left the content alone, and merely added a warning at the top that the info could be outdated.	
I've only ch	anged the English version.	
Config	The modified bits are in a separate file called CIV4GameText_advc.008.xml.	
Tbd.	Not all the strategy advice is up to date. Especially the tech and building advice is a lot of work to maintain, and much of it is redundant. The tech advice is only shown when Sid's Tips are enabled. Would be best to somehow disable these texts completely for anything past the Ancient era; the early-game texts actually do contain some advice.	
008a	Civilopedia changes based on K-Mod gameplay	
d800	Civilopedia changes based on AdvCiv gameplay	
008c	Updated some of the hints that are shown while loading savegames (only English and German)	
008d	New hints about AdvCiv changes and a few K-Mod changes that weren't previously covered. Gave all hints about modded content a higher probability of being shown than the hints from Vanilla and BtS (Warlords didn't add any). Tried to mimic the tone of the original hints.	
Config	Increased the probability by duplicating entries in CIV4Hints.xml. Separate file for the new hints: CIV4GameText_advc.008d.xml.	

Tbd.	Only English and German text so far. Some important changes aren't covered because	
	they're subject to further change.	

009	Setup of configuration files: BUG settings, GlobalDefines, BUG and BBAI help files
See also	002b also deals with file paths
Tbd.	Would like to rename the Mod/AdvCiv/Settings folder (doesn't actually contain important settings), but that's not so easy to do; see the txt file in that folder.
	Would be nice to use the <u>SourceForge URL</u> that BUG tries to access for Mac installations as a fallback when help files aren't found locally. (The local files should be working now though.)

010	Worker stealing disabled		
AdvCiv		BtS	
Settlers and Workers die when attacked; no captured Worker appears.		Settlers and Workers die and the attacker receives a captured Worker. The AI immediately disbands captured units.	
Rationale	Unlike human players, the AI doesn't know how to look for exposed Workers them; nor how to disband Workers that are about to be stolen; nor how to gu Workers on border tiles. If the AI could do these things, it would be largely im to steal Workers from the AI, and players would have to guard their Workers tiles, which would be very tedious. This might be why the original developers abandoned efforts to let the AI steal Workers (CvUnitAI::AI poach is never		
	So, Worker stealing as a game mechanism can only work against an unwitting AI. I do like the slave-raid flavor, but I don't think it's worth putting the AI at a considerable disadvantage. Early disruptive wars remain useful for destroying AI Workers (see Tbd.) and for keeping enemy tiles from being improved – I wouldn't want to make this tactic unviable.		
	Flocks of Workers captured in conquered cities also contribute to Worker under- employment, which tends to slow player turns down.		
	Work stealing also undermines difficulty settings that give the AI a free Worker (such as the added <u>King</u> difficulty).		
The <u>DDiplo</u> changes would make Worker stealing ever BtS.		Vorker stealing even more attractive than it is in	
Config	Purely an XML change; can re-enable Worker stealing by restoring three values in Civ4UnitInfos.xml (look for advc.010).		
Tbd.	Can still attack Workers on border tiles just to cripple the AI. Eventually, DoW should only take effect at the end of turn. This will give an attacked AI (or human) civ one turn to move any exposed units to safety.		
	barb city on a landmass, surviving	all for attacking civilians. E.g. after taking the only barb Workers will just sit there, and there's now no enable Worker stealing once delayed DoW is	

011	Decay of invested Worker turns	
AdvCiv		BtS
Once per round, when no progress has been made on any of a plot's unfinished Worker builds for the fifth turn in a row, the number of invested Worker turns is reduced by one for all unfinished builds in that plot.		No decay of invested Worker turns.
Rationale BtS allows for some very fiddly micro-optimization, especially pre-e.g. pre-building of Forts to protect strategic resources.		· · · · · · · · · · · · · · · · · · ·
	I don't want players to worry about leaving an improvement unfinished for some turns, e.g. until a barbarian unit has been dealt with, but I want decay to be fast enough to make pre-chopping an irrelevant tactic. This balance is a bit difficult to get right.	
Config	Can be adjusted or disabled through DELAY_UNTIL_BUILD_DECAY in GlobalDefines_advc	
Tbd.	Pre-build actions would still be nice to have, if only for any players who disable the decay mechanism. Ideally for any Worker build by holding down the Ctrl key.	

012	Forest/Jungle defense reduced	
AdvCiv		BtS
Forest and Jungle provide no defense if the attacker owns the attacked tile, otherwise 25% defense.		50% regardless of ownership.
(Feature attack/defense bonuses from unit abilities or Woodsman promotion still apply regardless of tile ownership.)		
Rationale	Some players complain that removing Forests in the inner ring of a city is a no-braine because the defense bonus for invading armies is too dangerous. I think, even with my change, it's usually correct to chop inner-ring Forests because they provide the highest production boost. Well, this still leaves 12 potentially forested tiles in the outering to agonize about.	
	I'm more bothered by the implausibly high defense bonus from Forest and Jungle, which leads to gameplay problems too, such as barbarians refusing to attack fortified units. Forested chokepoints are difficult to handle for the AI.	
	It makes some sense that units can defend well in forests (forests offer material for palisades etc.), and it makes sense that the civ that knows its way around in a fores (i.e. the tile owner) has an advantage; I'm assuming that these two factors cancel or	
Tbd.	The Woodsman promotions should Jungle. Currently, only Woodsman I	provide a (net) attack bonus against Forest and II does.

014	Capitulated vassals don't pursue victory strategies	
AdvCiv		BtS
Capitulated vassals can't be elected AP or UN A vassal votes for its master unless the vas leader, and can't be on the ticket for diplo victory. itself stands to be elected; no restriction on		A vassal votes for its master unless the vassal itself stands to be elected; no restriction on that.
Rationale	When even a capitulated vassal has more votes than the master civ's biggest rival,	

	then the game is decided, and the notice of its minions. And of course a capit	naster civ should win a diplo victory with the votes ulated vassal shouldn't win.
AdvCiv		BBAI/BtS
strategies, o	vassals don't pursue victory don't build team projects and don't ers of the world except Shrines.	Capitulated vassals pursue victory strategies and can actually win the game.
Rationale	Internet and Manhattan are things that the master may not want the vassal to build; SDI is covered by the master (change <u>143b</u> ); the other projects are for space victory. Capitulated vassal shouldn't build wonders that the master might want to build. Especially not UN, AP or Space Elevator, but it's simpler to just block them all.	
See also	130v about capitulated vassals generally behaving like zombies.  112 about voluntary vassals breaking free when approaching victory.  143b scraps nukes upon capitulation.	

015	Changes to Great People	
Tbd.	Will probably allow Priest and Artist to hurry certain wonders; move culture bomb to Spy.	
015a	Changes to tech flavor values	
AdvCiv	BtS	
•	No production flavor for Constitution. I.e. can't be discovered by a Great Engineer.  3 production flavor, 4 gold, 2 culture, 2 growth. Thus a tech that Great Engineers can (and may have to) discover.	
Rationale	Engineers inventing constitutions is too far a stretch for me.	
Tbd.	Fascism is also dubious (6 production flavor).	

016	Extra tile yields from random events not added to city tile yields	
AdvCiv		BtS
events are added to the natural tile yield before raising the yields to at least 2 food, 1 production, 1 commerce.		City tile yield is computed as the yield from terrain, hill, unimproved bonus and river, all assuming that features (incl. Flood Plains) are removed. The result is raised to at least 2 food, 1 production, 1 commerce. Finally, extra yields from random events and yield bonuses from Golden Age are added.
Rationale	Should be treated like all the other yield effects; counterintuitive in BtS.	
Credit	Pointed out <u>here</u> on CFC by traius.	
Tbd.	Considering to change the city tile yield formula so that bonuses are applied after the raise step.	
See also	004b shows the city tile yield before founding	

017	Al trains fewer units when its military is already very large and drafts less in general
AdvCiv	BtS

reduced based on the military power of the strongest potential opponent.		The military power of other civs affects the number of trained units only indirectly through the "Area AI type"; generally keeps building units so long as the maintenance is affordable.
Rationale	Better to develop the economy more than to train excessive armies. Al stacks of can also get too disheartening if the human player is behind when Drafting and R become available.	
	he base probability to train a military centage points overall.	The probability is effectively 6 higher than set (per Al leader) in XML because the experience
specific train number of ci	oper and lower bound for the city- -unit probability based on the ties: The AI only gets to use very probabilities when it has about five	from Barracks is doubled and added in.
Rationale	The average probability to train a un much in a situation where there is no	it was about one in three, which seems a bit o war on the horizon.
AdvCiv		K-Mod
Don't draft away more than a third of a city's population unless defenders are urgently needed. (K-Mod has the same condition, but doesn't apply it to Rifleman.) Don't draft at all when there is neither a war plan, nor a reason to reduce population.		Draft as many units as allowed except when there are angry citizens or upkeep gets too costly (that's a high ceiling). Stricter rules when drafting sth. other than Riflemen.
When it's not urgent, only draft with a per-turn probability equal to the normal buildUnitProb.		No randomness in drafting.
Reduced AI utility value for Nationhood civic when already paying high unit upkeep.		Utility is only reduced when maxUnitSpending is exceeded.
Rationale The K-Mod behavior leads to huge AI stacks once/ if the AI hits Rifling and switch Nationhood. If the player can stay out of harm's way through diplomacy, it becomes too easy to overtake the AI economically. One third of the population is still a lot		ut of harm's way through diplomacy, it becomes
Drafting without planning war is generally a bad idea; can draft units pretty que once they're needed. Probably shouldn't adopt the Nationhood civic without weither. The change to civic evaluation may help with that. Don't want to make plans a hard requirement for Nationhood though – that would give away the A intentions.		ldn't adopt the Nationhood civic without war plans n may help with that. Don't want to make war
The probability should make AI drafting less abrupt, and reduce it a bit overa		ing less abrupt, and reduce it a bit overall.
Tbd.	buildUnitProb should be taken into account in a more meaningful way: currently mostly slows AI drafting down. However, need to change the drafting rules before putting effort into the AI; drafting is too efficient currently.	
assault is ad	umber of warships to escort a naval justed based on the number of s owned by the enemy and the game	Only the number of escorted transport ships matters, and if they can defend themselves (Galleons).
Potential bug fixed in BBAI code that may have lead to large AI fleets when only a "minimal attack force" had been intended.		

Rationale	No need for an expensive escort if the enemy has very few ships. Can't be sure of that, but the number of coastal cities should be a pretty good predictor (and don't want to just count enemy ships that the AI can't see).	
Tbd.	Should check if the enemy can even train any dangerous ship; no need to protect (Industrial-era) Transports if the enemy ships are Frigates.	
	Once that's implemented, should probably use relativeNavyPower if UWAI is enabled.	
See also	905 buffs Trireme and stops the AI from using (and training) Caravels as escorts. Not sure if this has lead to fewer or more AI ships.	

017b	Dynamic changes of unit AI type	
AdvCiv		BtS
attackers (UNITAI_ATTACK_SEA) can turn into explorers (UNITAI_EXPLORE_SEA) if there is nothing to attack and there are too few explorers.  Lowered the priority of guarding seafood when in UNITAI_RESERVE_SEA.  Relaxed conditions for changing from		Land units can turn into (land) explorers, and there is a narrow rule that can turn a Galley into an explorer after transporting a Settler; but Caravels can only act as explorers if they've been trained for that purpose. Explorers can adopt various other roles if exploration isn't needed anymore.
_	CLER_SEA tO UNITAI_ASSAULT_SEA.	
Rationale	Should lead to fewer Caravels; that's	s why I'm grouping this with change 017.
Tbd.	There are probably other sensible AI type changes that the BtS code doesn't consider A comment by the Vanilla developers also suggests this: "move some of this into a function? maybe useful elsewhere".	

018	Impact of Crush AI strategy reduced	
AdvCiv		K-Mod
The "Crush" strategy no longer causes the AI to train more units overall, and doesn't shift its yield focus to production. On the contrary, the AI trains slightly fewer units with Crush.		Crush makes the AI prioritize production. It also (no change in AdvCiv) lets the AI mobilize some of its defensive units as invaders, and trains more city attackers instead of defenders.
The AI doesn't adopt the Crush strategy until it's clear that the enemy doesn't pose much of a threat.		At least with Aggressive AI enabled, some AI leaders adopt Crush in any "total" war that isn't going badly.
		The Crush strategy has been introduced by BBAI.
	In K-Mod, Crush seems to be used in situations where the AI might be able to win a decisive victory by concentrating all its resources on the war. This leads the AI to go all-in more often than I'd like. The AI can easily end up training far more units than would be needed in these all-out wars, which sets it on a road towards a military victory. The AI goes for military victories too often in K-Mod.	
	Now the AI should use Crush only to anyway.	bring war to a quick conclusion when it's winning
See also	115 and 104c also make the AI less	willing to go for a military victory.

019	Less impact of Aggressive AI mode (AAI) in BBAI/K-Mod code	
AdvCiv		K-Mod
Only minor impact of AAI in some of the BBAI and K-Mod code.		Especially K-Mod behavior depends on AAI in many places.
Rationale	For experienced players, I think there is a happy medium between aggressive and non-aggressive AI, and really no need for two modes. Even for inexperienced players, it would be better to tie AI aggressiveness to the difficulty setting instead of a separate game option. (To be fair, BtS does that too: iAIDeclareWarProb is based on difficulty.)	
In the original Civ 4 code, the non-AAI behavior is very passive, especially on the and medium difficulty settings; this has been a recurrent player complaint even after the Civ 4 release. Therefore, I haven't reduced the impact of Aggressive Al original code.		has been a recurrent player complaint even right
See also	AAI can only be disabled through X on malicious espionage.	ML; see chapter on <u>UWAI</u> . <u>120b</u> : No impact of AAI

O20 Changes to AI flavor values	
AdvCiv	BtS/Warlords
maintenance; reduced on buildings that increase city defense. Gold flavor no longer associated with government center (reduced distance maintenance) and reduced on Courthouse. Gold flavor of corporate HQ reduced. Culture flavor added to modern entertainment wonders (Hollywood, Rock'n'RRoll, Broadway) and Growth flavor reduced. Culture flavor also on Temples and Cathedrals (in addition to Religion), and to some misc. wonders. Growth flavor added to some happiness buildings (Colosseum, Market, Broadcast Tower) and National Epic. Added Religion flavor to Apostolic Palace (how was that missing?).	technologies) that match those values.  Military flavor is on buildings that increase city defense, grant free XP, increase unit production or reduce war weariness. Gold flavor for extra trade routes, increased gold rate or reduced maintenance. Culture for some of the buildings that generate culture (Monument, Stonehenge, Theater, National Epic, Hermitage, Sistine Changl, Fiffel Tower). Growth on buildings that
Espionage flavor removed from West Point, Pentagon and Forbidden Palace. Instead, Al governors consider flavor when evaluating Great Person points.	
Military leaders don't usually want to get on the defensive and, therefore, shouldn't build Walls and Castles. I'm not removing the military flavor entirely because warlike leaders are also prone to counterattacks, and, (pre-)historically, militaristic cultures tended to build fortifications. Note that Protective leaders are still more inclined to build defensive buildings because of the production discount from the Protective trait; many of the Protective leaders have Military flavor.	

	Reduced maintenance leads to a high science rate, which conflicts with buildings like Market that increase gold output. The Gold flavor does give some incentives for growing wide (trade route bonuses), but I still think it's more important not to have the same flavor on Courthouse and Market. The next best choice seems Military; militaristic leaders tend to conquer wide empires.
	Corporations aren't there for generating gold. The HQs pair well with +gold buildings, but Gold-flavored leaders try to build Markets everywhere, not just in the HQ cities.
	The missing Culture flavor on Hollywood etc. seems like an omission. While Cathedrals are more of a religious thing, they're so instrumental to the Culture victory that they should also have Culture flavor.
	If growth is supposed to support tall cities, it needs an even mix of health and happiness.
Tbd.	The Trade Mission ability of the Great Merchant also clashes with the plus-gold-rate buildings.
	Considering to give Great Artist and Prophets a hurry-production ability for (small and great) wonders that either generate GrAr/ GrPr points or have Culture/ Religion flavor.

021	Adjusted map scripts with simulated	tectonics; see also chapter <u>PerfectMongoose</u> .
See also	Since these map scripts frequently produce mountain chains and large areas of uniform terrain, the improved AI handling of areas separated by Peaks ( <u>030</u> ) and the reduced probability of large resource lumps ( <u>129</u> ) are especially relevant.	
	Also tend to generate oblong contine selection of starting areas in such ca	ents near the poles, and <u>027</u> improves the ases.
021a	Tectonics

Uses the late Tectonics ma	,	Uses version 3.15.
	nore rivers. [] Terra option now oking Arabia instead of some and islands."	
Plains. The invery minor; regrassland and Pangaea magaes of the Grassland Juthere would	All map scripts are allowed to place Jungle on Plains. The impact on most map scripts seems very minor; most tiles at the equator are Grassland anyway. A sample (non-Tectonics) Pangaea map had only 8 Plains Jungles and 40 Grassland Jungles. (Not sure if that means that there would have been 8 fewer Jungle tiles without my change.)	
Credits	It's <u>LDiCesare</u> 's map script. It was included in BtS patch 3.17, and he updated it once more after that.	
Config	The Jungle-on-Plains change is done in XML (Civ4FeatureInfos.xml).	
AdvCiv		Tectonics 3.16
Tectonics landmass type options "Earthlike" 80%, Only 70% and 60% 70% and 60%		

	e number of rivers for all landmass a bit more for Pangaea.	Was supposed to be reduced (perhaps to the level of v3.15) only for Pangaea, but due to an apparent bug affected (only) 60% water instead.
Rationale	Corresponding to High, Medium and Low sea level. My 80% option actually does the same as the 70% option in the original script, the new 70% corresponds to the old 60%, and the new 60% is a new setting. I've noticed that far less land is generated than the old percentages said. My percentages are still too high. Actually, the ratios vary a lot. The new 60% option sometimes does lead to 40% land, but other times jus 23%	
		e.g. Fractal; I didn't like that. Not sure if Pangaea ns to receive fewer rivers in any case (albeit ler continents).
Tbd.	Make the script produce reasonable land ratios reliably. Should be the same as Fractal; see the frequencies stated under 021b. I probably won't ever do this because the PerfectMongoose script obsoletes Tectonics in my mind.	
Credits	4Dingo4 and LDiCesare have sugge	ested formulas for the 50% setting <u>here</u> .
021b	PerfectMongoose (PM)

AdvCiv		PM 3.2
terrain and various size match those Fractal freq approximate 1% peak, 5 tundra, 8%	red the relative frequencies of all feature types for Fractal maps of es, and tried to get PM to somewhat e frequencies. For reference, the uencies at Low sea level are ely 28.5% land, 7% forest, 2% jungle, % hill. 6% river, 3% desert, 3% plains, 12% grassland. Only 20% lium sea level, 15% at High.	The land ratio is really hard to predict; depends not just on sea level, but also on map size. Assuming a land ratio of 28.5%, forest typically covers about 10% of all tiles; 2% jungle, 3% peak, 9% hill, 5% river, 4% desert, 5% tundra, 7% plains and 7% grassland.
The frequencies I've ended up with are closer to 30% land ratio (Low), 24% (Medium), 18% (High), with some +/- 3 percentage points (luctuation, and Low sea level sometimes produces as little as 22% land. There are also some more hills than on Fractal, and more plains, ess grassland and more rivers, but shorter ones.		
	e larger grid except for Large and , which are just about 15% larger l now.	A larger tile grid is used for all map sizes, leading to about 40% more tiles.
Rationale	One goal was to let players set the same number of players that they use for most other maps. Although PM now produces more land than Fractal (higher land ratios and larger grid), the number of decent city spots seems to be about the same, and that's what matters in the end. The main reasons why PM produces more marginal or unusable terrain seem to be the large stretches of plains, clusters of hills and terrain generally being less mixed. I wouldn't know how to change that, and I rather like it.	

For one, it gives the various regions of the map more character. Marginal terrain can also present a third choice between stopping to expand and waging war; and it's a historically plausible source of barbarians. That's why I've kept a slightly higher ratio of plains and hills. don't see realistic terrain proportions as an important objective. E.g. if there isn't quite as much desert as in reality, one can simply assume that a Desert tile represents a larger area than, say, a Grassland tile (i.e. not a scale model), or that some arid regions of the Earth are represented as Plains or Tundra in the game. Tbd. The variance of the land ratio bothers me, but I don't want to apply some crude fix like aiming at a high land ratio and then removing terrain at random (say, through the meteor mechanism). For what it's worth, the Tectonics script has even higher variance (far worse even). It would be nice if rivers were a bit longer on average. Peaks appear only along coasts on map sizes smaller than Large. I guess this is because peaks are only placed at the boundaries of tectonic plates, and continents consisting of more than one plate occur only on sufficiently large maps. So I suppose the size of the plates doesn't scale properly with the map size. (The Tectonics script seems to get this right.) Or just turn some inland hills into peaks at random ... Jungle only on grassland. Jungle is less dense Jungle can occur on plains, but is much more common on grassland. than on other maps, but extends a bit farther north and south. Oases only on tiles entirely surrounded by Oases don't have to be surrounded by desert; a few adjacent non-desert tiles are OK. No cold desert. Sometimes large deserts are placed right deserts near the poles. next to tundra. Rationale Jungle on plains makes jungles a bit less scattered. (PM places a mix of plains and grassland in the tropical latitudes.) Oases that are totally surrounded by desert are rarely useful. Reduced the amount of land near the poles. Often generates an Antarctica-like continent that connects temperate continents. Limit the scope of the map to 80° latitude. Up to 90° latitude (same as most maps), but configurable in the script. Such a land bridge is unrealistic (armies can't traverse a polar desert), and wouldn't Rationale play well either: Diminishes the importance of ships, and long attack paths are difficult for the AI. Limiting the scope seems like an elegant way to reduce the extent of uninhabitable areas (tundra and snow) without sacrificing realism. For reference, the Arctic Circle (on PM and in reality) is at about 66° latitude. The balancing ("normalization") of the tiles near All the standard normalization functions are starting plots is handled almost entirely by the disabled and replaced with custom code that DLL functions that most other map scripts use for seems very reluctant to make any changes: No normalization. I've kept the PM code that ensures rivers or lakes are added, no bad terrain (tundra) at least 2 hills. converted, jungles and peaks only removed when they occur in large numbers. The starting plots themselves are only chosen by Starting plots are always chosen based on PM if the Old World Start map option is set. custom code with strange yield weights (that Otherwise, the standard method based on AI appear to value commerce more than food). found value is used. 	CvMapGenerator).  CvMapGenerator).  Custom code for resource placement. Seems to be largely the same as in CvMapGenerator. I guess cephalo wanted to make some changes without changing files other than the map script		
Rationale	onale I want my own changes (129) in CvMapGenerator to apply. Also, for whatever reason, the PM code creates large clusters of resources. I've seen e.g. a 2x3 rectangle filled with Ivory on a Small map.		
system remo	Map options for land generator and climate system removed. Always use the defaults: PW3 Accurate)", "PW3 Generator (Hex Grid - Accurate)", "PW3 Generator (Hex Grid - Interesting)" and "PW2 Generator" for landmass generation; and "PW3 Climate System" and "PW2 Climate System" for climate.		
Rationale	I don't see much reason to use the old PW2 code, and it would've been a lot of work to adjust the land, feature and terrain ratios for PW2. As for the "accurate" versus "interesting" choice – how is a player supposed to decide this? I just went with "accurate" because that code was newer and it was the default setting.		
Config	Not hard to bring the options back b	y editing PerfectMongoose.py.	
if and only if The limit for the map size	'Break Pangaea" map option removed. Enabled f and only if the Old World Start option is set.  The limit for the number of meteors is based on the map size.  If the Break Pangaea option is enabled (which it is by default), the script checks in the end if there is a single continent containing more than 70% of the land tiles; if so, circular groups of land tiles are removed (explained as meteor strikes) until all continents have at most 70% of the (remaining) land tiles. The number of meteors is limited to 15.		
Rationale	I don't like the meteor mechanism: Often, numerous meteors are necessary in order to break up the land, and the map ends up looking like a plucked goose and having too little land. And, of course, real meteor strikes left much smaller craters and didn't significantly affect coastlines.		
Tbd.	A better solution would be identify and remove isthmuses, or maybe to keep moving the plates until there are multiple continents. One could even just show a message "failed to generate multiple continents; please regenerate the map".

022	Changes to AI paranoia	
See also	107 also deals with the Al's defensive strategies 109 sets Economy Focus when no threatening civ is known 130u treats human civs as Cautious toward everyone	
Tbd.	I've considered basing paranoia on enemy war utility (if <u>UWAI</u> is enabled), but, so far, the K-Mod code seems to work well enough alongside UWAI (if it never correctly anticipated UWAI attacks, that would be bad).	
AdvCiv		K-Mod/ BBAI
attitude and versa. Huma moderately	personality of rivals civs, not vice an rivals are assumed to be bellicose with an adjustment based	Paranoia is computed as a function of vicinity, power ratio, our attitude and personality, their victory strategies and whether we're their worst enemy.
Made a similar change in the computation of CityThreat (non-immediate military threat		Paranoia determines if the BBAI strategies "Economy Focus" (low paranoia) or "Alert1" and "Alert2" (high paranoia) are adopted (neither if medium paranoia)
		Paranoia is greatly increased if a rival is at stage 3 of Domination or Conquest victory.
Some other, minor changes.		
Rationale		function says, "For good strategy, this should nours. But perhaps for role-play it is better the
	For <code>cityThreat</code> , I think both arguments have merit, so I'm averaging the attitudes in this case. As for paranoia, producing additional defensive units against a benevolent rival makes little sense roleplay-wise, and can be quite damaging for the AI, therefore only use the neighbor's attitude in that case.	
See also	107 changes the computation of clos	seness between civs.
	aranoia if the threatening civ is so at resistance is likely futile.	The more powerful they are, the more paranoid we get.
Rationale	"Things without all remedy should be	e without regard."

023	Occupation countdown based on revolt probability	
AdvCiv		BtS/ K-Mod
The occupation timer (after conquest or a revolt) is decremented only with a per-turn probability equal to the tenth power of 1 minus the revolt probability.		The occupation timer is decreased by 1 each turn.
is set to the minimum of 3 and the population		Occupation after conquest last for 3 turns plus 50% of the population size, e.g. 13 turns in a size-20 city.
A revolt sets the timer to 2 plus the number of prior revolts. Typically slow to decrease because of the revolt probability that causes the revolt.		Also 2 in BtS and in K-Mod 1.45 (but 3 in earlier K-Mod versions).
	nits have their culture garrison duced proportional to the damage.	Unlike combat strength, garrison strength is unaffected by damage.
per-turn cha	ality bar on the city screen shows the ance to decrease the occupation	
timer. Extra AI def	fenders in cities that might revolt.	No code for this at all. The AI tends to put units in border cities though, against external threats.
Rationale	BtS occupation times get too long in Renaissance; one reason why it's difficult to catch up at that point. 10 turns is a very long time when the game may last just 10 more turns, and the city may still have to spend some 20 turns on essential building before it starts paying off.	
	that conquer only one or a few cities make occupation end quickly. Gene the game progresses – mature cities turns is often just the time that units	on the revolt probability, I hope to reward players at a time and can then afford to sit in them to rally, occupation durations should still increase as stend to have high revolt probabilities. Now, 3 need for healing anyway, so this would hardly the reduced garrison strength of damaged units.
	I'm not showing a message when ar become too much when occupying s	n occupation counter is decremented; could several conquered cities.
	Since revolts no longer occur only in	n border cities, the AI had to be adjusted.
Config	The conversion of revolt probability into the probability of decrementing occupation can be tweaked in GlobalDefines_advc.xml. Can also restore the BtS rules there (longer but deterministic occupation).	
See also	101 reverts the K-Mod changes to revolt probability.  099c makes revolts more common by allowing them to happen outside of foreign culture range. 023 wouldn't make much sense without 099c.  210b displays an alert when occupation ends.	
Revolts can't happen in occupied cities (conquest or prior revolt) if the city owner is at war with the cultural owner. If they're not at war, a revolt in occupation is possible, but mitigated by the following special rules:		tNo revolts during occupation.
	It test is only executed if the nt-timer test has failed.	
	obability is halved while in occupation luring occupation does not increase	

the occupation timer; it does increases the revolt counter and can flip the city.		
Being at war does not increase culture garrison strength.		Culture garrison strength doubled while at war.
Rationale	ionale If revolts were impossible during occupation, a player could withdraw all units to deliberately prolong occupation, which makes the city worthless for the current over but also to the cultural owner (can't flip).	
		ould be too punishing though. The halved s of garrison strength when units are damaged as
	I don't like having complicated specia see a better solution.	al rules for revolt during occupation, but I don't

024	Order in which AI contacts other AI	randomized
AdvCiv		BtS
When contacting other AI civs for trades, the AI goes through them in a randomized order.		Fixed order based on the player slot id.
Rationale	Some deals aren't mutually exclusive, but the AI can e.g. give away a resource only once, and may only have enough gold to convince one civ of a joint war. The fixed order leads to a slight bias for trading with AI civs with low ids.	

025	Reduced culture spread by capitulat	ed vassal onto master's tiles
AdvCiv		K-Mod
The tile culture spread by a city onto a tile is halved if the city owner is a capitulated vassal of the tile owner.		Capitulated vassals spread their culture normally.
Rationale	Even if cities can't flip to vassals (change <u>099c</u> ), the revolt-inciting culture spread is still a good reason not to accept capitulations. It's OK if capitulation isn't always the correct choice, and perhaps this is an interesting dilemma, but capitulation should be correct more often than not, and 099c makes it much harder overall to keep revolts in check.	
Config	Through GlobalDefines_advc.xml	
See also	130v neuters capitulated vassals in several ways	

026	More gold offered in Al-proposed deals		
AdvCiv		K-Mod	
trade offer, deals, the A than norma	when trying balance both sides of the	The AI can offer deals that are slightly more favorable to the player, but the portion of the AI treasury offered for trade isn't increased.	
Rationale	The aim of the K-Mod change was to make it "worth considering the deal the AI offers [] rather than going straight to the renegotiate button" (from the K-Mod 1.07 changelog). But a worthwhile offer still seemed very rare, so, while worth considering, it didn't exactly hurt to never consider AI proposals.		
Config	AI_OFFER_EXTRA_GOLD_PERCENT in GlobalDefines-advc.xml		
Tbd.	A general problem with any one-time offers: If the player can't just click "renegotiate", then the player doesn't know what else the AI might have. Encourages the player to routinely enter the Foreign Advisor during diplo. The only fix I can think of (other than removing the one-time offers) is to have the AI remember its initial offer. Then, if the deal is renegotiated, that offer remains available through "what would make this deal work": If the player offers to give the AI what it had originally asked for (or that and sth. in addition), or asks for what the AI had originally offered (or a subset of it), the AI suggests the original offer unless it finds an even better one. This way, the player would again always renegotiate, but would still take a look at the original offer in order to possibly get back to it.		
	For now, I've added a loading screen hint about opening the Advisors during diplo.  Another way to make one-time offers more attractive: Increase the trade value counted for "fair and fortright" trade if an AI offer is accepted without renegotiation (but don't increase the trade value for trade with worst enemy).		

027	Changes to the selection of starting plots	
AdvCiv		BtS
continent, count only those rivers and coastal tiles that aren't peaks, tundra, snow or dry desert. Take the land tile count times 0.5. Add 1.5 times the number of bonus resources.  map script (and most map scripts don't), the starting continent is chosen for each player computes a score for each continent and the one with the highest score. Part of the formula is the number of river edges, the soft coastal land tiles (to account for the was surrounding the continent) and the total land.		When starting locations are not determined by the map script (and most map scripts don't), then a starting continent is chosen for each player by CvPlayer::findStartingArea. That function computes a score for each continent and selects the one with the highest score. Part of the score formula is the number of river edges, the number of coastal land tiles (to account for the water surrounding the continent) and the total land tile count. Bonus resources don't count directly, but the total of all tile yields does.
Rationale	Too many civs had been placed on continents near the poles.	
Tbd.	Would be better to evaluate the surrounding water directly (than to count coastal land tiles); should be pretty easy to do through the Shelf class that I've added in change 300.  Should perhaps sometimes, at random, leave a small-ish continent empty. This would make Fractal a bit more unpredictable (a good thing in my mind), but could lead to	
	crammed starting locations.	
See also	108 is concerned with the normalization of starting plots (after they've been selected).	
If cheats are enabled, Shift+Ctrl+mouseover on a Various combinations of Ctrl, Shift and Alt reveal land tiles without any units shows a breakdown of various internals for development purposes. the starting area score.		
Rationale	l've used this to figure out where the assignment of starting areas goes wrong, and left it in the code for future adjustments.	

028	Submarines as escorts	
AdvCiv		BtS
When a stack with invisible and visible units is attacked, the attacking player sees combat odds against the best visible defender, but an invisible unit may replace that defender once the attack is ordered, i.e. if the invisible unit is the better defender (considering unit cost and combat odds).		,
Invisible units don't defend if all the team's units in the tile are invisible (same in BtS), i.e. an attacker can't stumble upon an invisible stack, and invisible units don't defend units of other teams.		
Rationale	Not plausible for a Submarine to sit by while e.g. a fully loaded Transport gets attacked by another Sub. The new behavior makes Subs worse in situations when the defenders are outnumbered by modern ships, e.g. a Transport (or just a Workboat) and a Sub against four Battleships. That said, players can easily prevent this by not stacking Subs with visible units. All in all, the change should make Subs (and Stealth Destroyers) a bit more useful.	

029	Changes to recon missions	
AdvCiv		BtS
unit's owner, or until the unit carries out another		Visibility ends on the <i>start</i> of the owner's subsequent turn. If the options for showing foreign moves are enabled, the player still sees all foreign moves before the fog of war returns.
		Auto recon and queued recon missions are barely usable because tiles are only visible from the end of one turn to the start of the next.
	During the owner's turn, nothing happens in the fog of war, so there isn't much of a point in hiding the tiles at the start of a turn. (It can make a difference for air strikes.) The advantage of my change is that players no longer need to remember which units had been visible, and it makes it easier to automate recon.	
	Would still be nice the have a "Recon until canceled" mission that repeats recon on the same tile every turn (akin to the Blockade mission; on that note "Blockade for one turn" would be nice to have too). OrionVeteran had started to implement something like this, but didn't finish it.	
	I'd like to nerf recon a bit by allowing units on recon to be intercepted, ideally even when not at war (and no OB). And reduce the number of revealed tiles (-2 radius), especially for non-recon air missions (-3 radius).	

030	Peaks can separate areas	
AdvCiv		BtS
When one or several peaks make parts of a landmass unreachable by land, that secluded part is treated as separate land area.		Only water can separate land areas.
Rationale	Should make things easier for the Al. The Al still has to be able to handle dynamic obstacles because of closed borders, and it can (but not that well).	
Config	PASSABLE_AREAS flag in GlobalDefines_advc.	
Tbd.	Could additionally compute landmasses as in BtS, and base the rules for colonies an single-continent wonders on these landmasses; this way, players wouldn't have to adjust to the change.	
	Shelf ice separating sea areas: Some of the (original) code currently relies on units being unable to go from one area to another (e.g. <code>cvPlayerAI::AI_isPlotThreatenet</code> Would have to track these code lines down to make submarines work. Other than that, simple: Just call <code>isImpassable</code> instead of <code>isPeak</code> . Could also limit the (step) diameter of water areas (by limiting the search depth of the <code>calculateAreas_visit</code> function), which might help the AI when the geography resembles the American continent (minus the Panama Canal).	

031	Changes to AI found value		
AdvCiv	,	K-Mod	
- · · · · · · · · · · · · · · · · · · ·		Plots without any nearby bonus resource are disregarded.	
Settling one off the coast not completely ruled out.		I've never seen the AI settle one tile off the coast.	
Reduced the impact of distance from capital based on era.		Strong and uncapped impact of distance in all eras, making the AI highly reluctant to settle the New World on Terra.	
Rationale	A river (or oasis) without resources is rare, but can be worth settling on (esp. with Flood Plains).		
	About the impact of distance: Need to be careful not to revive the AI habit of planting colonies on a far edge of foreign territory. I think that used to happen in Vanilla Civ 4 and in Civ 3.		
Tbd.	I've seen the AI settle on top of Gold resources semi-regularly. The K-Mod code to discourage this looks correct though (subtracts the improvement yield). Perhaps some more fundamental problem with weighing a single very good tile against several mediocre ones.		
See also	also 108 makes changes to the found value of the initial city (which is important for starti plot normalization).  040 assigns a found value to unrevealed tiles.		

032	Signing a peace treaty when there already is one causes turns-to-cancel to be reset	
AdvCiv		K-Mod
When a peace treaty is signed between two civs that already have a peace treaty, then the turnsto-cancel are reset to 10 turns. This can happen through a diplo vote or sponsored war (due to change 146). I don't think gifts and demands are possible when there is already a peace treaty.		already a peace treaty.
	More intuitive this way. Otherwise, e.g. the target of a peace proposal could get attacked just one turn after the vote.	

< 040	Still unassigned	
-------	------------------	--

040	Al improvements for settling other continents	
AdvCiv	1	K-Mod
counts unrevealed tiles in the city radius as		Unrevealed tiles don't add anything to found values. This makes the AI very reluctant to settle a continent that it has only explored from the sea.
Rationale	Could instead try to improve AI exploration. Not so easy; how can the AI tell that a continent is large enough for land exploration (without circumnavigating it first)? Should Caravels be routinely accompanied by a Scout/ Explorer?	
Tbd.	Would like a multi-stage "Colonization" strategy akin to the victory strategies (on Terra, colonization is sort of a path to victory). Stage 1: If expecting an unclaimed continent, get Sailing, Optics, Astronomy, prioritize sea exploration. Stage 2: If an empty continent is found, prioritize Settlers, Workers (if scarce), transportation, land exploration(!); seek peace on the home continent. 3: If several cities founded, ship over some military, and make economy (Courthouses!) the focus in the new cities. 4: If the new cities can stand on their own, consider measures to reduce maintenance: civics, move capital, create colony.	
	But also need to make it more worthwhile to found cities in Renaissance and Industria era. Probably make early-game buildings cheaper to build (also: to rebuild after conquest) as the game progresses.  Would also like a Columbian Exchange mechanism that reveals resources in the Old World once a copy is obtained from the New World.	
See also	300: Barbarian placement on continents without civilizations. 905 gives ships better stats (cost, speed, cargo capacity). 031 reduces the impact of distance on found value.	

041	Can train ships in any coastal cities	
AdvCiv		BtS
lake can train ships and construct a Dry Dock. The AI ignores this change, i.e. builds ships/ Dry Dock only in cities at a size-20 water body.		Can train ships and construct Dry Dock only in cities adjacent to a water area of at least 20 tiles.  Other coastal buildings require only 10 water tiles, which is also the threshold for a salt water lake.
Rationale	can act as canals into larger water a	n naval units in small water areas because Forts areas. Implausible that this should not be allowed. If canals, it had better stick to the old rules though.
	This change also eliminates the confusion about two different area size thresholds (10 for buildings, 20 for units). Cities are now either proper coastal cities, or only (fresh water) lake-side cities.	
	Don't want to allow shipbuilding at lakes because it's confusing to see ships on the city screen of some inland city with a 1-tile lake.	
Tbd. By allowing Lighthouse in lake-side cities, I could remove the awkward founding in tiles that are both coastal and lake-side.		
	But I'd rather treat Lake tiles as being a terrain different from Coast, and thus unaffected by Lighthouse (and Colossus, Moai); then give Lake +1 food, -1 commerce from the start (i.e. like Oasis but 1 less commerce).	

042	BUG's City Cycle Arrows removed	
AdvCiv		K-Mod
Disabled "City Cycle Arrows" in BUG; can't enable them from the BUG menu either.  City cycling from the City screen still works.		City Cycle Arrows enabled by default. When an arrow is clicked, the camera centers on the nearest city; if already centered at a city, centers on the next one. Perhaps there is also a BtS keyboard shortcut with the same functionality; this would also be disabled in AdvCiv.
Rationale	clicked on one and the game crash	noticing them for years; now I've accidentally ed. Doesn't crash in K-Mod, so this is an issue I to fix this, so this option will have to be removed
	Clicking on an arrow leads to a call to <code>selectLookAtCity</code> in <code>CvDLLIFaceBase</code> , which always produces a "Procedure not found" exception inside the EXE. This is typically caused by changes to the signatures of exported DLL functions. I've restored some signatures that I had previously changed; can't find any others that might cause the crash. Can't easily rewrite the <code>selectLookAtCity</code> function either.	

043	Dan Quayle scale adjusted	
AdvCiv		BtS
For a "Julius Caesar" victory, a normalized score of at least 100 000 is needed; the next best victory is at 75 000, then 50 000, 40 000 1000 is needed to avoid the worst title (Dan Quayle).		thresholds are 14 000, 13 000, Dan Quayle is
Rationale	Almost all my victories have been "Julius Caesar", so this is apparently too easy to reach for an experienced player. More of a logarithmic scale now, covering a wider interval of scores. It's possible that the original scale worked OK in Vanilla Civ 4; hasn't been changed in either of the expansions.	
Tbd.	The score formula needs work too; increase the weight of victory date and difficulty. The main incentive should be to win as early as possible on the highest possible difficulty. Though the bigger issue is that yields increase too much in the Industrial era.	
See also	707: The Rise & Fall scores are normalized to match this new scale.	

044	No auto-save after loading initial auto-save	
AdvCiv		BtS
There's still an auto-save after regenerating the		When the initial auto-save is loaded, the game immediately auto-saves again, overwriting the savegame just loaded and deleting all other autosaves.
	It's unnecessary to save right after loading, and the deletion of other auto-saves is somewhat unexpected; should only happen when a new game is started (via the main menu).	

< 099	Still unassigned	
-------	------------------	--

099	Culture isn't removed when a civ is destroyed	
AdvCiv		BtS
		When a civ is eliminated, its culture disappears as well.
The civ is announced as having been "conquered".		An announcement says the civ was "destroyed".
"We resent being ruled by a foreign culture".  Anger is 40% of the foreign population with Open Borders (or capitulated vassal or		Before elimination, anger from culture is explained as "We yearn to join our motherland". No anger after elimination (the motherland is gone).
barbarian), 150% times 40% = 60% without OB (or if they're conquered), and 200% times 40% = 80% while at war; all rounded down.		Anger is 40% of the foreign population while at peace, and 150% of that, i.e. 60%, while at war, both rounded down.
Rationale	Removes one strong incentive for conquering a civ entirely. The goal is to make a vassal agreement the correct choice most of the time – less micro-management that way. Also intended to weaken military strategies.	

	It's also glaringly implausible that a culture would instantly disappear.	
	No AI changes: conquering cities is still very desirable, and the AI doesn't consider anger from culture anyway when deciding whether to accept a capitulation.	
Config	The anger can be tweaked through XML (GlobalDefines_advc), but can't re-enable cultural elimination. This is because BtS doesn't actually set culture to 0 in one place, but checks for elimination in numerous places and treats culture as 0 when appropriate, so making it optional is messy.	
Credits	Contributions by Chronis, Ifgr and vincentz CFC thread	
See also	Part of the <u>Immortal Culture</u> component. 130w adds a diplo penalty for cities with high foreign culture.	
and barbs)	the culture value of each player (civs Tile culture doesn't decay. It's treated as 0 when a civ is eliminated. Je does not affect <i>city</i> culture.)	
Rationale	For game balance reasons, foreign culture in conquered cities should be a serious issue only for some 50 turns, perhaps 100; – provided that the conqueror puts some effort into it. Without decay, that's not the case for cities conquered in Renaissance or later; these tiles have tens of thousands of culture points. This is not just an issue for dead culture; it generally takes a bit too long for culture rate to translate into relative tile culture.	
	Another way of looking at the decay rate: If a tile receives culture at a constant rate, tile culture can't exceed that rate times 100, i.e. times the (multiplicative) inverse of the decay rate.	
	Any measures that weaken military strategies should mostly apply to the first half of the game; later conquests don't have much time to amortize.	
Config	TILE_CULTURE_DECAY_PER_MILL in GlobalDefines_advc.xml	
See also	122 deals with culture after city trades (another situation in which culture magically disappears)	
099b	(Merged into 122; now unused)	
099с	Cities revolt regardless of culture range	
See also	210b adds an alert about positive revolt probabilities	
can revolt, the owner o	h sufficiently strong foreign culture but the revolt can only flip the city if the foreign culture is alive and has a city nearby, i.e. close enough so that the first city is (And can't flip if flipping is disabled in ms.)  Foreign culture can only cause a city to revolt if the owner of that culture is alive and has a city nearby, i.e. close enough so that the first city is within the culture range (based on culture level) of the second city.	
general, bu	ss reluctant to accept capitulation in to the master's culture.	
Rationale	To remove another incentive for eliminating civs, to make conquests more costly and culture more relevant.	
	Resurrecting a prior owner seems needlessly messy; the probabilistic occupation times (change <u>023</u> ) should make revolts from dead culture painful enough. Joining the barbarian civ would be easy, but strange, I think, because the city would then train units based on the barb tech level.	
	Not sure if cities with high living foreign culture but outside of foreign culture range	

	should be allowed to flip. Let's say th	e rebels only dare joining the homeland if the
	homeland is near enough to protect t	hem.
Config	Can (largely) restore BtS behavior th GlobalDefines_advc.xml.	rough revolts_ignore_culture_range in
barbarian culture strength is only counted half in surrounding tiles.  Cities can't flip from a master to its vassal; only		practically never enough culture range to cause another city to revolt.  Culture in tiles adjacent to the city always contributes to the foreign culture strength, and, ultimately, the revolt chance.  Can flip between vassal and master. No way then
	ities of capitulated vassals.	for the master to get the city back.
Rationale	Might play better without these revolt barbarians should be easier than cor generate much culture, so it doesn't t	vorful/ historical to let conquered barbarians revolt. is; players don't expect them, and conquering inquering civs. Then again, barbarians don't take much effort to suppress them, at least not int. Could say that only counting the city tile parbarians.
	Could easily implement flipping to barb control. Historically, that hasn't really happened; see the list of colonial uprisings <u>here</u> . More accurately modeled as a period of unrest.	
	Flipping from vassal to master could find it ultimately more annoying than	incentivize elimination over capitulation. Also, I challenging.
Config	BARBS_REVOLT <b>Switch in</b> GlobalDefines_advc.xml	
See also	025 reduces culture spread from capitulated vassals	
religions if a) the civ t alive, no owner,	chance is increased on account of city to whom the revolt culture belongs is ot a capitulated vassal of the city has a state religion and that religion in tin the city; or	Only a) increases the revolt chance, and also applies to capitulated vassals. Dead culture can't cause revolts.
b) if the city owner has a state religion, and that religion is not present in the city but some other religion is.		
(which may	The revolt chance is decreased just cancels out the above) if the city a state religion, and that religion is the city.	When there is a non-state religion in the city, then
The revolt chance is also decreased (but only half as much) if the city owner has no state religion.		an oppressive state religion (which is not present in the city) is no worse than no state religion.
	er is slightly inclined to switch to the the foreign population.	
Rationale I almost removed this complicated stuff entirely, but it's kind of nice that spreading one's state religion can help flip a city. The BtS rule doesn't work for dead culture, so felt that some replacement was needed to balance out the decreased revolt chance from owner's state religion. The BtS rule also doesn't work well for capitulated vassa		

	1	tell the vassal to switch to a different religion; not hat aren't aware of the religion/revolt rules get
Halved the	religion-based modifiers (see above).	
Rationale	Spreading one's state religion had moubled to halved foreign culture stre	ade a huge difference previously, going from ength, i.e. a factor of 4.

cultural owr	It flip on the third revolt (because the ner is dead or flipping disabled in oses one population instead (and occupation).	No extra penalty if flipping isn't possible; occupation periods just keep getting longer.
Rationale	To discourage players from ignoring revolt probabilities (the lost turns don't become punishing until numerous revolts have taken place). And it would be strange if cities could just keep revolting. The loss of population also reduces the revolt probability so that the city should eventually end up depopulated but pacified.	
game speed) after a city was founded in the founded within the		No such period of grace, but since cities can't be founded within the culture range of a foreign city, revolt chance is always 0 in newly founded cities.
Rationale  Now often an issue in the early game when founding anywhere near a foreign border. Probability tends to decrease quickly as the new city starts spreading tile culture, but can get unlucky with revolts until then. Don't want that randomness, don't want to punish settling near foreign borders (player can't even tell that there is foreign culture; not shown on unowned tiles), and don't want to scare players with an initially high revolt probability.		

099d	Can't spread religions during civic disorder.	
AdvCiv		BtS
Missionaries and Executives can't spread religions/ corporations in cities that are in disorder (from occupation, anarchy or a random event).		Can spread regardless of disorder, but there isn't much of a point because happiness and culture from religion have no effect during disorder, and revolt chance is 0.
Rationale  Now that the occupation duration is linked to the revolt probability, spreading right after conquering a city could reduce the (expected) occupation time. D players to micromanage missionaries to spread religions right after conques Also seems realistic that religious communities (or corporate branches) can established during disorder.		educe the (expected) occupation time. Don't want
		ommunities (or corporate branches) can't be
Tbd.	Would be better to show the Spread Religion button grayed out with explanatory text. Currently, the button isn't shown when a city is in unrest.	

100	Changes to sponsored wars	
See also	146: Peace treaty between sponsor and the civ that declares war.	
AdvCiv		BtS
When an AI civ declares war at the request of another civ (hired/bribed for war), the DoW		Humans don't learn about AI bribes.

	orms the human players about this : "declared war on at the lexander."	
Rationale	The information isn't terribly relevant strategically, but makes it easier to make sense of the AI, and makes it clear that the AI actually does sponsor wars. Moreover, if AI civs learn about sponsored wars ("You brought in a war ally against us!"), the human civs should be allowed to know this too.	
(Only relevant if UWAI is disabled:)  Al civs are reluctant to be hired for war against a powerful civ. Either they decline fearing "their military might", or the price for war is high, up to two times higher than in K-Mod, depending on how disparate the power ratio is.  Weak AI civs are sometimes bribed into joining wars against powerful civs. An AI civ doesn't consider its individual military power, but only the total power of the war coalitions.		
Rationale	War against a considerably stronger civ is a big risk, even as part of a coalition, and, in any case, the weakest link is unlikely to conquer any cities. Moreover, sponsoring wars was too cheap overall.	
Config	WAR_TRADEVAL_POWER_WEIGHT in Gl	obalDefines_advc.
war against	iating peace, the no declarations of third parties can be discussed; no ar On" items are shown on the trade	Normally "We don't like you enough" or "will never trade with our worst enemy", but may occasionally be possible to hire an AI civ for war as part of a peace treaty.
Rationale	Shouldn't show the option if the AI practically always refuses, and Cautious attitude despite war is an oddity that shouldn't matter. Could instead remove the attitude checks while at war. Seems more realistic that such options can't be discussed. Would also take a bit of implementation work because the the war trade should be evaluated assuming that the peace treaty is already signed.	
100b	Brokered peace shown in replays	
Brokered pe ("brokered b	ace is shown in the replay log y").	Replay log only says "has made peace with".

101	Revolt after conquest	
See also	210b shows an alert when revolt probability changes from 0 to a positive value.	
AdvCiv	K-Mod	

Reverted the K-Mod 0.9 change to revolt Revolt probability increases superlinearly with the probabilities, and made some changes of my percentage of foreign culture, while garrison own. I did keep the K-Mod game speed scaling. strength does not. There are some other mechanisms at work, but the effect is that Revolt probability increases (essentially) linearly sometimes, especially after conquest, no stack is with the percentage of foreign culture, as it does large enough to keep a city from revolting. in BtS, but the strength of the culture garrison is now exponentiated. This means that doubling On the other hand, a medium-size stack is often the garrison of a city more than doubles the enough to reduce the revolt probability nearly to protection against revolts, and a large stack of 0, but not all the way. recent units can suppress any revolt. More specifically, the culture garrison strength CGS values are set in XML to e.g. 3 for Warrior, 6 (CGS) of each individual unit is reduced to two for Maceman and 9 for Rifleman (same in BtS). thirds, then taken to the power of 1.4, and the The total garrison stength of a city is the sum of sum of these values is again taken to the power these values. of 1.2. The K-Mod behavior is intended, i.e. it's not that karadoc hadn't considered flipping Rationale after conquest; see disussion here. I can see how keeping a city can be harder than conquering it in the first place, but not that much harder. Say, ten good units should generally suffice to hold on to a city. If this makes revolts easy to prevent late in the game – fine; it's mostly early expansion that needs to be paced. The near-0 probabilities in K-Mod are a really bad idea imo. Disastrous events with low probabilities are annoying, think of nuclear meltdowns (which are actually far less disastrous in K-Mod than in BtS). I'm doing the opposite by giving garrisons a superlinear effect, so that it's hopefully clearer whether a city is worth keeping and less up to chance. Config REVOLT TOTAL CULTURE MODIFIER in GlobalDefines advc. AdvCiv BtS Revolt strength is reduced based on the highest Only tile culture of nearby civs matters. The 10% tile culture of any civ, even if that civ doesn't in the example would lead to a high revolt have a nearby city. For example, when the probability because it's much more than the owner of a city has almost no culture, say, 1%, owner's 1%. and the only other nearby civ has some culture, but also not much, say 10%, the revolt probability is low or zero. Rationale Don't want to reward civs for just 10% (or so) culture, especially not uninvolved parties in wars. Also implausible that the 10% would find sufficient support for a revolt. See also A somewhat common issue because of <u>099</u> (culture of dead civs sticks around). Revolt strength reduced if foreign tile culture isn't Revolt strength is increased by up to 100% if far higher than owner's tile culture. E.g. if foreign owner's tile culture is small, but high owner's tile culture is just 25% greater than owner's culture can't reduce the base strength from culture, revolt strength is reduced to 25%. population and surrounding tiles. This makes revolts easy to suppress with one or Cities with up to 49% tile culture of the owner can

Rationale

close to the foreign tile culture.

Counterintuitive that a city could easily flip at nearly 50-50 tile culture. The change rewards the owner for building up culture, even if the owner hasn't (yet) reached parity.

a couple of units when the owner's tile culture is still have a high revolt chance.

(Actually, flip	•	The option is called "City flipping after conquest" and disabled by default.	
Rationale	Part of my efforts to weaken military strategies. I want to build on the revolt mechanism, so it should be (fully) enabled by default.		
Reduced culture garrison strength of all mechanized units (Armored and Siege except Machine Gun) to 50% through the DLL.  E.g. Catapult has CGS 4, same as Axeman; Ta 12, same as Marine. Machine Gun 9, same as Rifleman.			
Rationale	Rationale More flavorful, hopefully also more intuitive. One would assume Catapults to be suitable for quelling revolts than Axemen or other infantry. It's asymmetrical warf This explanation also fits with early units having relatively high CGS.		
	Important that Machine Guns are ex defenders.	empt because the AI uses these as standard city	
Tbd.	Consider giving Spy a positive CGS, possibly also recon units. Espionage should somehow help against revolts. ("Spread Culture" does in K-Mod, but needs to happen before conquering the city, which requires some foresight.)		
	When a city flips while at war, the garrison is bumped. Only barbarian garrisons are killed. The garrison is killed. Bumping only happens when flipping at peace-time.		
Rationale	Rationale Killing a stack of units is pretty outlandish. Bumping barbarians would be unusual, and killing them is less problematic wrt. game balance. I guess they just lay down their arms.		
Credits	The issue had been pointed out (and narrowed down) by DarkLunaPhantom here.		
Nationality h	Added the number of prior revolts to the Nationality help text, and whether the city will flip on the next revolt.  Help text only shows the revolt probability.		
All civs that know a city are notified about a revolt.  Only the actual owner and the cultural owner notified.		Only the actual owner and the cultural owner are notified.	
	Revolt probability (if > 0) shown on the main nterface as part of the plot help text.  Need to enter city screen to see revolt probability; no way to see revolt probability of a foreign city.		
Tbd. In addition to the revolt alert (change 210b), the main interface should indicate city has a positive revolt chance (change 002f makes room for another indicate extra column on the Inland Advisor screen would be nice to have.		ange <u>002f</u> makes room for another indicator). An	
	May have to disable the notifications (given change 099c) in large games	s again if they turn out to happen too frequently	
Revolt probability in visible foreign cities shouldn't be secret – all factors are public knowledge.		ities shouldn't be secret – all factors are public	

Revolt probability is initially based on the current Always based on the highest-ever population of population of the city. If the city has ever had a the city. higher population than currently, then, over the course of 75 turns (slightly longer or shorter on speed settings other than Normal), a gradually higher population is assumed, up to a maximum of the highest population ever. While there is hurry anger ("cruel oppression"), foreign culture strength is increased as if the city had 5 population more and the resulting foreign culture strength is increased by 50%. The AI doesn't use Slavery in cities that already have a positive revolt chance. Culture in the eight adjacent tiles factors into Ownership of the adjacent tiles always counts, foreign culture strength; the effect increases over and can increase culture strength significantly. time (same mechanism as above for population). Culture points in those tiles don't count directly. After 50 turns (on Normal speed), culture strength is further increased when adjacent tiles are *owned* by the foreign civ. Rationale I think the BtS rules are supposed to make cities flip faster once the adjacent tiles have flipped. Loss of tiles will often lead to population loss, which would normally reduce culture strength. agree that cities enveloped by foreign culture should flip quickly, but I don't want conquered cities to be untenable, and I don't want players to feel compelled to continue their wars in order to push back foreign borders. My rules are supposed to give the conqueror time to build up some culture. That's all overly complicated (already in BtS), but hopefully players don't need to know the details. Slavery would be an easy way to get around anger from foreign culture, and to keep the population small, making the city easier to pacify. Replace the Slavery civic with something else. The hurry ability distorts the game in Tbd. many ways. When a tile is workable by only one city, then that city should get the tile regardless of culture. Once this is changed, the BtS rule about culture strength based on ownership of surrounding tiles will be pointless.

102	Show fewer foreign moves	
AdvCiv		BtS
"Show friendly moves" and "Show enemy moves" enabled by default.		Both disabled by default.
	Now that the biggest problems with these options are fixed, players should use them. Much better than having to inspect the map after every round of AI turns to find out which units have moved.	
Config	Civ4PlayerOptions.xml	

Both of these changes will simplify the revolt rules a little.

Tbd.	1 0 0	much of an effect because player options are read t's a fresh installation. Could invert the options to eaky.	
See also	108d shows a loading screen hint recommending the show-moves options		
an invisible	ve starts in a visible plot and ends in plot, the camera is centered on the d the player gets to see/ glimpse the out of sight.	Only moves ending in visible plots are shown. In the case of a multi-tile move ending in an invisible tile, not even the visible portion of the move is shown.	
	Units that begin and end the turn in s, i.e. move only through a visible tile.		
Rationale	catch the unit as it moves. What's ea	oving through, but difficult to implement; can't asy to do is showing the empty traversed tile, but a sense that the player learns about the tile, but show those moves at all.	
Tbd.	Often the unit moving out of sight is sure if this can be helped.	already gone when the camera jumps there. Not	
AI avoids pa		Al constantly patrols within its borders, especially with fast units like Knights.	
Patrolling units tend to move in a consistent direction. Leads to wider patterns.			
Rationale	The patrols make "show enemy/friendly moves" unusable, and there isn't much of a point. After all, borders grant visibility. I guess patrols add some uncertainty to small-scale surprise attacks (can't be sure how many units exactly are going to be near a city at a given time) and could help against nukes. Well, anti-nuke AI behavior needs to be improved at a later point anyway.		
Tbd.	I didn't disable inner-border patrols entirely because, in order to patrol unowned land, AI units may have to traverse owned land. Moving in one direction for a longer time also helps with that. That said, patrols in unowned land don't seem crucial either. Against barbarians, the guard-city-site AI routine is probably more effective.		
	If there's too much or too little patrolling, I may have to find a cleaner solution.		
Executives vare no longe moves" option ships, move are always someone of other streets.	on-hostile Workers, Missionaries and within their owners' cultural borders er shown when the "show friendly on is enabled. As for non-hostile es of human ships and cargo ships shown (except AI ships on patrol), her ships only when moving into sight or inside the borders of the layer.	All unit moves are shown.	
Rationale	disabled (change <u>010</u> ), I doubt that sit's a bit trickier because a passing C	ever interesting. Even if Worker stealing weren't seeing rival Worker moves would help. For ships, Caravel could matter (target for Privateer, or could patrolling Destroyers. Cargo units that can carry any case.	
By not showing moves of cargo ships on patrol, I'm giving away som intentions of the AI. That said, a single cargo is practically always a patrolling AI Galleys are just too annoying to watch.		gle cargo is practically always a patrol, and	

Config	SHOW_FRIENDLY_WORKER_MOVES and SHOW_FRIENDLY_SEA_MOVES in GlobalDefines_advc	
Tbd.	Could be an issue for enemy moves as well when there is city visibility from espionage. So, should perhaps apply the change to enemy moves too.	
	e "top civs" pop up. ("Pliny the Elder ed his great work:")	
Rationale Interferes with shown moves. Also more of a beginner's feature, somewhat obsol by the Statistics screen and usually misleading. I doubt anyone not reading this vnotice that it's gone.		
Config	SHOW_TOP_CIVS in GlobalDefines_advc

to oscillate be change 001.	d a bug that caused AI non-combat units stween safe cities when at war. See n K-Mod 1.45, now using the K-Mod	
"show friendly moves" can be toggled using Shift + M.  If the option is toggled this way, the change won't be- visible in the Options menu, and won't be saved upon- leaving the game.  (Disabled through a switch in  GlobalDefines_advc. Turned out I had never used this.)		

103	Spy unit can investigate cities		
AdvCiv		BtS	Vanilla/Warlords
A player can investigate a rival city if that player has a Spy unit in that city, and that unit hasn't moved this turn. (Can still investigate cities through passively accumulated espionage points as well.)		Can only investigate rival cities by accumulating espionage points. That said, the "Sabotage Building" and "Sabotage Production" missions (and the cost of these missions) give away some information.	A local spy unit allows city investigation regardless of whether it has moved. City religion can also grant visibility. No visibility from espionage points.
Great Spy c	an also investigate.	Not even Great Spy can investigate.	No Great Spy unit.
Rationale	To make Spies more useful for players that don't invest heavily in espionage. Also, constructing wonders is more fun when you can find out who else is in the race. Players don't spend thousands of espionage points just to find out if someone is currently building a wonder; will rather resort to guesses based on mission costs for "Sabotage Production", which is a bit of a loophole.		
	Perhaps investigation was a bit too easy in Vanilla/WL; I'm adding the restriction that the Spy mustn't have moved, which should make quite a difference when hopping from city to city to keep an eye on all of them. BtS increases the overall risk of Spies getting caught.		
Config	Config Can be reverted to BtS in Civ4UnitInfos.xml.		
Tbd.	Would be nice to have an "Investigate" button in the "Perform Espionage Mission" list. Clicking the button would simply open the city screen.		

Should perhaps disable the per-city mission cost preview on the Espionage screen
entirely in order to prevent abuse.

104	UWAI: See chapter <u>Utility-Based War AI</u>			
	Most of the changes are in newly created classes. I've added a few auxiliary functions in pre-existing classes too. Technical documentation only inline. There are also some changes in unlikely places, which I've marked with the following sub-ids.			
Config	disabled. Can also disable it through	on the Custom Game screen, UWAI can be XML; see instructions under <u>Known Issues</u> .		
	UWAI settings in AI_Variables_Glo			
104b	Code for measuring path lengths between measuring path lengths of units (see	ween cities. Also a now unused hack for CvUnit::measuringDistance).		
104c	Al avoids military victory strategies in	order to spare friends		
AdvCiv/ UV	VAI	BBAI/ K-Mod		
considers v conquest) v	When weighing its victory strategies, the AI considers whether a military victory (esp. conquest) will require an attack on a friend. If so, the AI will pursue different strategies instead.			
may ultimat	f the AI still comes close to a military victory, it may ultimately attack friends, depending on the specific circumstances.  Once stage 4 out of 4 of a military strategy is reached, the AI ignores attitude when it comes war targets.			
Rationale	See the UWAI chapter. Victory strategies aren't within the scope of UWAI, but, in this case, the strategy weights need to be aligned with the DoW policy.			
Config	Only effective if UWAI is enabled.			
See also	115: Al commitment to victory strategies			
104d	Added a function that evaluates holy cities, shrines and corp. HQ, replacing the (overlapping) code in the targetCityVal and cityTradeVal functions.			
104e	Halved military power values of ships through the DLL.			
	Reduced military power (not combat str.) of Maceman from 9 to 8; Samurai at 9 (no change) and Berserker at 9 (was 10); through XML.			
Rationale  UWAI handles naval and land power separately, so the power of ship units doesn't matter. But the K-Mod AI uses a single power rating, an that ships are only useful in certain situations, ships contribute too meven if UWAI is enabled, some strategic AI choices are based on a strating, and the Statistics screen shows only one rating as well.		Al uses a single power rating, and, considering ituations, ships contribute too much power. Also, egic Al choices are based on a single power		
	High power of Maceman makes UWAI overestimate Maceman when predicting military build-up; appears as a better offensive unit than Grenadier. The bonus against melee isn't that useful for this type of unit at that point of the game (whereas 7 power for Crossbowman seems OK). UWAI (if enabled) increases the power values of all offensive units that can receive city raider promotions; this gives Maceman another boost.			
104f	More narrow conditions for Dagger st	trategy		
	while in a chosen war; Dagger ntirely when UWAI is enabled.	Having started a war doesn't affect Dagger.		

Rationale	Staying in the Dagger strategy while at war doesn't make much of a difference for the K-Mod AI, but it gets in the way of my UWAI testing (UWAI running in the background while K-Mod decides).	
	Not sure what the Dagger strategy was supposed to be good for; added in BtS and changed quite a bit in BBAI/K-Mod. Probably for building up units without having a war plan, and thus also without giving away war preparations through WHEOOHRN; then a sudden strike. UWAI solves this problem differently.	
104g	Don't demand tribute from unreachable civs (implemented based on UWAI code)	
104h	Moved the BtS and K-Mod code for negotiation of peace terms into a separate function, and made some minor functional changes too (that also take effect when UWAI is disabled).	
<b>104</b> i	Changes to the way that the AI responds to peace offers.  MEMORY_STOPPED_TRADING_RECENT is used for distinguishing a DoW on request of a third party or through a defensive pact (DP) from a normal DoW.	
	When a DP leads to a DoW, then stopped-trading-recent memory is added for all inolved parties, not just those that join the war through the DP.	
Rationale	Otherwise, the target of the original attack would be free to negotiate peace, while the allies that declared war because of the DP would be forced to continue the war.	
104j	Change in a master Al's war plans affects war plans of its vassals	
104k	Moved rounding of trade values into an auxiliary function (no functional change)	
1041	Caching of war utility to keep the user interface fully responsive when checking if a civis willing to talk or willing to trade certain items. No functional change outside UWAI, but had to put some code to switch caching on and off into CVDLLWidgetData.cpp.	
104m	Handling of tribute demands redirected to UWAI; fewer random AI requests and faster decay of AI memory about human response to tribute demands (only if UWAI enabled). On Noble difficulty and higher, regardless of whether UWAI is enabled, the AI only makes tribute demands with a significant trade value; e.g. won't just ask for a food resource or some small sum of gold.	
104n	Diplo votes	
104o	Handling of sponsored wars and vassal treaties when UWAI enabled	
104p	Target size for invasion stacks based on difficulty and less random (even when UWAI is disabled).	
Rationale	Except on high difficulty settings, the AI often took too long to get invasions started after finishing preparations.	
104q	Changed some K-Mod uses of WarPlanStateCounter to AtWarCounter	
104r	Handling of empire split	
104s	Treat faraway land targets as only reachable by sea if UWAI enabled.	
104t	Handling of team changes: Permanent Alliances and elimination of a team member	
104x	Loading of Al-related parameters from AI_Variables_GlobalDefines.xml	

105	Al relies less on getAnyWarPlanCount	
AdvCiv		BtS
Replaced most calls of getAnyWarPlanCount		

and some of getAtWarCount with a new function isFocusWar that ignores wars that are probably not worth focusing on.		
(Other parts of the AI code already take care of		The AI assigns lower utilities (found values) to settlement spots when at war, to the point that AI civs practically don't expand while at war.
Rationale	Just being at war doesn't imply that the AI needs to build up units or switch to wartime civics. It could be that the war enemy can't even reach the AI civ, or has just one city left, is hopelessly backwards etc. In particular, don't want human players to declare meaningless wars in order to hamper the economical development of an AI civ.	
The AI makes no tribute demands when busy with a war. (Only relevant when UWAI disabled; with UWAI, such demands are possible.)		The AI disregards its ongoing wars when demanding tribute; only checks if its own military power is greater than the target's defensive power (i.e. including vassals and allies from Defensive Pacts).
Rationale	Looks like an oversight. Would be better to add up the target's power and that of the current war enemies, but that gets too complicated to implement.	

106	Avoid screen getting flooded with messages		
See also	004f disables celebrations		
Tbd.	Almost all messages about random events are irrelevant, but the events themselves are awfully designed as well. I'd like to disable random events by default, and, rarely, fire an event from a handful of interesting (but balanced) events even if events are disabled.		
AdvCiv		BtS	
No message when autosaving		Autosaving message at end of human turn	
Rationale	Players who rely on autosave tend to set narrow intervals via CivilizationIV.ini, which makes the frequent messages disruptive. Autosave is known to be reliable; no need to report success.		
Config	TXT_KEY_AUTOSAVING in Civ4GameText_advc		
•		All GP births are reported; "in a faraway land" if the city is unrevealed.	
change); the city is stated if revealed.		Message says "faraway" when the city isn't revealed. If the owner is known, it is listed on the Statistics Screen. The message never states the city, but highlights it on the map.	
reported.		When a religion or corp. is founded, if the holy/ HQ city is unrevealed but the city owner known, report only "faraway".	

changes from one turn to the next.  Rationale  It's a helpful alert, but fires too often. Typically, the willing-to-trade part is more important. The player then either trades for the resource or decides not to. In the latt case, it's not immediately helpful to know that it's no longer available. AdvCiv BtS	106b	Message limit		
	AdvCiv	ı	BtS	

If more than 3 messages are waiting at the beginning of turn, don't display them on the main Log is only ever shown when the player opens it. interface; open the Event Log instead. Exception: Major events are kept in the Turn Log indefinitely, Messages about most major events are always displayed on the main interface.

The following major events are *not* shown on the events are major: main interface when the Turn Log is opened:

- tech discovered
- civics changed
- · Golden Age begun
- · GP born in own civilization
- · city founded
- city liberated
- foreign city flipped
- · city captured/ razed
- · wonder built

Also not shown, and now only a minor event: when a religion or corp spreads in a city, birth of a foreign GP.

Also open the Event Log when there are 1 or 2 messages along with a diplo popup.

In Hotseat, always open the Event Log when there is a new message.

No limit on the number of messages. The Event

whereas minor events are cleared after 20 turns and info messages after 2 turns. The following

War started/ ended, alliance formed, defensive pact signed, capitulation/ vassal agreement signed/ broken, tech discovered, first to discover Liberalism, circumnavigation, wonder/ team project built, city founded, civics or state religion changed, revolution started/ ended, Legendary culture reached, religion or corp founded, city religion/ corp spread or removed, city liberated/ flipped, game won, GW sustainability reached (K-Mod), vote source established (UN, AP), city captured/ razed, Golden Age begun/ ended, civ conquered, GP born/ GG killed, empire split, spaceship launched/ failed, nuke.

The Event Log button becomes inaccessible when a diplo popup opens (hotkey also blocked).

On-screen messages are cleared in between turns, including those that haven't been displayed yet. This means that a player who follows another human in the turn order misses most messages.

## Rationale

The main interface really isn't suitable for displaying frequent messages. It's obtrusive; the display delays add up; messages can disappear too fast. My limit guarantees that after waiting for 3 messages, no further messages can arrive.

When a diplo popup opens, any messages on the main interface become difficult to read, so it's important to provide access to the Event Log. The player should be able to learn what happened during the AI turns before making any decisions.

Major events on the main interface: These can easily get buried and missed in the Turn Log because they occur already during opponent's turns. Especially when playing without sound. The ones that I've excluded are either not that important or there is some additional mechanism that alerts the player (e.g. tech splash screen when a tech is discovered). Religions are spread all the time; that's not a major event at all.

## Config

START OF TURN MESSAGE LIMIT in GlobalDefines advc

## Tbd.

Could repair message delivery in Hotseat; opening the Event Log is only a workaround solution. Would have to store messages within the DLL when they are triggered, and call CvDLLInterfaceIBase::addMessage only at the start of the recipient's turn. Can also rewrite that function in the DLL if necessary; probably just wraps data into a CvTalkingHeadMessage object and calls showMessage.

		Once displayed, messages only disappear when they've been on display for the proper amount of time (depends on message type).
Any messages still queued for display are flushed before that (i.e. cleared without having been on display).		When a human player's turn ends, all messages still waiting to be shown to that player are displayed at once (delay skipped).
Rationale	When turns are ended in quick succession, in BtS, messages from different turns get displayed together, which can be confusing. Dropping messages without ever displaying them isn't much of a problem anymore because the Event Log tends to open periodically and the missed messages are in there.	
106c	No more alerts upon loading savega	me
AdvCiv		BUG
BeginActiv	entManager fires ePlayerTurn only right after the n ends, not when loading a	BeginActivePlayerTurn fires after the end of the previous turn, and when loading a savegame.
Consequently, alerts aren't checked (and aren't displayed) when loading a savegame.		Alerts are checked after loading. Since Civ4lerts doesn't store data in savegames, the alerts assume a blank slate, and display a bunch of messages, e.g. for all technologies that anyone is willing to trade.
	Alerts have the same display duration as normal Alerts are displayed for 20 seconds. events: 10 seconds.	
	Arguably a bug. BeginActivePlaye that's what happens whenever a sav	rTurn shouldn't fire multiple times per turn, but vegame is loaded.
	Listing all trades upon loading can't presented in a better way by the For	be considered a feature either. That info is eign Advisor.
Tbd.	BUG alerts break when Python scripts are reloaded during a game. Error message: "Error in BeginActivePlayerTurn event handler." There is also other BUG code that breaks when reloading scripts, in particular, code relating to the field-of-view slider. Doesn't crash the game, but will have to exit and restart in order to receive BUG alerts again.	
106d	Civ4lerts and Scoreboard default se	ttings changed
AdvCiv		K-Mod
Enabled some alerts by default, namely Worst Enemy and all those from the second batch ("MoreCiv4lerts") except domination and map trade.		K-Mod disables all alerts by default (whereas standalone BUG enables them all).
Rationale	The ones I've enabled are essential for intermediate players, whereas domination and the first batch of alerts (city management and trade gold) are only essential for perfectionists.	
Config	Config Through the in-game BUG menu	
Changed the Advanced Leaderboard default ayout so that open borders (B), espionage advantage (E), defensive pacts (D), trade network (N) and whether they have any vassals (V) aren't displayed.		

Rationale	Frees up space on the main interface, and I find it difficult to imagine that players can't remember whom they have these relations with. I've never even learned how the espionage icon is supposed to be helpful. The vassal indicator is redundant when "Group Vassals" is checked (as is the case by the K-Mod default).	
Config	The in-game BUG menu contains a formatting string. See above for the letters I've removed (B, E, D, N, V).	
See also	004v also makes changes to the scoreboard.	
106e	Report all religion and corp changes	
Show a message whenever a religion or corp spreads in a revealed city.  When a corp spreads in a city that isn't revealed to the HQ owner, the city becomes revealed to		Message only shown to city owner and to players that have the religion as their state religion or own the holy city (in the case of religion spread) or to players that own the HQ (corp spread).
the HQ owne	•	HQ owner may receive messages about unrevealed cities.
Rationale	As for reducing the number of messages, this is obviously counterproductive; can be important though.	

107	Fewer AI defenders		
See also	023 can add some defenders when there is a revolt chance. 017 builds fewer military units overall when there are already a lot. 022 Changes the computation of AI paranoia, which also affects garrison sizes.		
AdvCiv		BtS	
	re now assigned like under the	Floating defenders in defensive wars are assigned as under Alert2.	
offensive (of no longer re	Once an enemy DoW is no longer considered offensive (offensive Area AI), even when a war is recent, the AI relies on its war success rating for selecting its stance (offensive or defensive Area and once an enemy DoW is no longer considered selecting its stance (offensive or defensive Area and once an enemy DoW is no longer considered and once an enemy DoW is no longer considered by the AI relies on its war success rating for selecting its stance (offensive or defensive Area AI).		
between def	The AI personality slightly factors into the choice petween defensive and offensive Area AI.  LimitedWarPowerRatio is used as input.		
Rationale	Need to counterattack more. Shouldn't rely much on war success even in long-ish wars; successes from an initial surprise attack can give a wrong impression (see also 130r under <i>Tbd.</i> ). Just sitting there isn't the most effective tactic (unless the power ratio is highly unfavorable), and it's also boring to play against.		
		f character for some leaders, and very much in er personality factor. Use LimitedWarPowerRatio ave limited objectives.

AdvCiv BI		BBAI	
	An AI civ following the "Turtle" strategy stops Turtling AI civs keep building defenders until the building defenders when their number exceeds a can make peace or the power ratio shifts in the threshold.		
Rationale	A turtling civ can't recover economic	ally from building Archers for 50 turns.	

AdvCiv		BtS
Al doesn't try to guard non-city tiles when a war starts looking hopeless.		Nothing to prevent guarding of resources or Forts. Not sure if an urgent need for defenders elsewhere can cause the AI to stop guarding non-city tiles.
	If they're strategic resources, it could actually be crucial to keep them, but I don't think that's generally feasible when the AI gets beaten badly. Generally more useful to guard the cities then.	
Reduced imp defenders.	pact of space victory stage 3 on city	Extra defenders in capital and all cities building spaceship parts.
	Space victory is a lengthy process, a Doesn't usually mean that the AI jus	and stage 3 begins with the completion of Apollo. t needs to survive in order to win.
between two	computes the (spacial) closeness civs, cities on different continents ed to be less close to each other.	Cities on different continents are generally considered to be closer to each other than those on the same continent.
		Closeness mostly affects the distribution of Al defenders, the Alert strategy, raze decisions and the price of sponsored war.
	Arguably an oversight by Soren Johnson (or whoever wrote the PlayerCloseness code). The intention was probably to use a wider search range for cities on other continents, not to treat them as being nearer.	
See also	In some situations, the impact of land connection is further increased: 104o: WHEOOHRN when already fighting a war (currently disabled) 022: Alert strategy	
More floating defenders on the highest three difficulty settings, fewer on low difficulty.		Difficulty affects how many units the AI manages to train (in particular through the AITrainPercent modifier), but the target defender counts are the same for all difficulty settings.
Rationale	There's very little war on low difficulty settings because the AI only manages to build enough units for defense. It's good that the low-difficulty AI is less aggressive, but it can't just sit there all game. Fewer defenders also make it easier for human players to wage war.	
	Conversely (and more importantly), the high-level AI trains so many units that it can afford some more defenders.	

108	Reduced starting plot normalization	
See also	027 is concerned with the selection of starting plots.	
AdvCiv	BtS	

When placing extra bonus resources Tries to make the lowest found value at least 80% (placeExtras) in a singleplayer game, the of the best. game tries to make the worst starting plot at least 70% as good as the best (in terms of found value). No change for multiplayer. Transforms most, but not all, bad terrain Ensures that all land plots around starting plots are decent plots. (Tundra), bad features (Jungle) and mountain peaks around starting plots. Ice is always cleared. In multiplayer, all peaks are cleared. too, and almost all bad terrain and features. A freshwater source is still guaranteed (no change). Rationale The player handicap makes the human starting plot match the desired difficulty; e.g. Settler puts the human civ into one of the best available starting plots, and Deity in one of the worst. Therefore, equal starting conditions aren't crucial in singleplayer. More unequal starts probably make games on Prince upward more challenging, which don't mind. Low-difficulty games hopefully get a bit more dynamic in terms of warfare due to some AI civs having (much) worse starts than others. Removing all bad plots makes the starting region look unnatural. A few bad plots give a start more character and provide more variety. Reduced normalization also leads to weaker starting plots overall, which should reduce the importance of capitals a bit. Very powerful capitals reward early warfare too much, and make wars generally too much about taking the capital. Confia Several parameters in GlobalDefines advc; can restore BtS normalization too. Selecting "Balanced" in the Custom Game screen only affects the map generation before normalization; it does not enable BtS normalization. I wish it did, but once the map has been generated, there is no way to tell if the Balanced option was set. 129 makes starts with multiple Gold or Gem resources less likely. See also The city cross around the starting plot is No plots are revealed other than those that the revealed when the game starts. starting units can see. In singleplayer games, initially hidden resources As far as I can tell, yields from all hidden are disregarded when choosing starting plots. resources are fully factored into the found value Hidden resources are no more likely to occur when choosing starting plots. Only their strategic around the starting plot than anywhere else. value is discounted. A poor starting plot can hint (Less likely, in a way, because Horse, Copper at a hidden resource in the surrounding city cross. and Iron can't be on riverside.) Rationale Makes it more attractive to move the starting Settler. Don't want players to settle blindly and hope for the best (or regen) when a starting plot looks poor. When all citycross tiles are revealed upfront, and hidden resources are unlikely, there isn't much to hope for. Can accept the starting plot for what it is or go find a better one. It can't be rationalized historically that a poor starting plot hints at hidden resources. It seems that BtS and K-Mod don't even take into account in which era a resource is going to be revealed, i.e. Coal would be valued about as highly as Copper. This needed to be fixed one way or another. The flip side is that AdvCiv can theoretically produce very strong starting plots because addExtras is unaware of hidden resources. That's something to keep an eye on. Could also simply remove any initially hidden resources near start locations.

START\_SIGHT\_RANGE in GlobalDefines advc

Config

Tbd.	I've tried to let the AI to move its starting Settler, but the <code>CvUnitAI</code> is very bad at it, e.g. wants to escort the Settler, and moves erratically when no escort is available (Scout start). Fuyu and Afforess have written some code for Better BUG AI, but it only chooses from among known sites, i.e. doesn't cover exploration. Haven't merged it for that reason.	
	added during normalization can't re than 3 seafood; more than 2	More than 3 coastal food ruled out, and more than 3 ocean food ruled out, but both taken together practically unlimited (up to 6).
Rationale	Cities with more than 2 seafood grow unrealistically fast; doesn't play well either. This happens too often.	
AdvCiv		K-Mod
	points" guaranteed near each	At least 5 food pts. guaranteed.
	One Plains Cow and one Flood- l do. Multiplayer: 4 food pts.	(Each resource that can provide 4 or more food is worth 3 points, the others, i.e. Plains Cow, only 2 points. Flood Plains count as 1 each, but at most 2 in total.)
Rationale	BtS allows such starts; I think even a Plains Cow and no Flood Plains is possible in BtS. That's indeed very dry. However, one or two Flood Plains and a Plains Cow are OK with me for singleplayer.	
	(Disabled this change in v0.88 – I hadn't realized that Grassland also counts as 1 food point; the K-Mod code is actually fine.)	
Tbd.	When I get around to XML balance changes, I intend to reduce the food yield of improved Pig and Fish by one. Should make starts with overabundant food less common.	
	ty sets StartingLocPercent to 100 then the human players receive the g plots.	Human players only ever receive the second worst starting plot.
Rationale	Could be a bug. Or the developers didn't trust their starting plot heuristic and worried about players getting unplayable starts. This shouldn't be an issue with K-Mod (rewrites the starting plot heuristic).	

109	Al improvements for isolated starts	
AdvCiv		K-Mod
		Optics is prioritized when isolated, but not science in general.
Isolated AI civs are reluctant to pursue a culture victory.		
alone, or when no threatening civ is known.		Al civs that haven't met anyone adopt Economy Focus, but probably doesn't happen reliably when there are friendly or faraway neighbors. Economy Focus (a BBAI-introduced strategy) reduces the production of military units.

All naval technologies have a science flavor, and faster research will reach Optics faster.
130n delays penalties from different religion. 130p decouples enemy-trade penalties from the has-met counter. Both should make it easier to find partners abroad.

110	Changes to AI military build-up	
AdvCiv		K-Mod
research in in Classical,	ne target commerce surplus for the early eras of the game. E.g. 65% , 45% in renaissance. (If the target e AI is reluctant to build more units.)	35% regardless of era.
difficulty set upkeep cos	still build a lot of early units on high tings because of AI discounts on all ts, and because the target surplus ered further when at war or preparing	
Rationale	A low research slider position is more	worrying in the early game.
	e base yield weight for production to ive to Commerce) and food to 275%.	270% and 300% respectively.
second half	ecrease the weight of food during the of the game (to just 215% in the years aiming for a diplo victory (see	
Rationale	Food adjusted to the reduced use of Slavery (change 121). Still high, but that's OK – the AI is better at growing cities than at choosing sensible tech or city production. Would make sense to increase the production weight when Slavery is used less, but 270% was way too high, and resulted in post-Chemistry Workshop spam (without supporting civics) and Forts on worked Silk Forests. Huge outdated AI armies don't exactly make the game enjoyable either.	
	In the lategame, it doesn't normally make sense to grow cities further. I'm still giving food a fairly high weight because the AI should only avoid growth, not actually shrink cities (leave that to human players who know what they're doing). There's also plenty of scattered AI code that affects AI city management when near victory conditions; I haven't carefully looked at this, but probably already prioritizes e.g. production for spaceship parts, and may even avoid growth.	

111	Units in neutral tiles prevent pillaging	
AdvCiv		BtS
Can't pillage on unowned tiles that contain a (non-Spy) unit of a different team.		No special restrictions for pillaging unowned tiles. Can, in particular, pillage roads in order to slow down another civ's units.
Rationale	Not an important change. Yanking out roads from under other civ's stacks is pretty bizarre, and occasionally exploitable. To be more consistent, I've disallowed any pillaging in the presence of foreign units.	

112	Al changes for voluntary vassal agreements (VVA; "peace vassalage")	
Tbd.	The VVA code was already messy in K-Mod, and it's worse now. Should be rewritten based on a utility value that replaces the dozens of exclusive clauses.	
AdvCiv		K-Mod
Pleased for r powerless (a		Al lowers its attitude threshold when it is among those civs with the least military power.
A civ that has at least one Defensive Pact and is not at war with anyone refuses to sign a VVA.  No leader is willing to sign a VVA when Cautious		Defensive Pacts don't matter for VVA decisions. Once a VVA is signed, Defensive Pacts of the vassal get canceled. E.g. Frederick signs a VVA at Cautious.
and not threathrest	atened. Leaders that have their to Cautious in XML are instead a ng to lower their threshold when	
	VVA happen too quickly in K-Mod, probably also owing to increased military budgets. The idea that civs without prospects for winning the game should become vassals asap comes from Warlords though. Perhaps they're supposed to catch up under the protection of their master, and then break free again, but it rarely works this way. The AI should certainly prefer independent survival over becoming a vassal and helping another civ win.	
See also	133 cancels tribute deals once vassalage ends 143 adds recently-canceled memory for vassal agreement	
AdvCiv		BtS
·		Al leaders refuse to sign VVAs when the would-be master gets close to a military victory: "You've grown too powerful for us."
	As indicated by the weird explanation isn't effective either; just prolongs the	n text, the restriction is difficult to rationalize. It e inevitable.
"Your land is too far away" rules out vassal agreements only until the Industrial era. If the prospective master is in the Industrial era or later, its power rating is decreased when not sharing a continent with the vassal, but a vassal agreement is possible.		
	Oversea vassals (not just colonies) of this is good for gameplay; worth a	were pretty common in the Imperial Age. Not sure try.
is much sma	Master refuses to accept vassal who's population Only considers refusal when acceptance meanism much smaller unless aiming for Conquest victory or liking the vassal.	
	Peace vassals are fickle and may le unless they bring a considerable eco	ad to wars with third parties. Not worth the hassle onomical value.

When deciding whether a vassal breaks free, the A capitulated vassal with, say, 12 tiles initially territory of the vassal is treated as at least 10 gets to break free after losing 6 tiles (from war or tiles. Thus, a vassal that has fewer than 15 tiles culture pressure). Voluntary vassals don't care if left when becoming a vassal can only break free they lose tiles. by gaining land, not by losing land. Through change 143 (cancelation of voluntary vassal agreements), vassals with very Rationale little territory left can end up changing hands a lot. Civs that are at stage 3 or 4 of any victory Civs that are close to domination victory refuse to strategy refuse to sign vassal agreements, and become vassals (such civs will normally also be break free if they can: "We'd rather win the way too powerful to accept, so this is pretty pointless). In K-Mod, civs refuse to accept game". The leader of AP or UN also refuses/ breaks free. vassals at stage 3 or 4 of Culture or Space victory ("Surely, you must be joking"); may also cancel the agreement. Diplo victory not covered. Don't want a civ to win the game while hiding behind a master, especially not a human Rationale master who can't cancel the agreement. Important to let the vassal refuse (not the master) because the master could be human. 115 prevents civs with too little production capacity from pursuing a space victory. See also which is important for this change: Advanced civs might otherwise refuse to ever capitulate once they have the Apollo Project. 143b prevents vassals from having nukes. 014 prevents capitulated vassals from pursuing victory strategies. An independent colony can break free if its powerOnly attitude can cause an independent colony to is at least 80% of its master's power. break away. And since the +10 "granted us independence" bonus doesn't decay, this happens practically never. Rationale A War of Independence should at least be a possibility. See also 130r causes "granted us independence" memory to decay. An AI civ ready to become a vassal contacts the The same contact-delay is used for vassal prospective master only with a per-turn agreements as for permanent alliances, but this only affects offers to human players. There is probability. The probability is based on the scoreboard rank of the master – between 1 in 20 only a 1 in 80 chance of implementing a if the master is ranked in the middle of the permanent alliance, but no such probability for scoreboard, and 1 in 40 if the master is at the voluntary vassal agreements; they're checked top. Increased by 400% if at war with anyone. each turn and directly implemented. It's possible that the Warlords developers had meant to use the permanent alliance Rationale probability also for vassal agreements and misplaced a closing curly brace. Be that as it may, civs are too quick to sign vassal agreements when their power ratio takes a dip, which doesn't only happen in defensive wars, but also when an AI focuses on its economy (AI strategies Economy Focus or Get Better Units) or after an unsuccessful aggressive war. The change only affects AI-AI vassal agreements. Could also implement it in a way that makes civs more reluctant to become vassals of human civs, but that's a bit more work, and I think it's still difficult enough for humans to obtain AI vassals because humans can't generally afford large enough armies to impress the AI. Probability based on rank should reduce snowball effects.

112b	Al changes to surrender decision	
See also	123d blocks an exploit where cities gifted to a war ally can lead to faster capitulation.

Response is dead hands"		That response isn't used anymore at all. BtS used it for cities that the AI didn't want to trade.
Rationale	Let the enemy demonstrate that they capitulating.	y can reach our important cities before
Don't surrend the master's	der while there are units en route to territory.	This is checked before signing peace treaties, but not when considering surrender.
and the attitu the enemy's it actually is.	ny is the worst enemy of an Al civ ide toward that enemy is Furious, power is treated as 10% lower than I.e. the enemy needs slightly more er to achieve capitulation.	The worst enemy's power is treated as 25% lower regardless of attitude.
Rationale	Should perhaps disable this power adjustment entirely. It makes some sense flavorwise, but makes capitulation easier to achieve when the winning side already has a much larger army when the war starts; otherwise, it'll take time to get the uppe hand, and "This war spoils our relationship" will typically lead to a Furious attitude. From a human pov, it's annoying if the Al won't capitulate when a war has already become tiresome.	
Tbd.	Attitude could play a bigger role whe	n there is more than one powerful war enemy.
When considering capitulation, the power modifier based on war success is applied to the vassal's power, meaning that war success matters not just for the vassal-master power ratio, but when comparing the vassal's power with the average power of other civs.  The master's power is modified based war success, and therefore only matters when comparing the vassal's power with that of the master.		
A civ refuses to capitulate unless its power rating is at most 76% of the global average power rating.		The threshold is 80%.
The impact of war success on capitulation is reduced a bit overall. Can reduce the vassal's power by at most 45%.		Can increase the master's power by up to 100%.
	Perhaps the average power shouldn when the master's war success is hi	't matter at all for capitulation. Now matters less gh.

113	Al builds more Workers	
AdvCiv		BtS

	prioritizes Workers until the total needed Workers is reached.	Workers prioritized only when there are far too few of them; otherwise, any decent building takes precedence.	
Increased the total estimated workload for Workers by 25%. Forests to be chopped are included in the estimate.		Workload is estimated based on unimproved worked tiles. Chopping opportunities aren't considered.	
Rationale	The BtS/K-Mod AI tends to train 1 Worker per city, which is about right for an experienced human player, but the AI is far worse than such a player at scheduling its Workers, so 1/city isn't nearly enough. If Workers are everywhere, scheduling is mucless of an issue. Also note that the AI generally isn't good at choosing city production. Can't go too wrong with a Worker (unless there are evidently too many already).		
	Should be about 1.5/city now. (Also cities so it varies a lot.)	a matter of traits, leader personality, coastal	
	The 25% extra workload are for future jobs. The BtS computation accounts only for current (urgent) jobs, and thus lags behind the real demand.		
	The biggest improvement, though, is that AI cities now actually build the needed Workers.		
Config	WORKER-RESERVE_PERCENT in GlobalDefines_advc		
Tbd.	Should train Workers ahead of time, based on Settlers ready or in city queues, available city sites and tech like Calendar or Railroad currently researched. Jungle should also somehow factor in.		
	Fuyu has tried to get the AI to build more Workers as well. His <u>code</u> seems more sophisticated than mine. Should perhaps merge the parts in his <code>cvCityAI.cpp</code> marked with "Build more Workers" (also "Worker Counting"?).		
See also	117: Al chopping; 121: Forts		
Al cities rec	Al cities receive more Workers for local jobs. A rather large portion of Workers gets assigned to no city and builds "territory" roads.		
Rationale	Territory roads aren't that useful; better to improve tiles around a city before they're actually worked. Once a citizen is assigned to an unimproved tile, the AI will send a Worker, but it may take some 10 turns until the tile is actually improved. Better to do it ahead of time.		

114	Changes to AI attack courage	
114a	Breaking sea blockades	
AdvCiv	BBAI	
Al willing to break a sea blockade using inferior ships. Will attack at near-0 odds if the defenders are sufficiently outnumbered.  Al keeps building e.g. Triremes, but never dares to attack even a single Privateer. (Not sure if it would attack with Caravels.)		
	Known issue in BBAI, not fixed by K-Mod. I've also posted about this on CFC, but the code I posted there is now outdated; doesn't fully solve the problem.	
	Would probably be smarter to stop building primitive ships, and wait for better tech.  Also dubious that there is dedicated code for breaking blockades – why should the normal AI behavior for stack combat be inadequate for this?	
114b	Attacks on valuable units at poor odds	

AdvCiv		K-Mod/ Lead From Behind
the cost of th	ne involved units is given less weight ds are onesided.	Some Al leaders and the barbarians occasionally calculate with optimistically increased attack odds. Based on these inflated odds, K-Mod does a kind of expected value computation: attacking a Tank with a Warrior at 5% odds is wise because the Tank is much more expensive than the Warrior. (Of course, the odds are much worse.)
	Warrior against Tank doesn't matter much, but K-Mod barbarians are also too happy to attack advanced units in fortified positions.	

115	Al less willing to commit to victory strategies		
	1		
AdvCiv		K-Mod	
In a game with 7 civs, the AI enters stage 3 (of 4) of the domination victory strategy when meeting 55% of the requirements. More generally, the target percentage for stage 3 is 62 minus the number of civs, and 87 minus the		The thresholds are 50% for stage 3 and 80% for stage 4, and don't depend on the number of civs. However, the requirements themselves do depend on the number of civs (e.g. 64% with 7 civs, 51% with 16).	
number of ci		Victory strategies with stages 1 to 4 were introduced by BBAI. At stage 4, victory is imminent. It's an AI-internal metric.	
Rationale	The K-Mod AI goes for military victories too often (or early) for my taste. The BBAI approach of letting the AI play more rationally is fine, but let's not turn it into a wannabe HoF player.		
share" in a standard game: 2 in 7 is domination 3.		ation and 32% of the land, i.e. about a "double 28.5%. This shouldn't quite be enough to trigger	
		needed for stage 3. That's right between 3 in 7	
	I'm factoring in the number of civs because it is easier to conquer more land when that land is divided among several weak opponents than when it is owned by a few powerful ones.		
See also	112: Al civs less willing to become vassals. 018: Al uses Crush strategy less. 019 makes the Al a bit less inclined to use military strategies in Aggressive Al mode.		
Added a condition that makes the AI less willing No such condition. to go for Conquest victory if there are many rivals on other continents.			
stage is esse Added requi	Escalated the conditions so that the conquest stage is essentially one less than in BBAI/K-Mod. Stage 4 (which becomes stage 3 in AdvCiv), bu Added requirements for stage 4: half of the initial there are also alternative conditions for that rivals, rounded down, need to be defeated.		
Rationale	As above: military victories too commonly pursued. Also: It's problematic when an A civ goes for a military victory before naval invasions become feasible, because it's t difficult for players on other continents to interfere in time.		

When in multiple wars at once, the Al ignores its military victory stage and applies the normal decision process to any war that is no longer recent. I.e. multiple wars are still possible, but the Al won't just refuse to talk.  **Rationale** It's OK that an Al close to a military victory likes to fight wars, but it doesn't have if fight everyone at once.  Space victory not pursued if total production clearly insufficient.  **Rationale** To discourage small civs, say, with just three cities, from pursuing a space victory they want to have a chance, they'll need to expand instead.  115b Stages for diplo victory revised  **AdvCiv** Based mostly on the current (voting) population of own team, vassals and friends. Personality and randomness still factor in; game options don't (unless diplo victory disabled).  Stages 3 and 4 can be run regardless of other victory stages.  Al prioritizes food a bit on stage 4 (grow votes).  **Rationale** This part of the victory-stage code hadn't been revised by karadoc and it didn't deanything intelligent. Checking for peaceful game options isn't good: diplo victories usually half conquest, half diplomacy.  Diplo victory stage 2 factors into decision to build Ponly stage 1 considered for AP/UN. No avoidance.		nditions for culture victory strategies	
(Only relevant if UWAI is disabled.) When in multiple wars at once, the AI ignores its military victory stage and applies the normal decision process to any war that is no longer recent. AdvCiv BtS	AdvCiv		BtS

When near a religious victory, the AI is more inclined to pursue the "Missionary" strategy, and its vassals switch out of Theocracy.		"Missionary" is a BtS strategy that is adopted based on AI flavor and the number of civs with Open Borders and whether they've already converted. Victory doesn't play a role.	
		The AI makes no effort to deal with Theocracy.	
Rationale		n AP victory when all human players are already ave to use Holy Wars to bring down the humans.	
Tbd.	AP victory conditions need to be over makes all the difference in war and v	erhauled. It's silly that a single converted city victory votes.	
gets the cha	The AI proposes the victory resolution when it gets the chance and a team member is at diplo victory stage 4.  AI chooses uniformly at random from all the resolutions that it supports.		
Voting AI abs	Voting AI abstains if it likes two candidates equally.  Votes for the candidate with the lowest internal id; normally humans have lower ids than AI civs		
Tbd.	The AI still proposes random resolutions in all other cases, and this is often agonizing to watch.		
115c	Victory strategies in zero-sum game	S	
Al doesn't pursue Diplo victory when there's just one other team left; Al does pursue Conquest if require at least two other teams.			
there is just (	one other team to begin with.	Conquest1 requires at least one civ to be a vassal or eliminated; doesn't work if there are only two teams at game start.	
Rationale	Both only really relevant for games a	against a single AI opponent.	

116	Changes to raze decisions	
	250b moves the No City Razing option to the bottom of the Custom Game screen.  122 makes the AI raze cities in awful sites.  300 deals with razing by Barbarians.	
AdvCiv		K-Mod 1.44
between 0 a	and 5 is above 0, the city is razed. 0	Raze value is used as the probability of razing a city, i.e. even if the value is just 1, the city might be razed (with probability 1%).
	value. Settled Great People count as	RazeCityProb adds up to 75 ro raze value. Settled GP count as 2 against.
•	stance and finances lowered; impact adjusted to map size.	Cities past a distance threshold are usually razed.
_	aze when controlling fewer than 5 the early game.	Cities conquered in a very early rush are usually razed because of the distance.
		(Some improvements in K-Mod 1.45, but my changes are more comprehensive.)
	K-Mod razes too much and too randomly, and this is among the most common complaints about K-Mod. Leader personality has far too much impact: Genghis Khan has 75 RazeCityProb while some leaders have 0. A city would have to have e.g. 15 settled GP to make up for that difference (assuming each GP counts as 5; in K-Mod i actually only 2), or 5 active wonders (each counts as 15).	
Tbd.	Try to use code from the <u>UWAI</u> evalu	lation of conquered cities.
AdvCiv		BtS
Al factors cultural ownership into raze decisions. Reluctant to raze cities with own majority culture or with majority culture of a partner civ (i.e. attitude Pleased or higher).		
Rationale Diplo penalty is usually not worth it. Can give the city away if it becomes too costly. (The AI knows how to do that).		
AdvCiv		BBAI
reconquered of the previo the city if red	civ conquers a city that, if d, may soon lead to a culture victory ous owner, the conquering civ razes conquest seems plausible (based on a and nearby units).	The dangerous city is razed in any case.
Rationale	The BBAI comment actually said to r condition was there.	aze unless we "overpower" them, but no power

117	Al chops more Forests	
AdvCiv		K-Mod
	Workers and competing Worker	Only chops while building something urgent, or a building in a small city. Then assigns a priority P that is proportional to the chopping yield.
situations w	ically, assigns a priority of 0.5 * P in here the K-Mod AI is unwilling to .5 * P otherwise.	
	pportunities are taken into account.	Chopping seems to happen only opportunistically, i.e. when a Worker is assigned to a city in order to build improvements, it may (afterwards) be instructed to chop if there happen to be Forests.
Rationale	reducing or delaying chopping yields	chopping, but I don't think this can work without s further (beyond what patch 1.61 did). As it on early chopping yields. See also this discussion
	hill Lumbermill has the same yields with Watermill and Farm. As a result	not to cut down Forests along rivers and on hills. A as a mine, and a river Lumbermill can't compete of my changes, AI Lumbermills on hills/ at rivers The other Forests remain largely intact.
Tbd.	The AI should arguably chop even more. I intend to nerf chopping instead, probably by restricting the yield to apply only to buildings and ships.	
I don't mind the current incentive to remove all hill/river Forests.		remove all hill/river Forests.
See also	ee also 113 also includes chopping opportunities in the global estimate for Worker tasks.	
•		The AI never chops Forests on tiles that no city can work on.
<ul> <li>Only wher</li> </ul>	n there is nothing else to do.	
<ul> <li>Not when automated and chopping is disallowed in options.</li> </ul>		
Not if there is already anger from global warming.		
	Possible future cities, distance and the correct timing of the chop aren't considered.	
Rationale	My conditions are simplistic and rather conservative. At least the AI now fells unworked Forests within its own borders at some point.	
Tbd.	The code seems to say that the AI always builds a route before chopping a Fores haven't verified this, and I'm not sure if it's reasonable.	
	Considering to set 0 yield from chopping outside the BFC; then this change will be obsolete.	
See also	119 prohibits chopping on unowned tiles, i.e. the AI doesn't have to worry about those tiles.	
Feature defe chopping.	Feature defense is not taken into account when chopping.  In K-Mod 1.45 ( <u>Git commit</u> ), the AI is more inclined to chop Forests from the inner city ring.	
Rationale	012 (no defense on enemy-owned F	Forests) takes care of this.

118	Al changes regarding peacekeeping votes	
AdvCiv	K-Mod	
Al proposes and votes for peace if it likes both sides and neither side is clearly winning or losing.		Al only seeks peace if it likes the losing side, or dislikes the winning side.
"Like" means that the attitude is strictly greater than DeclareWarThemRefuse-AttitudeThreshold.		"Like" means attitude greater than or equal to DeclareWarThemRefuseAttitudeThreshold.
	A minor thing that vexed me in one game. The AI should stop inconclusive wars between its partners.	
	The second part is probably a bug in K-Mod. A comment says, "if [we] like them enough to not declare war on them", and this isn't what the code does.	
See also	UWAI ( <u>104n</u> ) partly handles peace vote decisions, but 118 still applies.	

119	Can't chop Forest, Jungle outside borders	
Worker builds that remove features can only be built in plots owned by the Worker's team.  Features can be removed from unowned plots and even from plots owned by a war enemy.		
Rationale	Forests being chopped for marginal gains by idle Workers isn't realistic. In part, the problem lies with Workers working for free, but large-scale deforestation without nearby human settlement is strange in itself. Moreover, the AI doesn't chop outside of its borders, and it's easier to change the rules than to change the AI.  Part of an overall effort to reduce and delay deforestation (without inhibiting the AI).	
See also	117: Al chopping on owned tiles that aren't workable.	

120	Usability and AI improvements for espionage	
Rationale	Espionage in BtS is beyond redemption. Focus on the few parts that somewhat work, and try to make the rest easier to ignore.	
AdvCiv	1	K-Mod
Default espi	onage weight set to 0.	1 in K-Mod, was 0 in BtS.
Rationale	Important in the (frequent) situation where a player sets some espionage weights before meeting all rivals. When meeting another rival, a default weight of 0 means the no points are assigned to that rival until the player readjusts the weights in the espionage screen. 1 could mean that a few points are assigned or a lot, depending o the weights set previously.	
	Al less worried (50%) about war opponents naving a leg up in espionage.	
Rationale	It's better to focus on research or entertainment when at war. Espionage is for coldwar situations.	
120b	Al Spies less malicious	
Al uses "malicious" espionage only when Cautious or Annoyed, depending on the leader's no-war threshold. (If no war at Pleased, then  Attitude threshold not leader-specific. With Aggressive AI, malicious unless Friendly,		· ·

malicious at Annoyed; if no war at Friendly, then malicious at Cautious.) Aggressive AI has no impact on AI malice.		otherwise malicious unless at least Pleased.
`	be malicious when planning war or that is close to victory; no change.)	
	them quite well). I like them for flavor,	eneficial for the AI (although the K-Mod AI uses but, flavor-wise, malicious espionage only essive AI still has an indirect effect because war AI leads to more AI war plans.
120c	Hide the espionage slider when it's at 0	
AdvCiv		BtS
, ,		Once Writing is discovered, the espionage slider is shown on the main interface, city screen and Financial Advisor.
Rationale	More room on the main interface. Ma	ny players hardly ever touch the espionage slider.

121	Misc AI changes to Worker builds ar	nd citizen assignment
AdvCiv		BtS/ K-Mod
·		The Worker AI frequently builds Forts on resources that aren't (yet) workable. Forts are alway preferred on these tiles.
<ul><li>How busy</li></ul>	Workers currently are overall;	
<ul> <li>whether th</li> </ul>	e tile has natural defenses; and	
• if a Fort wo	ould function as a canal.	
positive yield over Forts on workable tiles, and replaces the Fort when a tile with a Fort becomes workable (once a Worker finds time to do it; not necessarily high priority).		Once Fort tiles become workable, the AI is hesitant to replace Forts with yield improvements.  Also likes to build Farms and Cottages on revealed but yet unusable resources, and doesn't replace them with improvements that connect the resource later on.
total number of surplus resources also factors in.		civ already has the resource. A second copy is valued only at 20% of the first. (Unless consumed
ments that con replaced – ever resource). Prob	le bug that may have prevented improve- nect a resource – like Forts – from being n by an improvement that also connects the pably not a bug after all. I think my change er priority to replacing Forts.	by a corporation.)

Rationale	I've posted some screenshots about the K-Mod problems here.	
	Forts cost a lot of Worker turns and often have to be replaced later on, so the Al should be hesitant to build them. Possibly a bug in BtS: The Al picks the most expensive improvement; was perhaps intended to be the cheapest (hard to say).	
	My heuristic using natural tile defense leads to a reasonable number of Forts in reasonable locations. Not really smart, but looks good on the surface.	
	Forts can theoretically be better than yield improvements even on workable tiles. A Silk Fort preserves the underlying forest, which is worth 1 production vs. the 3 commerce from a Plantation. 3 commerce is generally preferrable to 1 production, and I don't think the AI can figure out when 1 production is better. Better stick to the obvious improvements.	
	20% for a tradable copy of a resource is a bit low; led to resources not being hooked up. The increase to 33% was enough to tip the scales. Again, connecting the resources is the obvious choice; better most of the time.	
Tbd.	I'm still seeing Forts on workable Silk. I intend to add one commerce to Silk Plantation and Fur Camp anyway, will hopefully no longer happen then.	
	Could also look into Fuyu's Better BUG AI code marked with "Forts Connect Resources but should never be built"; seems to address the same problem as my code.	
	The AI only ever builds Forts as canals on unworkable resource tiles, i.e. under rare circumstances. I haven't actually seen an AI canal yet.	
See also	117 also deals with Worker builds (chopping). 017 makes the AI draft lfewer units.	
AdvCiv	AdvCiv K-Mod	
AI more rel	uctant to use Slavery. The K-Mod AI whips a lot; the BtS AI rarely.	
•	s food more when choosing Worker when assigning citizens.	
Rationale	The AI can't judge well which city production is useful or urgent, whereas a larger population tends to lead to faster research, and that's always good. Short-term production is good for expert players, but the AI should better focus on long-term development. Team NP of the Civ4Reimagined mod have (independently) arrived at the same conclusion: "AI doesn't use slavery as extensively as before which results in bigger cities and stronger AI overall." (source)	
	The AdvCiv AI still whips more than the BtS AI.	
See also	110 shifts yield priorities to match the decreased use of Slavery.	
Tbd.	I intend to remove the sacrifice-population-to-hurry ability entirely.	
Al response to poisoned water and unrest		
The effects of poisoned water and formented unrest don't affect the AI population target, meaning that the AI tends to prioritize food more after a spy attack (in order to keep the current population despite food lost due to anger and bad health).  The effects of spy attacks are treated just like other causes of bad health and anger when setting a population target, meaning that the AI lets its population shrink after a spy attack, may even de-prioritize food.		

Tbd.	The AI should be more upset about poisoned water and formented unrest than about other spy missions. Could implement that, but spies get identified too rarely (25%;
	ESPIONAGE SPY REVEAL IDENTITY PERCENT) for it to matter. Perhaps give these
	missions a 50% chance of revealing spy identity even when the spy isn't caught?

122	Changes to city trades	
AdvCiv		BtS
culture of the	y is traded, e.g. as reparations, the tile ne old owner is decreased in the city the city cross (21 tiles), except for ed to other cities of the old owner.	The old owner's culture is set to 0 in the city and the inner circle. The outer circle remains unchanged.
the same a decreased. equal to 50 of the new I.e. the new and the old In order to I a civ needs culture ther	s to have at least 10 percent tile re. No change to Liberation rules.	The new owner doesn't gain culture.  All cities can be traded between humans. The Al accepts all cities from humans where it has at least 1% culture, and otherwise refuses only if the city is 10 or more tiles away from the nearest Al city, or when in financial trouble (which rarely occurs). Outside of peace negotiations, the Al doesn't pay for cities, which is why cities don't change hands between Al civs at peacetime. Vassals can only receive cities through Liberation; see next blue box. The conditions for Liberation are complicated.
Rationale	the mutual agreement should have so halving the culture. Excluding the out foreign enclaves.  The culture is converted to make the for the consensual change in owners strengthening the influence of third particularly trades should restriction on city trades should restricted.	pear: conversion) of culture is jarring. That said, ome appeasing effect on the population, so I'm er ring can lead to strange borderlines with city suffer less from culture pressure, to account hip (as opposed to violent conquest), to avoid arties, and because culture shouldn't just vanish.
Config	CITY_TRADE_CULTURE_THRESH in Glo	given over to a nation that has no history there.
A master civ can gift any cities to its vassal where Can only <i>liberate</i> cities to vassals. If a vassal isn't the vassal has more culture than the master. The the civ that would receive a city upon liberation, vassal may reject the city; will then appear red on then the vassal can't receive the city at all. the Trade Screen.  A vassal still can't offer cities to its master (or any other civ); no change.		
Rationale	vassals' cities, and that the inverse diberation. Not true in the case of a citand a third civ.	in place to prevent masters from demanding their irection had been assumed to be covered by ty that is culturally contested between a vassal

124	Restrictions on trade	
AdvCiv		BtS
in order to e	stablish a trade route, the owner of	Plots owned by another civ don't need to be revealed. I.e. by revealing a path of road, river
		and coastal tiles up to any foreign tile connected to the foreign capital, trade routes are established

with all foreign cities connected to the foreign capital. Resource trades require a connection to any Resource trades require a connection to the foreign city that is connected to the capital; the foreign capital. capital itself doesn't have to be revealed. I.e. pretty much no change. No trade routes with cities in occupation, and no trade routes with cities whose owners are in anarchy. The BtS concept isn't that unrealistic. If one side knows half of the way and the other Rationale side the other half, trade can be conducted in the middle. Soren Johnson explained this in a Twitch video, naming trade between Han China and Rome as example. I think it's better for gameplay when the other city has to be revealed because this rewards repeated exploration of rival territory, and the game tends to be more fun when you keep updated on rival activities. Also makes Scouts more useful (though still underpowered). The BtS rules are also inconsistent with K-Mod's treatment of unrevealed cities as secret; the trade routes listed on the BtS city screen give the cities away. The occupation/ anarchy rule is just for added plausibility. I've considered excluding blockaded and plundered cities as well, but such cities could still trade across land, i.e. unless the whole landmass is blocked, in which case trade routes are already severed. Tbd. Should tiles owned by a rival block trade unless there is an OB agreement with that rival? Currently (as in BtS), rival tiles only block trade when at war. Iran's control over the Strait of Hormuz is a similar real-world situation; the strait remained open despite the 1995 sanctions. Would like to change the way that cities are matched. The current algorithm creates long-distance trade routes between large cities, but these cities aren't usually the borderland trade hubs that would realistically profit from trade passing through. Boils down to the question if trade routes should be represented from end to end or hop by hop. For resource trades, only one side needs to be Trade connections are always symmetrical, so able to reach the other. this isn't an issue. Want a civ that establishes a trade connection to be able to trade resources right away Rationale (as in BtS), instead of having to wait for the other civ to e.g. also research Saling. This gets a little confusing when trade passes through territory of a third civ (C) that has OB with one of the trade party (B), but not the other (A). Resource trades are then allowed and benefit both A and B; B continues to have trade routes with A, but A loses its trade routes with B. Fair enough, I think; this way, the closed borders between A and C don't harm B. Can imagine that the caravans or ships of B handle resource trade in both directions.

Trade along rivers doesn't require any tech; back Trade along *owned* rivers works from the to how it worked prior to BtS.

Trade along *owned* rivers works from the beginning, along unowned rivers only with

Trade along unowned coasts still requires Sailing. Help text says "Enables trade on Coasts outside own borders".

Trade along *owned* rivers works from the beginning, along unowned rivers only with Sailing. Sailing help text just says "enables trade on Rivers"/ "...Coasts".

Rationale

Not sure why this change was made in BtS; possibly to make Sailing more attractive, but that doesn't work because rivers (unlike coasts) are rarely an important part of trade networks in BtS. The distinction between owned and unowned rivers is pedantic, and confuses players (people ask about this now and then on CFC). Rivers now work

	just like roads when it comes to trade	<u>)</u> .	
Tbd.	Want rivers to speed up movement a Fishing needs a buff more than Sailir	s in Alpha Centauri. Fishing could enable this. ng.	
Al only willing to sign Open Borders with another civ once it has revealed a land tile owned by that civ, or if the Al attitude is one level above the normal OB threshold, i.e. at Pleased in most cases. Otherwise: "We would have nothing to gain."		·	
normal OB t	3 at attitude one level below the threshold when sharing a war, but, if there is a revealed owned tile.	AI signs OB regardless of attitude when sharing a war.	
OB to a hun	ites OB with another AI (or proposes man) 10 turns (on average) after villing to agree to an OB proposal.	20 turns. In between OB proposals to humans, there is a 20-turn delay (no change).	
Rationale	Signing OB on the first meeting has a	always struck me as strange.	
	Once the AI is willing to sign OB with 20 turns.	another AI, it shouldn't wait for another (up to)	
Credits	Got the idea for signing OB more quito 5 turns.	ckly from Civ 4 Reimagined <u>1.3</u> . They even set it	
Tbd.	With Paper, one can still get the AI to should check if it can actually reach a	sign OB right away through map trading. Al any foreign tile before signing OB.	
	The AI makes it a high priority to build at least one naval explorer once it knows Sailing.  The AI prioritizes exploration only until meeting all civs.		
AI considers	AI considers Galley to be suitable for exploration. Unit AI types for Galley are only Transport and Attack. Before Caravels, only Workboat and Trireme have the Explore AI type.		
Rationale	1	he AI needs to explore coasts more reliably. rkboats get picked off by barbarians at some point	
See also	905 increases the speed of Galleys;	this makes them more suitable as explorers.	
plots are aff that is not h	pass through hostile plots if these fected by a naval blockade by a party ostile to the trading civ. In particular, civ itself could blockade the plots.	Trade can never pass through hostile plots and blockades can only prohibit trade.	
(To be clear, blockades don't allow trade <i>with</i> a hostile party.)			
The AI does not use blockades in order to enable trade.			
<del>blockaded.</del> Dis	Water tiles with a friendly unit can be worked despite being blockaded. Disabled again. It's a bit more sensible, but too unimportant to bother.  Blockade prevents tiles from being worked despite the presence of units protecting the tile. Those units will have to engage the blockading unit to make the tile workable.		
Rationale		vers important maritime trade connections es or with some third party. This should not ority.	
	Would be way too much work to get t	the AI to use blockades this way.	

Should the mere presence of a unit in a tile cause that tile to be blockaded? How do you operate, say, a winery in a tile that is occupied by enemy military? Could argue that wine remains available from a stockpile for one turn, and after that turn the enemy has had an opportunity to pillage the tile. Would be nice to have the option of blocking a resource for several turns without pillaging, but I worry that resources would get disrupted too frequently for just one turn, causing AI governors to reassign citizens. Anyway, CvPlot::isTradeNetwork would be the place to implement such a change.

A civ can't trade with a second civ through tiles owned by a Foreign tiles only block trade if at war; OB aren't required for third civ that doesn't have OB with the first civ.

trade to pass through.

One wouldn't expect war and closed borders to make a difference. However, distinguishing between the second and third civ is too difficult to implement, and the rules mustn't block resource trades between two civs without OB. (An exception for resource trades is also too difficult to implement.)

125	Culture from trade routes disabled	
AdvCiv		K-Mod
Trade routes generate only raw commerce.  Trade routes only generate culture if the city tile already has some culture (more than 0 points) of the trade partner. (Decided to disable it entirely instead.)		Trade routes generate foreign tile culture in addition to raw commerce.
Rationale	The only real upside of trade culture is flavor, and I don't think this justifies the added complexity. The confusing part is that trade culture could also be added to city culture (but it isn't). Tile culture from far-away trade partners may be a disadvantage in local border disputes; difficult to say.	
	Unimportant culture in plot help text is another problem. Very small percentages are shown, but this means plot culture sums up to just, say, 97% sometimes, which is confusing. (99% is OK – everyone's used to that.)  Another issue: The Nationality bar on the city screen can show only culture of up to four different civs, and this can't be changed within the SDK.	
Config	USE_KMOD_TRADE_CULTURE in GlobalDefines_advc	

126	Increased impact of handicap on gar	mes starting in later eras
AdvCiv		BtS
(except Fugrants free	ture) to each difficulty setting that technology to the AI. These free only granted when starting in the	When starting in a later era, every civ receives at least all Ancient techs. Neither human nor Al receive free techs beyond those.
	ne human player receives additional on Chieftain and Settler.

receive Ironworking	to those, AI Deity and human Settler g (only AI), Alphabet (only human), , Gunpowder, Steel and Refrigeration.	
AI, more ui later era: a beyond An	nits are granted when starting in a nother defensive unit for each era cient, another Worker for every 2 eras	Every civ receives additional free units in later eras. Al civs also receive free units granted by the difficulty setting. All free units are chosen based on the start era, e.g. Riflemen as defensive units when starting in the Industrial era.
Rationale	Games starting in later eras tend to be much easier to win than normal games, surely, in no small part, because the AI doesn't get a proper head start. No tech advantage, and the extra free units are relatively few compared with the total number of free units, which may even allow a human player to conquer a high-level AI right away.	
Config	The free tech is configured in Civ4Ha	andicapInfo.xml.
See also	301 prevents barbarians from using Copper and Horse until these resources are connected by some city. This used to be a problem with Classical starts – barbarians would have Axemen and Horse Archers right away, whereas the (AI) civs needed some 50 turns to establish access to copper or horse.	
Tbd.	The free techs aren't carefully chose techs; can reconsider the freebies af	n. At some point, I want to change the era of some ter that.
	difficult to win; I've never even finishe	alance issues that make them too easy or too ed a test game starting in a later era. Would be Medieval starts playable; these aren't <i>that</i> different ferent enough to be refreshing.

127	Changes to Al Auto Play				
Tbd.	Options One City Challenge and Always War should apply while in Auto Play. Lots of isOption (GAMEOPTION) &&isHuman() checks to be replaced with new functions like CvPlayer::isOneCityChallenge and CvPlayer::isAlwaysWar that check isHuman()     isHumanDisabled().				
AdvCiv		Al Auto Play mod			
	Play is enabled, the proxy AI civs (i.e man-controlled) adopt the AI	Auto Play doesn't change player handicaps; however, proxy AI civs do benefit from AI bonuses defined by the game handicap.			
difficulty, the human civ normally incurs 100%		In the example, the proxy AI civ incurs 100% times 80% = 80% inflation. Both factors come from Emperor.			
Rationale	For simulating all-AI games, proxy AI civs should play by the exact same rules as the normal AI civs. AI Auto Play could also be used for fast-forwarding a normal singleplayer game e.g. when a human victory looks inevitable. In this case, the huma AI civ should play by the same rules as a normal human. That's not what the original AI Auto Play does (see example above), and implementing it like that actually looks difficult. For development purposes, it's far more useful to treat proxy AI civs like normal AI civs.				
Tbd.	In scenarios with unequal AI handicap settings (e.g. Earth1000AD), the proxy handicap should be set to the default handicap configured in the WBSave for that civ Not sure if that info is somehow accessible.  Currently, the proxy handicap is set to the average of the AI handicaps.				
"Workers lea		Proxy AI civs don't replace improvements and don't chop Forests if the respective options are set.			
Minimized popups (from the "minimize-popups" option) are killed when Auto Play starts.		Minimized popups remain on the screen for some time.			
Rationale	Probably just something jdog had overlooked.				
normally at t means, the	nds at the end of a round, i.e. the end of a barbarian turn. That human civ is treated as an Al civ	Auto Play ends at the end of a proxy-Al turn. During the subsequent round of Al turns, the human civ is already treated as human.			
diplo messa	I turns. In particular, they can't send ges to the human civ, so there can't oups when human control resumes.	If the human civ is not in slot 0, e.g. in a scenario, it is also already treated as human during the Al turns in lower slots.			

Rationale	It's counterintuitive that e.g. running Auto Play for a single turn only skips over the human turn, but not the AI turns.
	Diplo messages upon resuming are problematic because they force the human player to make decisions. Makes it impossible to simulate an all-Al game in chunks of e.g. 50 turns without any human influence. More generally, running Auto Play in multiple short chunks produces markedly different results than a single long run; not good.
	Caveat: While there can't be diplo popups anymore right after Auto Play ends, popups are unusually frequent on the next turn. This is because the last-contacted timers of the AI civs keep decreasing during Auto Play. Put differently: The AI has much to say if you haven't spoken in a while.
Config	It's a Python change (AIAutoPlay.py)
Tbd.	Simulation in chunks may still not be 100% the same as a single run.
	For a fair all-AI game on Noble difficulty, it should now suffice to activate Auto Play on turn 0; for other difficulties, the WorldBuilder is needed for giving the human civ the same initial freebies as the AI civs. Could automate this (special treatment for Auto Play on turn 0), but it seems not quite worth the effort.

128	Al cheats less obviously with visibility				
AdvCiv		BtS			
3		The Unit AI treats all tiles within a unit's search range as visible.			
	ole tiles (e.g. visible by a different Al targeted within the whole search nange.				
Rationale	,	very obvious when AI ships pursue human . (The search range is a multiple of the number of ots of movement points.)			
	Can't just exclude all invisible tiles because this would leave the AI completely unable to pursue units. I also doubt that AI patrols could search for enemy cargo ships effectively.				
		finds targets on invisible tiles, and sometimes behavior human guessing and deduction, which also isn't

of eligible tiles, and thus would normally be		The number of copies of a given resource is proportional to the number of tiles where the resource could be placed.		
Rationale	Make unusual maps a little less unu good idea.	sual and more playable. Not totally sure it's a		
Config	SUBLINEAR_BONUS_QUANTITIES <b>in</b> G	GlobalDefines_advc		
resources of	a kind adjacent to each other, in en placing a cluster of resources on	It seems that a cluster can theoretically fill an entire 3x3 square. The number of copies to be placed on the map in total puts a cap on this, but not on large maps.		
Added a separate resource class for Gold, Silver and Gems. Clusters of these resources are now kept at least 4 tiles apart. Can still overlap within a city's radius, but not in a way that would allow the city to work every resource.		Nothing to ensure that clusters are placed apart.		
Can certainly still get more than 2 Gold/Silver/Gems within a city's radius, but 4 or more should be quite rare now, even on large maps (more testing will tell).		The map generator can produce large clusters of precious metals/stones that make for very powerful (starting) city plots. 5 such resources aren't that uncommon.		
Rationale	Starting plots with more than 2 Gems or Gold tend to be overpowered. Could also be fixed when assigning starting plots or during normalization; however, the cluster placement algorithm also scaled badly with map size, so it needed work anyway.			
See also	108 also weakens starting plots.			
	ry to place at least 0.88 Silver er player, and only 0.78 Gold	1 Gold per player and 0.67 Silver.		
Gold can appear on Snow, Desert and unforested Plairs, river possible, whereas Silver on Snow and unforested Tundra. E can appear on forested Grassland and on Tundra appear next to rivers. regardless of Forest, but not along rivers.				

# Rationale

Gold was arguably more rare throughout most of history. More importantly, Gold is very powerful, and fewer occurrences should improve the game balance a bit.

Allow Silver to appear on forested Grassland to make it more common. Also, restricting Silver to extreme latitudes is, as far as I can tell, completely unrealistic; should probably appear on just the same tiles as Gold. The intention was probably to make Gold and Silver more distinct. I'm trying to keep them distinct, but make it more historically informed. The most famous gold rushes happened in the Australian desert, Alaska and maybe "on the banks of Sacramento", as a shanty says.

Silver can't be or isn't commonly panned from rivers. The densely forested Central European mountain ranges have seen silver rushes in the Early Modern era (Berggeschrey). Grassland Forest also fits with Colorado and British Columbia.

Ancient Egyptian gold deposits and silver in Attica and Baetica also fit.

Gems can only appear on Jungle Grassland (though the Jungle can get cleared near a starting plot); thus distinct from Silver.

# Credits

Inspired by Civ 4 Reimagined <u>1.2</u>, which also makes Silver more common than Gold.

When placing a cluster of resources, the probability of placing an additional resource decreases exponentially with each resource already placed. The potential target plots are processed in a randomized order.

The targets are processed in clockwise order, and each one gets the same probability (25 or 50%, depending on the resource) until the upper limit is reached.

#### Rationale

Make large clusters less likely, especially on maps that have large areas of uniform terrain because such areas are especially likely to receive large resource clusters (e.g. Ivory in a large area of Plains).

130	Changes to AI diplo modifiers ( <u>DDiplo</u> )		
See also	112 deals with vassal agreements; 141: No diplo effect from gifted GP		
AdvCiv		BtS	
130a	Sustained peace		
civ is met. Tl decrease fro	ace" only start to count when an Al ne turns needed per relations bonus om 60 initially to 30 in the middle of ormally AD 1700) and then stay at	Years of peace are counted from the beginning of the game. The relations bonus is one for every 60 turns (and at most 2).	
Rationale	Being ignorant of each other's existence shouldn't "strengthen relations", and civs that have just met shouldn't have strengthened relations. That said, don't want to make it too difficult for civs that start isolated to find partners on other continents. The decreasing threshold should also help keeping "years of peace" relevant after war in the late game – when the game may end in 100 turns, it's almost irrelevant whether relations are going to improve 60 turns from now.		
130b	Personality-based modifiers		
Peace weight reduced to 45% and warmonger respect to 75%, resulting in diplo from peace weight between -2.7 and 1.8, warmonger respect between 0 and 1.5 and their rounded sum between -3 and 3. To this sum, a modifier from handicap is added (normally +1; see 148) and a base modifier (e.g. Gandhi +2, Tokugawa -1; no change).		Diplo modifier from peace weight between -6 and +4, warmonger respect between 0 and 2.  (The peace weight of an AI leader is apparently a measure of that leader's love of peace. It's partly randomized at game start. Leaders with similar peace weight like each other, and leaders with dissimilar peace weight dislike each other.  Warmonger respect says whether a leader is considered to be a warmonger, and warmongers like each other.)	
Rationale	I think these modifiers are intended to prevent warlike leaders from fighting inconclusive wars amongst each other while the peaceable leaders get ahead economically. Fair enough, but it's overdosed, sometimes leading to practically inseperable bonds between peaceful civs. The excessive modifiers make diplomacy overall too predictable from the beginning.		
Tbd.	Warmonger respect, another hidden modifier, seems OK; only in between +0 and +2. When there is a large majority of either warlike or peaceable AI leaders in a game, the small minority doesn't stand much of a chance. Can easily happen when AI leaders are chosen at random. It's less of a problem with the change above, but I'm still considering to adjust the hidden modifiers based on which leaders are in the game. Could adjust the modifiers versus all AI leaders that are too popular or too unpopular overall. Don't want every game to have perfectly balanced diplo though

Example 130c

130d	A master can't be its own vassal's worst enemy, and capitulated vassals can't be anyone's worst enemy		
Rationale	Most of the consequences of worst-enmity don't apply to the master anyway, in particular, the vassal will always trade with the master. That means, a vassal with its master as worst enemy effectively has no worst enemy at all. Perhaps OK, but certainly don't want a vassal to promote trade embargos against its master.		
	<u>UWAI</u> ignores relations with capitulated vassals; to be consistent with this, capitulated vassals should not be worst enemies. Capitulated civs are already marginalized; their enemies should be content with this.		
	Can't ask civs in a vassal-master relationship to stop trading with each other.		
130e	Worst enemy updated upon relations change		
AdvCiv		BtS	
Whenever the relations value of an AI civ changes, that civ's worst enemy is immediately updated.		Worst enemy is only updated at the end of an AI team's turn, i.e. never during a human turn. Attitude is updated immediately though, so, e.g. after making peace with a human civ, if the AI attitude changes from Annoyed to Pleased, the AI will still consider the human its worst enemy for the rest of the human turn.	
Rationale	Attitude and worst enmity should be consistent during human turns.		

130f	Trade embargo changes			
See also	130m: Al requests an embargo when at war and too Annoyed to ask for military aid.			
Tbd.	_	Would be nice to let the Foreign Advisor show the time-to-cancel for deals between other civs. Would have to happen in CvGameTextMgr::getDealString.		
	A dozen AI leaders have stricter attitude thresholds for embargos than for sponsored war (Alex, Brennus, Hammurabi, Mansa Musa, Mehmed, peter, Roosevelt, Saladin, Suleiman, Suryvarman, Wang, Yaqob; maybe more when <code>THEM_REFUSE_ATTITUDE</code> is counted as well). E.g. when Mansa Musa is Pleased or Cautious, he can be persuaded to begin a war, but says "We don't like you enough" when it comes to embargoes. He likes to trade, and I guess war is seen as a trade in this context (hired for war) and embargo as sth. that severs trade; but of course an embargo is also a kind of trade and a hired war also severs trade  These leaders should perhaps be willing to stop trading when willing to go to war, but only for a high price.			
AdvCiv		BtS		
	vassal and peace treaties, a trade ancels all deals, including those ned.	Embargo doesn't affect deals with a positive number of turns left to cancel.		
Rationale	It's confusing when some deals aren't canceled, especially between AI civs because players can't see which inter-AI deals are recent. This contributes to embargos being largely irrelevant, and allows players to undercut AI embargo requests by renewing resource trades every 10 turns.

War on capitulated vassal: Relations toward a capitulated vassal should basic never matter; see change <u>130v</u> .					

No penalty if the AI civ has war-on-friend memory about the attacked civ and the attacked civ has recently attacked a liked civ (i.e. the liked civ has war plan "attacked" or "attacked recent").				
Rationale	If the AI is unhappy about a civ under attack, it shouldn't be unhappy about a third civ attacking the aggressor (even if the AI still likes the aggressor).			
Tbd.	Not nice that this depends on information that the player can't see (Al war plan type).			

130i	Diplo modifier from Open Borders (OB)	
AdvCiv		BtS
the OB coun each time wi This probabi from trade ro	at an AI civ has OB with another civ, ter of the AI is incremented twice, th the same probability (cf. 130k). lity is based on the AI civ's profit outes with the other civ and the seness value (cf. 107) between the	The counter just counts the number of turns that the two civ have had OB.
Rationale	It had been too easy to please the AI, and, consequently, there wasn't enough warfare overall. See for example this game report of mine played with v0.87, prior to change 130i. In particular, civs that never had much to do with each other were often unwilling to go to war when they came in closer contact through Galleons or conquest.	
See also	149 has the same aim.	
<u> </u>		OB memory never decreases. When borders are closed, the relations bonus is suspended until they are open again.
The OB memory has an upper limit of 60.		The relations bonus is +1 for every 25 turns. Although the bonus is capped at 2, the OB memory keeps increasing after 50 turns with OB.
Rationale	Mostly for consistency: all diplo memory and counters decay (130r, 130k). Regarding the upper limit: otherwise OB that have lasted for, say, 250 turns would never decay to the point of reducing the relations bonus.	
130j	Friendly AI more resentful about bad actions, Annoyed AI happier about good actions	
Tbd.	Should Pleased AI civs also be touch	ıy?

When an action displeases the AI, it adds 1 to corresponding memory if it's already Annoyed or and for each type of action, e.g. DoW or an Furious, 3 if it's Friendly and 2 otherwise. When an action pleases the AI, it adds 1 if already Friendly, 3 if Annoyed or worse and 2 otherwise. This results e.g. in -4 relations for a DoW on a Friendly civ, and only -2 if they're Annoyed.

This faster increase and decrease of memory is all memory types, and the impact of each remembered action is halved.

Since each action normally corresponds to a memory value of 2, it's unlikely for an action to be 10% probability). completely forgotten after a few turns, or to be remembered fully for a long time.

"You razed our cities/ a holy city" and "You nuked us" work differently; see 130g. (But not "You nuked our friend".)

The AI stores separate memory about each civ accepted tribute request. When a diplo action occurs, the respective memory is increased by 1. The current AI attitude has no impact on this. (Although the AI e.g. doesn't make tribute demands at Pleased.)

The decay speed depends on the memory type evened out by 100% faster decay than in BtS for and leader personality. E.g Alexander remembers accepted tribute for 50 turns on average. That said, he could also forget about it within just 5 turns or still remember it after 115 turns (both ca.

### Rationale

To make relations more dynamic. Also more plausible that a civ leader would be more indignant about a DoW by a friend than by an enemy. The decreased randomness is a welcome side effect.

It doesn't make sense to base the diplo penalty for razing and nuking on attitude because these penalties only occur when already at war, and, then, the enemy attitude is usually Annoyed or worse. One could, alternatively, treat raze and nuke like the other diplo actions, but increase their base penalties; however, this would also affect razed cities with culture of non-war parties (which aren't necessarily Annoyed), and the BtS base penalty of -2.5 is already severe in this case.

## 130k

Some randomness added to AI diplo counters

Counters relevant for diplo increase and decrease probabilistically by either 0, 1 or 2 per

When the condition for increasing a counter is not met, the counter is decreased by 1.7%.

The AI keeps track of the number of turns spent in a certain relationship with another civ: war/peace, shared/opposed religion, shared civics, resource trade, defensive pact, OB, shared war. E.g. the defensive pact counter is increased by 1 on every turn that the two civs have a defensive pact, and decreased by 1 otherwise.

Rationale

While memory decay (130i) is too unpredictable in BtS, the counters are too predictable. E.g. the "years of peace" bonus kicks in after exactly 60 turns.

Exponential decay should make diplo bonuses from counters less sticky.

130i deals with the OB counter, and 149 with resource trade.

1301	Accepting an AI request reduces memory about a past rebuke and vice versa	
AdvCiv	BtS	

# (disabled by default since v0.85)

civ, memory about previously denied requests of separately, and entirely so. the same type is reduced by 1. Likewise, a denied request reduces memory about previously granted requests. Since each request normally adds 2 occurrences to memory (see 130i), subtracting 1 does not always have a visible effect.

The following request types are affected by this change: help, tribute, change religion, change civics, join war, stop trading. Requests of differing types do not affect each other; e.g. granting tribute does not erase memory about denied help.

When an AI diplo request is approved by another Accepted and denied requests are remembered

		Another means to turn bad relations around, and vice versa. Fairly low-key, I think. Multiple AI requests in a row don't happen often, and only 1 memory is subtracted.
		After some testing, I find that I never pay attention to this, and the other mechanisms for improving relations seem sufficient. Disabled in order to make the mod a little less complex.

Config Can enable this change again through ENABLE 130L in GlobalDefines advc.xml.

This counter never decreases, meaning that the relations bonus remains for the entire game. It is only suspended while the former war allies are at war with each other.  The shared-war counter also mattery for Permanent Alliances. The AI only agrees to those after at least 40 turns of shared war.
remembered but decay by still lasts). The shared war in the shared-	d losses) in the shared war are by the AI beyond the end of the war, 1.5% per turn (even while the war ne relations bonus for a remembered s suspended if the former ally isn't current war.  War counter decays by 0.1 per turn war no war is being shared.	

### Rationale

The everlasting relations bonus was reported as a potential bug for the **Unofficial** Patch 3.13, but didn't get patched, and I agree that the BtS behavior is probably deliberate. That said, a permanent relations bonus is clearly too big a reward for just staying at war. My change should ensure that you need to fight alongside the AI in (somewhat) good faith in order to get the relations bonus.

don't think players need to know the specifics of the war success formula; I hope it works pretty intuitively.

No shared war bonus if either war ally is a capitulated vassal.

Shared wars can bring a master and its capitulated vassals closer together.

No defensive pact bonus for capitulated vassals. All vassal agreements are treated as defensive

pacts when it comes to relations bonuses.

#### Rationale

Capitulated vassals are dragged to war by their masters. They should generally be unhappy about that. At best, the shared war experience can make up for this unhappiness.

Al less likely to ask for military aid if the war is still recent; same frequency overall. If Annoyed towards the player, the AI asks for an embargo instead of joint war. Past wars by the human don't matter.

Al civs on whom a human civ has declared war in the past don't ask that human civ for military aid. but the current attitude isn't an obstacle.

the player recently made peace with.

Also less inclined to ask for war against a civ that Can't ask if there's peace treaty, i.e. for 10 turns; beyond that, recent peace doesn't matter.

#### Rationale

A joint war is asked too much from a civ that the AI considers to be an adversary. (Or they could ask, but they shouldn't be mad when denied.) Embargo requests should generally be more common when the AI is at war.

If the player has recently been at war with the target, then, apparently, the player is unwilling or unable to defeat the target. Also don't want the AI to drag players into the same war repeatedly.

Fighting against units inside another civ's borders War success has no impact on the shared-war diplo, no matter where it occurs.

is extra effective at increasing the shared-war memory. Of course, these units need to be hostile to the tile owner. Losing a unit in such a fight counts as much as defeating a hostile unit.

Barbarians count as hostile in this context, i.e. it's possible to get a "mutual military struggle" bonus without even sharing a war, just by fighting barbarians inside the other civ's borders. Fighting barbarians elsewhere doesn't help though, and the bonus won't exceed +1 unless there is or was previously a shared war.

Units with hidden identity (i.e. Privateers) also count (but not if the Privateer belongs to the plot owner).

### Rationale

If someone engages enemy units in the AI's territory, that someone is really being helpful, and not just competing for loot; the AI should appreciate that. Regarding barbarians, I sometimes find that my, say, scouting Chariot could help an AI civ against barbarian invaders, but BtS gives me no incentive to do so. The change should make these situations more interesting.

130n	Religions that the AI has only recent	ly encountered cause a lower diplo penalty	
AdvCiv	1	BtS	
that don't know a single city with that religion.		The diplo penalty applies almost fully (up to -3) upon meeting a civ with a different state religion. After 5 turns, it gets 1 worse.	
Rationale	To help initially isolated, religious AI civs to catch up through tech trade once they meet their rivals. In BtS, everyone tends to be Annoyed towards the newcomer. Should also lessen religious animosity in the early game, but won't delay it for long.		
	Also doesn't make sense to me that he/she first hears about it.	a civ leader instantly hates a religion when	
130o	Changes to made-demand memory		
See also	130v prevents vassals from acceding 144: refusal of gift request.	g to tribute demands from rivals.	
When a human player declares war on an AI civ (primary DoW; not through DP), and that AI civ remembers having paid tribute to the player, the AI civ and all non-vassal AI civs that it has met set their recent-demand memory about the player to 8, which (due to change 130j) means that they won't consider any requests for help or demands for tribute by the player for (on average, on Normal speed) 80 turns.			
player does granted trib demand", a on average. of a denied	f the AI denies a demand for tribute, the human player does not receive a diplo penalty. Only granted tribute results in "You made an arrogant demand", and this memory decays after 30 turns on average. I.e. the only negative consequence of a denied demand is that the recent-demand memory increases.		
Accepting tr	Accepting tribute still results in a peace treaty.		
tribute also memory as	An AI civ that is attacked despite having paid ribute also increases its declared-war-on-us memory as if it was Friendly toward the attacker, which normally results in a -4 penalty.		
signs a vass	When an AI civ declares war (primary DoW) or igns a vassal agreement, it sets all its arrogant-lemand memory to 0.		

Rationale	before attacking them anyway. Not at	yers to demand tribute from civs about 10 turns t all how tribute should intuitively work, not how it a human player, and not an interesting decision.	
	and low-effort. I removed the penalty	ny ways. My approach is supposed to be low-key for failed demands because players need to be f it hasn't, it's OK to attack. Moreover, a penalty ading.	
	Not sure if the penalty (no requests for impossible to routinely receive tribute	or 80 turns) is painful, but at least it makes it before going to war.	
	Not ideal that the safety period is tied	to memory decay, and thus randomized.	
		nange to AI civs that declare war after receiving quest or demand anything from each other, so emory would have no effect.	
		arrogant demand" penalty for unsuccesful tribute diplo memory ("exacted tribute") to distinguish the

Rationale	why do the other AI civs not care whe	dn't apply to Gandhi, which would be strange: en Gandhi is attacked after paying tribute? he may well be the leader with the most extreme	
When the AI disregards a request for a gift or a tribute demand because it still remembers a recent request or demand (both based on recent-demand memory), recent-demand memory is only increased by one, meaning it'll take half as long as in BtS until the next request/ demand is considered.  Also, each tribute demand (regardle success) further worsens relations, maximum of 10 demands. I.e. one considered.		it takes 40 turns on average until another request is considered. Also, each tribute demand (regardless of success) further worsens relations, up to a	
Rationale	Thanks to change 130j, there's now a begging. 40 turns is awfully long.	a lighter punishment available for aggressive	

## If UWAI is enabled:

The AI remembers for 10 turns on average (plus Only remembers "You gave us tribute" (for 50 the duration of the peace treaty) whether a human has recently accepted a demand.

While the peace treaty from the demand lasts, the AI doesn't plan war against the human. After the peace treaty, so long as the demand is remembered as recent, the AI treats the human as if its attitude was at least Pleased (as far as war planning is concerned).

turns on average), but not whether the tribute was granted recently.

The BtS AI never plans war during a peace treaty, but the K-Mod AI does; and the K-Mod AI is able to declare war shortly after the peace treaty ends.

### Rationale

Since humans are now encouraged not to attack shortly after receiving tribute, it seems like a double standard when the AI does it.

130p	Fair-trade bonus and rival-trade pen	alty reworked
AdvCiv		BtS

When computing relations, the total recorded gold value is divided by the has-met counter, i.e. the number of turns the two civs have known each other.
Rationale  The BtS formula works OK for Normal speed in the first third becomes too sensitive later in the game (because trade value the has-met counter), and on slower game speed settings. I results for civs met in the middle of the game; a small gift can bonus or -4 penalty, and modifiers can decrease rapidly as increases.		ame (because trade values increase faster than game speed settings. It also produces weird he game; a small gift can be enough for a +4
	exponential decay each turn (instead and has-met counters). Game score	by recording normalized trade scores and applying d of implicit decay through increasing trade values seems well suited for computing trade scores use at a similar pace as trade values.
	each other for a long time than betw	tend to be higher between civs that have known een civs that have recently met. It does, e has-met counter, but the effect is now much
Tbd.	Make this more sensitive when tech	trading isn't allowed.

Open Borders with a worst enemy contribute significantly to the relations penalty. The impact is based on the number of turns that the two civs have had OB. None if the borders aren't currently open.  OB (and Defensive Pact) have no impact on the fair trade bonus, and don't contribute to trade memory.  Ongoing deals factor into the trade memory fo both fair trade and enemy trade, but, for OB (a DP), the deal value is so small that the impact negligible. Resource trades have a non-negligible (though small) impact. All ongoing deals factor into the trade memory fo both fair trade and enemy trade, but, for OB (a DP), the deal value is so small that the impact negligible. Resource trades have a non-negligible cause the Al to demand a trade embargo.			
canceled (ex	es to sign a DP if a DP was recently explicitly canceled or through a war one of the signatories).	The Al refuses to sign recently canceled OB, but, for DP, there is no such restriction.	
Rationale		y civ, may even be crucial at wartime, so I don't trade embargo is a sufficient penalty.	
	deals immediately reduces the enem	e trade memory, so that cancelation of those ny trade penalty. This can't be abused (in DP just for one turn because of the Al's refusal to	
	DP needed this kind of restriction an	yway; too easy to flick DP on and off in BtS.	
See also	See also  130t factors attitude and worst enemy into anger about rival DP.  dlph.3 keeps DP intact after a foreign DoW.  550a gives civs that have fallen behind better deals by adjusting trade values. This adjustment factors half into the trade score relevant for relations.		
Tbd.	May have to dial this up once there is tech diffusion from OB.		
		ate OB/ DP if the other side cancels them. Not on memory is added in CvDeal::endTrade; rAI::AI_doDiplo.	
	Peace treaties should perhaps also a for a gift or tribute to avoid getting as	add to the enemy trade penalty. Can currently ask sked to join a war.	
"Our defensive pact proves" applies only wher currently in a DP.		Doesn't check if currently in a DP. The relations bonus is based on the number of turns spent in a DP. That number counts backwards when not in a DP.	
Rationale	More intuitive this way, and consister	nt with how the OB relations bonus works.	
Reduced impact of OB and resource trades if the worst enemy has OB with many civs.			
Rationale	Rationale An AI civ can't afford to be mad at everyone. This is less of a problem for tech trad because one civ can only do so much tech trading.		
Decreased t	the impact of gifts vs. trades a little.	The AI tracks both gifts and traded items. Gifts are hated three times worse than traded items.	
Rationale		so bad because the worst enemy has to give ominated by tech trades, and giving away tech it's very much win-win.	

	pact on rival trade if the AI relations enemy and the enemy's trade similarly bad.	When an AI civ dislikes two civs equally, and one of these enemies trades with the other, the distinction of "worst enemy" can oscillate between the two.
civ reduces i	orst enemy of an AI civ changes, that its rival-trade memory about trades ner) worst enemy by one third.	Even if the AI reconciles with its worst enemy, it continues to be mad at civs that previously traded with its former enemy.
Rationale	worst enemy becomes itself the worst when the worst enemy changes, "yo	ng situations where a civ that trades with the st enemy. This can seem erratic. That said, even u've trade <b>d</b> with our worst enemies" remains true. but that could drop a -3 penalty to -1 due to
the AI is at p AI isn't at wa wars (e.g. or	When picking the worst enemy, civs with whom the AI is at peace are only considered when the AI isn't at war with anyone. Exception: Dogpile wars (e.g. on request of another civ) have no impact on worst enemy.	
Rationale	Rationale Trades with a war enemy are much more likely to harm the AI than trades with some cold-war foe.	
See also	See also 001e fixes a bug that causes the AI to make a stop-trading demand against a civ that has just stopped being its worst enemy.	

130q	Nuke and raze memory based on city size	
	130j exempts raze and nuke memory from being affected by attitude; 650 deals with other changes to nuclear war (minor so far).	
AdvCiv		BtS
this as 1 to 3		Each nuke counts as 1 bad action (which is equivalent to 2 bad actions given change 130j), even if it only hits a ship in the middle of the ocean, and nukes always trigger "you nuked our
	counted as 1, partners of the nuked upset ("you nuked our friends").	friends". Each razed city counts equally (unless it has 0
Razed cities count as 2 bad actions in the case of a significant city, otherwise 1.		city culture and a dead civ has the highest city culture; see change <u>099</u> ).
	It should make a difference whether a city is hit at all, and whether it's, say, the capital or some backwater.	
	Raze anger generally seems a bit hi now, lower the anger a bit overall by	gh, or just ineffective at discouraging razing. For exempting minor cities.
Tbd.	The raze mechanism needs to change so that it takes multiple turns (or multiple units).	
	The raze popup should say how grea	at the anger will be.
The AI isn't upset about a nuked friend if the owner of the nuke is or used to be a friend that has itself been nuked at least as badly.  Rationale Don't hate both sides of a nuclear war if it's just tit for tat.		The AI only checks whether it's at least Cautious towards the victim.
		ar if it's just tit for tat.

AdvCiv	K-Mod
trouble unless no units other than cargo units remain.	As far as I can tell, nukes are disbanded before most any unit. BtS tried to save expensive units, which is fine in the case of nukes, but K-Mod focuses on XP, which is generally better, but fails for nules.

incidents of	(power law) decay: The more a kind the AI remembers, the faster it get each of them.	Decay is linear in the number of turns that have passed.
Rationale	There should always be a route to reworth pursuing).	econciliation (though it doesn't always have to be
speed using Golden Age	obabilities are adjusted to game the same (moderate) modifier as for s: 100% slower decay on Marathon, on Epic, 20% faster on Quick	The various AI memory values are decremented each turn, each with its own probability. The probabilities are the unaffected by the game speed setting.
Rationale	The contact delays are unaffected by game speed, which means that the AI does e.g. ask for help more often in a Marathon game than in an Epic game; however, there aren't normally twice as many requests on Marathon than on Epic because certain other conditions need to be true for each specific request, and other remembered events, such as declared wars (now subject to decay as well), aren't controlled by contact delays, and don't happen that much more frequently on slower settings. So, a middle ground is needed.	
Tbd.	Perhaps the contact delays should be increased a bit on the slower settings. It would make sense to tie help requests to research speed, but, for hired war or requests to stop trading, this would be too slow; so, again based on the Golden Age modifier, I guess	
Transformed the independence bonus into a memory-based bonus to let it decay. It's treated as 10 memory decaying at a rate of -1 every 30 turns on average (Normal speed).		A liberated colony is forever +10 grateful to its old homeland.
Rationale	Just to be consistent with the "every	thing decays" paradigm.
	s decays by 3% each turn; that's a 75% after 10 turns.	War success doesn't decay; only reset to 0 when a war ends.
Rationale	Rationale In long wars, initial successes tend to have too much weight.	
Tbd.	Initial successes should perhaps be ignored entirely, or decay very quickly because they're often owed to surprise and thus not a good estimate for the future course of the war.	
	Resetting war success at the end of a war isn't smart because war could break again only 10 turns later, but I think a lot of code assumes that war success is 0 at peace, so this might be difficult to change.	
See also	UWAI remembers the overall outcome of a war before war success is reset.	

No decay of declared-war while the war lasts. Same goes for war-on-friend memory while at war with a partner.		No decay of either memory type ever.
Rationale More plausible that forgiveness can war-on-us memory was decaying to		t happen while the transgression is ongoing. Also, o fast without this restriction.
Recently-canceled memory (about OB, DP and VVA) can only decay half (from 2 down to 1) while at war.		No recently-canceled memory about DP and VVA. AI often willing to sign OB right after a war ends.
See also 130p introduces recently-canceled memory for DP and 143 for VVA. 130j cour memory at a finer granularity, which is why canceling a deal sets recently-can memory to 2.		

130s	Accepting to join a war gives +1 relations	
AdvCiv		BtS
war aid, this is remembered as "You agreed to come to our aid in wartime." for 100 turns on		The relations effect, including the explanation text, is implemented, but disabled in Leaderhead XML. The duration is set to 150 turns on average.
isn't sharing	s suspended when the human civ any war with the AI civ and the AI civ least one war.	
	The thankless help requests bother some players; military assistance shouldn't be treated as a matter of course – that's what defensive pacts are for. Perhaps the original developers felt that the shared-war bonus is enough reward for a declaration of war, but now that the shared-war bonus is harder to get (change 130m), it should be OK to reward the granted request specifically. 150 turns seems a bit much though.	
Config	Can be disabled in GlobalDefines_advc.xml. (Or in Civ4LeaderHeadInfos.xml, but there, the change would have to be made for each leader individually.)	
See also	130m should make the timing of help requests more predictable.  104i (UWAI) makes the target of a joint war refuse to talk as in BtS, thus preventing the hired civ from making peace immediately.  145 also suspends a diplo bonus when the human is no longer in compliance.	

130t	Diplo penalty for Defensive Pact based on relations towards third party	
See also	130p makes the AI refuse a DP if recently canceled, and exempts DP from enemy trade and fair trade diplo.	
AdvCiv	BtS	

The relations penalty from an AI civ X towards a civ Y for having a defensive pact with a rival Z of X is based on the attitude of X towards Z. There is no penalty if the attitude is one higher than the DeclareWarThem threshold, or when X also has a DP with Z, or when X is too weak to attack Z regardless of the DP.

The DeclareWarThem threshold is at Annoyed for e.g. Darius, at Cautious for e.g. Hannibal and at Pleased for e.g. Julius Caesar. (And at Friendly for Catherine, but this is no different from Pleased in this case because I'm using the threshold plus 1, and Friendly is the highest

No penalty if X has a DP with Y; attitude doesn't matter.

### Rationale

possible attitude.)

BtS doesn't properly factor DP into enemy trade diplo, and I think it's better to have all the negative DP diplo in one place anyway. A DP of Y with both X and Z shouldn't satisfy X and Z unless they like each other. In this constellation, Y threatens war on X if X should attack Z, which should offend X. Y also promises to protect X; but this is covered by the DP bonus (no change to that).

As for the threshold, I've considered using the DefensivePactRefuse threshold from the Leaderhead XML, which is Cautious for some leaders, but a leader that is quick to sign DP shouldn't necessarily be forgiving about rival DP. (The opposite could be true: these leaders think that DP are important, and are therefore worried about rival DP.)

Warmongers tend to have high DeclareWarThem thresholds (easy to convince to declare war). These leaders should be bothered most by DPs.

Al refuses to sign DP without OB: "Surely, you must be joking."

Rationale How are you going to defend us without entering our borders??

Anger about rival peace vassals works the same see 130w way as anger about defensive pacts.

Rationale Voluntary vassal agreements are much like defensive pacts.

See also About capitulated vassals, see <u>130w</u>.

130u	Proxy AI treated as Cautious	
AdvCiv		BtS
over for a h	ning in the background, ready to take uman player, is Cautious towards o matter what happens.	The proxy AI computes its attitude just as if it were in control.
Rationale	Should only make a difference when a player drops out in multiplayer. With my change, the proxy AI e.g. doesn't take note of trades with the human's worst enemy (doesn't have one) until the AI takeover. This is more fair to the remaining players because they can't see who the worst enemy of the AI is until it takes control.	
Tbd.	There are probably some places in the code where a proxy AI remembers something based on AI leader attributes that shouldn't apply to a human. Less problematic than the attitude-based behavior.	

See also	130v lets capitulated vassals mimic their masters' attitude. In the case of a human	
	master, this attitude is Cautious.	

130v	Masters are held responsible for their vassals; vassals as zombies	
See also	K-Mod disables vassal-master attitude sharing; <u>UWAI</u> disregards capitulated vassals as war targets; <u>130d</u> makes capitulated vassals ineligible as worst enemies. <u>130t</u> bases the "vassals to your empire" penalty on attitude in the case of peace vassals, and 130w penalizes expansionism through vassals and conquests. <u>130y</u> and <u>130h</u> reduce war-based diplo penalties for vassals, taking into account that vassals don't have a choice in starting wars. <u>099c</u> prevents master cities from flipping to vassal, and <u>025</u> reduces the culture spread of capitulated vassals. <u>143b</u> prevents capitulated vassals from building nukes. <u>014</u> makes capitulated vassals ineligible for team votes, stops them from pursuing victory and from building great wonders. <u>112b</u> changes conditions for capitulation. <u>130f</u> lets capitulated vassals agree to embargoes for free.	
	CFC discussion about the relationsh Link.	nip between capitulated vassals and their masters:
Tbd.	Would prefer temporary capitulations of work to implement.	s to the zombie approach, but this would be a lot
	As it is now, capitulated vassals should perhaps only be allowed to trade te their masters. Or just prevent them from brokering to other civs. That said, currently keeps its vassals (capitulated ones too) at arm's length tech-wise; have to be changed if vassals can't trade or broker.	
AdvCiv		BtS
If a capitula	ated vassal	Actions of a vassal don't reflect on the master,
• razes a (	(holy) city;	but civs are generally upset about "rivals" being vassals to the master's "empire", and vassals are
• trades with someone or someone's enemy;		possible war targets. Prior to K-Mod, the Al
• has OB	with someone's enemy; or	attitude towards the master was generally lowered based on the attitude towards the vassal.
• nukes so	omeone (but not just someone's friend)	
half of the resulting relations modifier is applied to the vassal, and half to the master.		
	oenalties about shared borders are d between vassal and master.	
In team ga of the mas	mes, the penalties apply to the leader ter team.	
Rationale	My thinking is that there shouldn't be grudges against capitulated vassals because they're basically dead already. This opens up a loophole: A human master could let vassals do the dirty work (razing), or use them as buffers against shared-border anger.	
	The change about nukes is obsolete because <u>143b</u> now prevents capitulated vassals from having nukes.	
	BtS attitude averaging would fix this issue, but also punishes the master for e.g. the vassal's religion and any bad deeds prior to the vassal agreement.	

Vassals are always Friendly towards their master, Voluntary vassals are Friendly towards their and capitulated vassals share the master's attitude toward rivals, but their attitude can be at free. The attitude of and towards capitulated best Cautious. Al civs project their attitude towards a civ onto the capitulated vassals of that civ.

master except when deciding whether to break vassals is computed normally, but rarely matters.

This does not apply when a vassal is deciding whether to break free.

Sometimes a (capitulated) vassal has a much more positive attitude towards another civ than its master, and will trade away technologies that the master wouldn't trade.

Masters are Pleased towards their capitulated vassals, and capitulated vassals are Pleased toward fellow vassals with the same master.

> When a vassal grants a gift to a rival or receives one, a peace treaty is signed between the master and the rival. Thus a civ with multiple vassals can sometimes be kept at peace indefinitely.

Vassals never grant gifts to rivals and never ask rivals for gifts.

Capitulated vassals are slightly reluctant to found Capitulated vassals with few cities left tend to found cities in marginal spots because the additional expenses (esp. for number of cities and civics) are small. The additional maintenance for the master isn't taken into account.

cities, especially on other continents.

## Rationale

Given my other changes, the attitude of and towards capitulated vassals really doesn't matter anymore, and showing them, as is often the case, Annoyed towards their master is merely misleading. I'm still showing the actual relations value (e.g. "Friendly (-2)") and modifiers because they do matter again if a vassal breaks free.

If vassals are supposed to be zombies, they shouldn't be relevant for tech trading, and they generally shouldn't undermine the master's foreign policy. Until v0.85, I had capitulated vassals share the master's attitude toward other civs, but this made it too easy for a human player to dictate civics and siphon gold from vassals with AI masters; now they're at best Cautious toward rivals.

130w

Penalty for expansionism: "We oppose your ruthless expansionism"

Up to -4 based on the number of owned cities with foreign majority culture (depending on the difference between highest culture and owner's culture), the total number of cities, and the personality of the AI leader (peace weight minus warmonger respect). The penalty is reduced if the AI civ's military can't compete with that of the expansionist civ.

The AI is (much) more sensitive about cities it previously owned. Other than that, so long as just about a third of a civ's cities are foreign, none of the other civs will mind.

Up to -5 for the number of capitulated vassals, typically about -1 per vassal, but it depends on the number of cities owned by the vassal, the initial number of civs, and (as above) AI personality and power ratio. This penalty is added to the one for voluntary vassals (130t), and they're displayed together as "We are worried about our rivals being vassals to your empire".

If a civ has at least one vassal, the "vassals to your empire" penalty is based on the military power of the master and all its vassals. Other than that, there are rank-based penalties (130c).

Rationale	Not fair to give a penalty based on military power only to civs that control a vassal. A civ that just conquers all cities isn't less threatening. Since I don't want to remove the vassal penalty, I'm adding a counterpart that penalizes conquered cities. Penalizing military power isn't good because that hardly affects human civs.	
	The personality-based term means that e.g. Genghis Khan won't get upset about expansionism, which is consistent with his own behavior and his first-impressions bonus with other warmongers. Also don't want all leaders to increase the penalty synchronously because, then, conquering a single city could have a big negative impact on relations overall; the personality factor makes sure that the overall effect changes smoothly.	
	The power ratio is factored in because it doesn't help if small civs stop trading with expansionists – this mostly hurts the small civs.	
	As razing doesn't remove tile culture, this penalty can't be circumvented by razing (and razing carries its own diplo penalties too).	
See also	Without <u>099</u> , this change wouldn't really work because cities conquered from eliminated civs wouldn't count.	

130x	Normalized diplo from shared/different religion and civics	
See also	130n delays the diplo penalty from "heathen" religion	
AdvCiv	BtS	

The maximal relations bonuses from shared religion and civics are reduced if many known civs have this religion or civic. The maximal penalty for having a different religion is reduced if many known civs have a different religion.		The AI counts the turns that religion and civics have been shared or have differed. The relations modifier is based on that turn count, but limited fby a leader-specific bound. That bound is between +2 and +6 for civics (+6 only for Stalin, Mao and Gandhi), between +2 and +7 for shared religion (+7 only for Asoka and Zara Yaqob) and
		between 0 and -2 for differing religion.
		Unaffected by the bound: +1 for shared religion/civic and -1 for differing religion regardless of the number of turns. The civ with the holy city adds another +/-1 for religion.
Rationale	The high diplo bonuses from early civics, especially Hereditary Rule, are too easy to get, and diplomacy gets boring when everyone's in the same religion.	
	The change seems also realistic: if everyone shares a trait, it gets taken for granted, and lack of external enemies leads to infighting. And it's unwise to eschew everyone when they all have "heathen" religions.	
Tbd.	Diplo bonuses for religious civics should be reduced (or disabled) if the state religion doesn't match. Shouldn't get a net relations bonus for sharing, say, Organized Religion with Suryavarman despite running a different religion.	

130y	Lower diplo penalties for wars involving vassals, DP or seeing little action	
AdvCiv	1	BtS
When making peace, the declared-war relations penalty is reduced (but not below -2) if the other side has made little war success (less than about the equivalent of capturing a city).		The declared-war penalty is solely based on the number of declarations of war; only the (unimportant) hidden "this war is going badly" penalty is based on war success.
capitulated v reduces its o	vassal. A capitulated vassal also declared-war penalties when it ndependence.	When declaring war on a master civ, war against the vassal civs is implied, and the aggressor gets the full (never decaying) -3 "You declared war on us" from each vassal, even if the war takes place
capitulated to a third civ, the third civ		entirely in the master's territory, and ends up freeing a capitulated vassal. Likewise, when a master declares war, its vassals suffer a -3 relations penalty.
against the f been a capit		When a civ capitulates, the vassals of that civ are freed. They remain at war with the master of their former master, and the former master declares war on the former vassal.

Rationale	Shouldn't hold civs fully accountable for declarations of war if these declarations were enforced by the vassal system, especially not for capitulated vassals. The change should make it easier to free vassals and have a cooperative relationship with them henceforth.		
		e vassals should not be happy about being nost of their units or taking away their cities.	
		s practically only applies to wars where neither anged its mind in the face of tough defenses. Not running repercussions.	
See also	130h disables war-on-friend penaltie reduces "war spoils our relations" pe	es for attacking master/vassal alliances; <u>sha</u> enalty if there is little war success.	
-2 relations	ised by honoring a DP leads to only a penalty from the civ that triggered the ange to "war on friend" penalties.)		
Rationale	change radically. I'm just reducing th	m justifiable, or at least not wrong enough to ne penalty a bit. With change <u>130j</u> , the "war on us" as -42 aligns with the "expected nothing better"	
Tbd.		friend penalties when war is triggered by a wars declared by capitulated vassals either.	
130z	Currently unused		
131	Misc. changes to AI evaluation of un	its, buildings, techs, civics and religions	
	ely to build a high-utility building an arbitrary XP or gold building.		
to units who met. E.g. to	lluation: Reduced the value assigned ose resource requirements aren't make the AI less inclined to orseback Riding when it doesn't have	K-Mod: Already reduced; I'm reducing it more.	
Al switches religion probabilistically based on the ratio of the current religion's utility to the new religion's utility. Increased attraction to AP.		Current state religion is counted as having between +33% and +50% utility to create inertia and avoid revolutions. However, once another religion reaches higher utility despite this bonus, the AI switches immediately, leading to occasional back and forth switches as cities are conquered and lost again.	

132	More options when changing another civ's civics and religion	
-----	--	--

AdvCiv		BtS	
negotiation), or (b) any civ through a Spy, to		Can only ask anyone to switch to own civics (except the initial ones) and own religion (unless minority).	
	petitioner is not running the target		
makes sense to demand a switch to		ensible, but only when negotiating as peers. E.g. it Pacifism as part of a peace treaty, or to ask a or Theocracy so that the master's corporations	
	Also more interesting (and entertaining) options this way.		
	A higher cost for switching to an unused civic makes sense in case a) because the other side will suspect bad intentions, and (somewhat) in case b) because the Spy owner lacks knowledge about the target civic/ religion.		
	Why not allow all civics? Don't want that many options on the diplo screen. Also seems far-fetched to switch someone to, say, Vassalage in the Modern era, wh civ in the game has been in Vassalage for 500 years. Assume civs to be somewhere the flexible in their religion civics and economics. These are also the columns with isolationist civics Mercantilism, State Property and Theocracy.		
132b			
	e reluctant to switch civics if their master	Vassal/master status doesn't affect civic choices.	
is human.		The diplo bonus from sharing a religion with the master factors into the religion choice of the vassal.	
Rationale	Humans tend to ask vassals to adopt certain civics; switching back and forth doesn't help either side.		
132c	Switching to a state religion requires at least one city with that religion; doesn't suffice if another team member has a city.		
Rationale	No special need for team members to align their state religions. Minority religion is also determined based on per-civ city counts, and not per-team.		

133	Al cancels more deals	
AdvCiv		BBAI
Al cancels tribute deals ("it's time for your tribute") once a vassal agreement ends.		Tribute deals remain in place until (if ever) the Al reaches so much military power that it wouldn't have agreed to the deals in the first place.
Rationale	The problem of lingering tribute may have been introduced by BBAI, which replaced BtS/Warlords custom code for deal cancelation with calls to AI_considerOffer. K-Mod has mostly repaired this (deals from non-vassal tribute demands and gifts do get canceled), but missed a spot.	

Tbd.	Fair non-tribute deals where the AI gives away its only resource of a kind still aren't canceled. Would also be nice if the AI canceled deals that no longer make sense for the player – e.g. cancel deal for Rice when the player settles on a Rice resource. Both fairly complicated to implement (I've tried).	
AdvCiv		BtS
deals betwe	sal agreement ends, all remaining en vassal and master can be either side (turns-to-cancel set to 0).	Deals with a minimum duration can't be canceled until the 10 turns are over, regardless of the vassal agreement. This includes resource gifts to the vassal.
Rationale	A minor issue. They shouldn't be forced to continue free resource deliveries. For players, it can be confusing to see free resource trades continue between two AI civs that no longer have a vassal agreement.	
Permanent Al thresholds for Cancelation is	pen Borders, Defensive Pact and liance when AI attitude drops below the signing the respective agreements. It is delayed with a per-turn probability the other side has become the AI civ's	Al cancels these agreements immediately when the other side becomes its worst enemy. Otherwise, Al attitude doesn't lead to cancelation (though other considerations may). E.g. borders can remain open indefinitely despite Annoyed attitude.
Rationale	I think the original idea was that deals get canceled when their attitude threshold isn't met anymore; they just didn't get the implementation right.  The delay is supposed to give the other side time to amend relations before canceling OB. (Once OB are canceled, it's difficult to get them back because the "brought us closer together" diplo bonus is lost.)	

134	Changes to AI-to-human offers	
See also	136b also fits here (map trades offered by the AI)	
134a	Al offers peace (only if UWAI disabled, and never offers to pay for peace)	
AdvCiv	BtS	
When comp own end-wa	peace, but doesn't offer to pay for it. The AI never contacts a human player to offer iling reparations, the AI considers its peace (or capitulation). r value 20% greater. The discount is e player counter-proposes.	
Rationale	Peace offers apparently worked in Vanilla; not sure when they broke.	
	The discount is there to make the AI offer worth considering. K-Mod has introduced a similar discount for other AI offers. A good idea; without this incentive, the AI might as well not contact human civs at all.	

Tbd.	I had to work around a bug in the BtS executable that suppresses diplo war enemies. My workaround relies on the exact order of calls at the be human turns, and on the order of call parameters of the atwar function. modders had planned to reimplement the Trade screen (for various reaswould fix the problem in a cleaner manner, but nothing became of it. 135a	Resource bubbles	
	activates resource bubbles, they ive until a player deactivates them.  When in Hotseat, resource bubbles are deactivated at the end of each human turn. Other map layers (e.g. yield display) are not reset.	
Rationale	The BtS behavior is extremely annoying if all players want to play with resource bubbles. Otherwise, the players could still agree not to activate them, or one player flicks them on and the next flicks them off.	
Tbd.	The proper solution would be to remember each player's active layers at end of turn, and restore them at the beginning of the next turn. Same for player options, which are currently shared by all players. Ideally, layers and options would also be stored in savegames, but that's not really necessary.	
See also	004m increases the default zoom distance (also reset each turn in Hotseat).	
135b	MoreCiv4lerts in Hotseat	
AdvCiv	BUG	
the MoreCiv	Added per-player memory to the BUG alerts in he MoreCiv4lerts fire every turn in Hotseat; unusable.  ones, like tech trades, are in that package.)	

Rationale	The first package of alerts seems to have been implemented with multiplayer in mind, but not the "More" ones.	
Tbd.	Don't know if the alerts also work for networked multiplayer.  BUG options are shared between all Hotseat players, i.e. players need to agree which alerts to enable.	
See also	106c also fixes issues with Civ4lerts.	
135c	Debug mode accessible in Hotseat	
	Can use WorldBuilder button to toggle debug mode if admin Ctrl-Z normally toggles debug mode, but not in multiplayer. password set to "debug" in Staging Room.	
map, which isn would've been	n because I was only able to reveal the bare It useful. Proper debugging for Hotseat nice, but the developers really went out of ke this painful to implement.	

136	Changes to map trades	
136a	Circumnavigation checked at end of turn	
AdvCiv	1	BBAI
that civ has through a m circumnavig only that civ trade is com the human a	circumnavigated the globe. Thus, if, ap trade, two civs meet the ation conditions on the same turn, is rewarded on whose turn the map pleted. In a human-Al map trade,	Circumnavigation is checked at the beginning of turn. If two civs are eligible through a map trade, the civ on whose turn the trade is completed misses out (always the human when it's a human-AI trade). That civ even misses out if it has completed circumnavigation through unit movement earlier on the same turn (before making the map trade).
circumnavig if it can train If it can't trai	no one has achieved ation, the AI refuses to trade its map Caravels. ("We have our reasons.") n Caravels, but the other side can, es twice as much for its map.	Whether an AI is willing to trade it's map depends entirely on the leader's attitude threshold.
Rationale	The BtS rule leads to the trap sketched on the upper right. Checking at end of turn instead puts the AI at a bit of a disadvantage because human-AI trades can't be completed on an AI turn. That said, the AI suggests map trades to human civs relatively rarely, and never with an intention of completing circumnavigation, so the change doesn't really hurt the AI.	
	The trade refusal should make it had Al that is already close.	rder for a human to steal circumnavigation from an

The AI proposes no trades to a human civ where The AI occasionally asks human civs to the human side receives only the AI map, and the exchange maps, even if the AI map has no value to the human.		
multiples of	e rounding of AI trade values to 5. Makes the implementation of the ge a bit easier.	Trade values are rounded to a multiple of 10.
Rationale	These offers are pointless distractio	ns.
Config	The rounding change is implemented in GlobalDefines_advc.	

137	Map recommendations	
AdvCiv		BtS
menu for th	the number of players. ("+x% players	When the world size is changed, some player slots are automatically opened or closed in order to match the recommended number of players. No such thing happens when the sea level is changed.
	nilar recommendation to the text of the Terra map.	The Terra description contains a warning about the map being especially large, but it doesn't say whether the player number should be adjusted to this. Description texts are only shown under Play Now, not on the Custom Game screen.
Rationale	Having the proper number of civs is imo pretty important, and sea level has a big impact on this. The recommendations, if followed, should lead to about the same number of cities per civ as with Normal sea level.	
	I think Terra plays best if the old world is rather crowded with civs. The standard player numbers don't suffice for this.	
	Recommendations weren't my first choice. Some things I've tried:	
	because the Custom Screen isn't part of the	omatically when the sea level changes. This can't be done SDK. When slots are opened/closed in response to a world also factor in sea level, but then the sea level needs to be what player normally do.
	is the name of the map script file, and chang recommended") would result in a second madown menu with a single choice, but appare	he Custom Game screen. The displayed map name ("Terra") ging this file name (to e.g. "Terra - extra players ap, listed in addition to Terra. I've tried adding a dummy dropently at least 2 choices need to be given. Tiles per player: 30 for Duel; 34.7 for Tiny; 32 for Small; 39 for Standard; 46.2 for Large; 58.2 for Huge.
Increased t Huge.	ech cost modifiers for Large and	Duel size has 100% tech cost, from there it's +10% for each size level.

### Rationale

It's probably intended that larger maps leave more room for expansion, but the differences shouldn't be *that* big. To me, settling lots of unclaimed land is a drag. (As for which is more challenging, protracted confrontation probably helps the AI on high difficulty settings. That said, a higher number of civs increases the chances of some civ getting especially lucky with its starting position, and usually, the strongest adversary presents the main challenge.)

The low player number on Huge may also have been for performance reasons; less of a problem with current hardware.

As for Standard, 8 players gives everyone room for about 7 cities; too much I think. 9 players make it difficult to build National Wonders without conquering additional cities. I still think 9 plays better than 8, but 8 is closer to what players are used to from BtS, and can always pick a Small map with Low sea level – no problem with National Wonders there.

Sparse maps are also bad for trying out UWAI; conflict gets delayed too much.

AdvCiv	K-Mod
Included copies of Fractal.py and	"Not too big, not too small", the single map added
Continents.py from BtS with AdvCiv just s	so that by K-Mod, is listed first, the rest alphabetically.
they get listed first on the Custom Game sc	reen.
Rationale The two standard maps in Van that spot.	illa/ BtS. "Not too big/small" is OK, but shouldn't take

Religion assignment when starting i	Religion assignment when starting in later eras	
AdvCiv	BtS	
When starting in an era other than Ancient, the automatically founded religions are assigned based on handicap, Spiritual trait and favorite religion. More specifically, on difficulty settings above Noble, the game prefers to assign religions to AI civs, and on lower difficulty to human civs; always prefers Spiritual leaders and AI leaders whose favorite religion is among those to be founded.	After assigning the same number of religions to everyone, the remainder is assigned to a random subset of civs. In particular, favorite religions don't play a role (except possibly with the choose-religions option).	
The top priority is still to give each civ the same number of religions. The above change only applies when that is impossible.		

#### Rationale

Religions are hardly shared in games starting in in the Medieval era or later because almost everyone founds a religion. Assigning the religions to civs that like to spread them (Spiritual, favorite religion) should lead to more block-building like in normal games (Ancient start).

Also want to make it more predictable for human players whether they'll get a religion if there aren't enough to go around: On Emperor difficulty or higher, probably not. Otherwise, choosing a Spiritual leader should guarantee a religion.

139	Al evacuation of cities	
AdvCiv		BtS

next turn, the combat units receive defe dedicated de units, the tile defense can evacuate if t dangerous.		The AI only evacuates noncombatants; may even reinforce hopeless cities.
Rationale	Evacuating units without defensive bonuses and badly injured units seems like a clear improvement. Units with high defensive bonuses can be expected to cause losses to the attacker even when badly outnumbered; might, in particular, take out the attacker's siege units.	
	It's important that a Stack of Doom can't scare away all defenders from several citie and settle for peace when the evacuated defenders gather for a last stand. Sounds fairly realistic, but, given the other dynamics of the game, would make conquests to cheap.	
	Fixes the "meatgrinder" exploit, which was discontinued.	ch was still on the BBAI to-do list when the mod
Tbd.	I'm not evacuating ships because there is K-Mod code for that. That said, the K-Mod code doesn't work reliably, so perhaps I should let ships use my code as well?	
Config	AI_EVACUATION_THRESH in GlobalDefines_advc	
See also	107 (more offensive Area AI) chould	help reclaim evacuated cities.
Reduced AI	trade value for evacuating cities.	The tactical situation does not factor into the Al trade value of a city.

140	Changes to city maintenance	
AdvCiv		BtS

Rationale

The AI should be more willing to give a city away when it thinks that it can't hold onto it, and the recipient (which may or may not be the civ about to conquer the city) should be less willing to pay for such a city.

(maxPlotDistance) that distance and colony maintenance are based on, using a rather		maxPlotDistance is e.g. 55 on Small cylindrical, 72 on Normal cyl., 89 on Large cyl. and 82 on Small flat. That is, the world-wrap type greatly affects distance maintenance.
Small, cylind	LO civs: 71	
	intenance is now also a bit higher os and lower on small ones.	
The change	also affects mission costs of Spies.	
Rationale	Map diameter shouldn't be so decisive. Empires tend to be circular even on oblong maps or maps without world-wrap. What leads to high distance maintenance is mostly a high number of cities, and if a map has lots of space for each civ, civs shouldn't be punished for filling that space.	
		educing distance maintenance; on high difficulty ity maintenance than human civs, and thus the Al ntenance reduction.
See also	137 changes the default number of civs per map size	
		MAX_DISTANCE_CITY_MAINTENANCE, but this only serves as a weight on maintenance costs; there is no actual limit on the distance or the cost.
Rationale	If a city is very far away from a gove exactly. The BtS cost punishes (very	ernment center, it shouldn't matter how far away y) remote colonies too much.
Config	The distance cap is coupled with MAX_DISTANCE_CITY_MAINTENANCE (in	

141	No diplo bonus from gifting GP	
AdvCiv		K-Mod
Gifting a Great Person (GP) to an AI civ does not+1 relations for each gifted GP. affect relations with that AI civ. Like in BtS, only units with positive production cost can boost relations when gifted.		
Rationale	Too easy to exploit for a diplo victory.	
	Gifted military units should only boost relations when the AI has an immediate need for military aid. The relations bonus should probably also be capped; seems exploitable.	

GlobalDefines.xml); changing that value will also change the cap.

142	Master gets a happiness bonus only from the first peace vassal	
AdvCiv		BtS
The master of a vassal civ receives a happiness bonus only from voluntary vassals, and only the first one counts, i.e. at most +1.		
	In large games, the stacking happiness bonus, combined with the free luxury resources from vassals, can let master civs ignore happiness altogether. I also don't like that the bonus applies even if just one city is left; this provides an incentive to keep tiny vassals around, which lead to some oddities in global diplomacy (despite refforts to fix such issues). Also, oppression of capitulated vassals is hardly a point of pride. Should perhaps remove the bonus entirely, but for voluntary vassals "We influence other civilizations" makes some sense, and these vassals are harder to ge	
	The anger at the vassal side seems sensible (though unimportant) and can't stack.	
	Change 130 and related changes (see under <u>130v</u> ) remove several disadvantage vassal agreements for the master, so, as far as game balance goes, I don't think a happiness bonus is needed at all.	

143	Recently-canceled memory for vass	al agreements
VVA with a	loses 35% of its territory, it cancels the per-turn probability of 15%. Cancels ly when losing 45%.	Only capitulated vassals revolt when losing territory (50%).
Rationale	master is justly punished for not have human) is faced with a strategic dec	dependently (possibly by capitulating), while the ving protected its vassal. The third party (possibly cision: focus attacks on the vassal or the master? an break up the VVA (by lowering the master's
Config	VASSAL_DENY_OWN_LOSSES_FACTOR	in GlobalDefines_advc
When a vassal cancels a vassal agreement for no particular reason (i.e. vassal feels safe or cowerful enough on its own), the (AI) master remembers this for, on average, 20 turns, and refuses to sign a voluntary vassal agreement (VVA) during that time. When the agreement is canceled because the master hasn't protected the vassal, including the case where a capitulated vassal breaks free after losing too much territory, the vassal remembers this for 30 turns (on average), and refuses another VVA. (Whether the master or the vassal remembers is only relevant when the master is human.)		
canceled be the vassal, capitulated much territ turns (on a (Whether tonly releva	pecause the master hasn't protected including the case where a law vassal breaks free after losing too tory, the vassal remembers this for 30 average), and refuses another VVA. The master or the vassal remembers is ant when the master is human.)  The flickering isn't only goofy, it also vassal can easily get interrupted by	

threshold is a doesn't brea cities have b	after being nuked repeatedly. The randomized; usually, the vassal k away until more than half of its een hit. Doesn't cancel if master has sal does not.	Only lost territory counts (and only for capitulated vassals).
Master's SD	l protects vassal.	SDI is a team project, but doesn't protect vassal
Vassal cance	els VVA if it has any nukes unless	teams.
master has SDI and vassal doesn't: "doing fine on our own".		Vassal's nukes factor into its power rating, but a single nuke doesn't usually make a difference.
Capitulated vassals don't build nukes. When a team capitulates, all it's nukes are scrapped.		Vassals don't hold back on anything.
Nukes can't be gifted (between any civs).		Can gift nukes to circumvent the diplo penalties.
Rationale	e SDI is supposed to be an array of space-based lasers. Should be able to intercept any nukes that the SDI owner wants to intercept.	
Vassals that are powerful enough to build nukes should stand on their ow		build nukes should stand on their own.
See also	130v makes the master responsible for nukes fired by a capitulated vassal (obsolete now that vassals can't have nukes).  112 cancels VVA when near victory and stops capitulated vassals from pursuing victory.	
Tbd.	A cancelation condition based on present population vs. population when signed might be better.	

144	Refusal of gift request (part of the <u>DDiplo</u> changes)	
AdvCiv	,	BtS
Without considering any specifics, the AI refuses gift requests with a leader-specific probability. That probability is based on ContactRand: CONTACT_GIVE_HELP and between 5% (Gandhi) and 32% (Sitting Bull, Montezuma). I'm capping the probability at 50% for Tokugawa, otherwise he'd always refuse.		The only randomized aspect of the AI response to a gift request is the decay of recent-demand memory: The request is refused if the AI still remembers an earlier request (or tribute demand). So, the first request is handled without randomness, and if a previous request is far enough in the past, it's very likely forgotten (the expected time to forget is 20 turns).
war against the player (no change).		CONTACT_GIVE_HELP determines only how frequently an AI leader offers a gift to human civs that have fallen behind.
Rationale	Shouldn't be able to use requests to determine reliably if the AI is preparing war. It's semi-decidable now – if a request is granted, then the AI certainly isn't plotting. That said, they might start on the very next turn	
	In BtS, CONTACT_GIVE_HELP is irrelevant for advanced players; it's nice to give this actual use.	
Memory about requests and rejected demands is not decreased while there is a peace treaty between the two civs. Gift requests are rejected during a peace treaty.		

	To increase the time in between granted requests. A bit too easy in BtS to keep a Pleased AI from planning war: can reliably sign a peace treaty about every 25 turns, which leaves just 15 turns in between, which can sometimes be bridged by asking the AI to attack a third party (which results in a peace treaty; see change 146). My change makes this tactic unsustainable.		
	Could argue that "begging for peace" shouldn't ever be a tactic. I like that it makes Pleased attitude relevant even for warlike leaders. Think of it as a Reinsurance Treaty. I don't like that this is something only humans can use. (Could alternatively merge DarkLunaPhantom's one-sided peace treaties.)		
AdvCiv		K-Mod	
		player. (In BtS, the Al doesn't take the resulting peace treaty into account at all; grants request	
See also	130v prevents vassals from granting gifts to rivals. 130o deals with memory about tribute demands.		

145	No diplo bonus from accepted favorite civic/ religion if no longer in that civic/ religion	
AdvCiv		BtS
civ's favorite human civ is or if the AI ci Likewise, the religion is su	nus from having accepted an Al civic or religion is suspended if the in't presently in that civic or religion, v is no longer in the civic or religion. e penalty for refusing the fav. civic/spended if the human civ is now in ligion, or if the Al civ has switched	The bonus lasts for an expected 100 turns, regardless of whether the player keeps the civic/religion. Can switch out after 5 turns.
Rationale	Switching right back is a bit cheap, especially with the Spiritual trait.	
See also	Part of the <u>DDiplo</u> changes.	

146	Hired (sponsored) war results in a peace treaty	
AdvCiv		BtS
When a civ agrees to declare war on another civ No peace treaty; can ask someone to start at the request of a third civ, the civ declaring war and immediately attack that someone. and the third civ automatically sign a 10-turn peace treaty.		
Rationale	A bit of a loophole in BtS. Also want to be sure that the AI doesn't attack a human that has just paid it to attack someone else; not a problem in BtS because the AI only fights one war at a time, but could be a problem with UWAI.	
See also	Part of the <u>DDiplo</u> changes. Change <u>100</u> is also about sponsored wars (mostly UI changes). When there is already a peace treaty between the sponsor and the civ declaring war, <u>032</u> causes that peace treaty to be prolonged.	

147	Changes to border tensions	
AdvCiv	1	BtS
The number of lost tiles counted per city can be at most equal to the mean of the city's current population and its highest-ever population, or at most 6, whichever is higher.  The diplo penalty from border tensions is increased by 20% in the end (and then rounded).		No such per-city limit. A size-1 city enclosed by foreign borders can contribute 20 lost tiles. The number of lost tiles is then divided by the total number of owned tiles and multiplied by a personality factor to compute the diplo penalty from border tensions.
Rationale	Shouldn't get -4 relations from a single city choked city; this can easily happen in BtS, even in the late game. I generally don't like that high culture can lead to diplo penalties.	
	The 20% increase: Because I don't want border tensions to play a smaller role than in BtS overall.	
Tbd.	A tile should always be owned by the owner of the city that can work the tile when there is only one such city. I.e. I'd like to remove the choke-cities-with-culture mechanism entirely.	
See also	004g changes the explanation text from "close borders" to "shared borders".	

148	Relations to attitude mapping of the	Al changed
AdvCiv		BtS
Pleased, at - change) Frie relations per settings. On humans rece impression have a +1 re	2 Annoyed, at -8 Furious, at 10 (no ndly. Human players receive no nalty from any of the difficulty	Pleased at 3, Annoyed at -3, Furious at -10. On Noble difficulty and above, humans get -1 relations, on Settler +2 and on Chieftain +1. Al civs get no relations bonuses or penalties from difficulty.

Rationale	In effect, this makes Friendly 1 easier. A distance of 7 between Pleased and Friendly was too much considering that most AI civs are already very unlikely to start a war at Pleased and are willing to trade tech. The additional benefits of Friendly aren't that great.		
	sees the "A first impression" line muc player that he/she is making a bad first	with an inter-AI bonus means that the player ch less in the game. It was a bit silly to tell the impression everywhere. Everyone else is still not so obvious because peace-weight and r-AI relations.	
	The downside is that players have to relearn the thresholds, and that Pleased and Annoyed (and Friendly and Furious) are no longer symmetrical. Tough call. At first, I had meant to increase the Pleased threshold by one more for balance reasons, which would've broken the symmetry anyway. It turned out that this made it too hard to please the AI, so I rather made the bonuses from OB and resource trade more difficate to attain, but kept the change to first-impression diplo.  Furious at -8 (not -9) means that the AI gets Furious a bit faster than previously. I'm not sure if that's an improvement, but I don't want the fury threshold to be almost symmetrical with the friendship threshold (-9 vs. +10)10 would make the Annoyed interval too long and Friendly/ Furious being symmetrical when Pleased/ Annoyed aren't wouldn't be good either.		
See also	The <u>DDiplo</u> changes to relations modifiers arguably make it a bit harder to have very good relations with the AI.		
	The <u>Show Hidden Attitude</u> mod makes the relations penalty from difficulty visible to the player.		
_	itude causes the AI to vote for n a victory vote; Pleased is not	relations needed for a victory vote.	
Rationale		vote, which should still be manageable. More of an obscure oddity; much easier to remember	

149	Diplo modifier from resource trade	
AdvCiv		BtS
·		The counter is incremented once (with probability 1) per turn for each received resource. It doesn't matter how many resources the AI civ already has.
1.7% per turn when no more resources are received through trade, but can also decrease if		The counter is only decreased if 0 resources are received through trade. The decrement is 1 plus one quarter of the number of cities owned by the AI civ.  The counter can increase indefinitely.

	Same as $\underline{130i}$ : Make the AI harder to please. The exponential decrease is consistent with $\underline{130k}$ .

150a	Switch to no state religion		
	eplay indicates when a civ renounces its state ligion, i.e. switches to no state religion.  Religion changes are logged, as are civics changes to Free Religion.		
Rationale	Can also switch to no religion without adopting Free Religion, and that's worth logging.		
150b	Results of diplo votes		
	Replay includes successful UN and Apostolic Replay only shows the vote tally for and against without naming the proposal.		

151	Most ids above 150 are still unassigned

160	Food after starvation	
AdvCiv		BtS
emptied into the city's food store.  The Granary's capacity is only 40% of the city's capacity.		Whenever food is added to the city's store, the same amount of food is added to the Granary's store. The maximal capacity of the Granary is 50% of the city's store (whose capacity is 10 + 2 * population). After growth, the Granary's store is added to the city's store, but the store of the Granary isn't emptied. The Granary provides no food after starvation.
Rationale	The Granary already provided some protection against starvation by providing a cushion after growth and helping regrow lost population. However, the cushion is just 15 food in a size-10 city. If such a city has balanced health and can't get extra food by reassigning citizens (the AI often doesn't have unworked Farms), a poisoned water supply will consume the 15 food in two turns, and then kill 6 population. My change essentially doubles the cushion, meaning that only 3 population would be killed, which seems much more reasonable. It's not a big issue for human players, but in the Industrial era, the AI can become very vulnerable to poisoned water.	
	It's strange that the Granary isn't emptied when a city grows, but normally irrelevant (i would be refilled by the time the city grows again), and actually convenient for my ant starvation mechanism; don't need a separate food store this way.	
	Since the Granary is already considered to be the most powerful building in the I didn't want to make it even better; and I had planned to reduce the amount of s food at some point anyway.	
Config	The capacity change is an XML change (CIV4BuildingInfos.xml).	

Tbd.	Nerf Slavery and Drafting; this will make Granary far less powerful.

210a	War plans (= war trade/hired war/sponsored war/joint war)	
AdvCiv	BUG/ K-Mod	

unwilling to oplayer's requ		No alert about this, but BUG shows a fist icon on the scoreboard when a civ is unwilling to declare war on account of "having too much on [their] hands". K-Mod does not show this icon (not even	
tab; enabled	e "Trade" column of the BUG Alerts by default.	as an option).	
Removed the	e "Victory" alerts to make room.		
	bothers some players greatly. The fis	at all for joint wars) certainly isn't ideal, and st icon is a bit obscure, takes up room on the main an eye on it every turn; an alert is much better.	
	The victory alerts seem useful only i	n HoF games.	
and the new and farther a	The AI refuses war trades when already in a war and the new target is not at war with the sponsor and farther away than the closest current war enemy: "We have enough on our hands right now."  AI refuses war trades when it is in any war, regardless of other circumstances. (This is still the case when UWAI is disabled.)		
Rationale	Need to reduce the amount of messages produced by this alert. War against an additional target rarely makes sense; the hired AI civ isn't going to send units.		
	<u>UWAI</u> uses a different procedure than BtS/ K-Mod to decide whether to entertain jointwar offers (but this alerts works in any case).		
210b	Revolts		
to greater that when occupation a city unlead Shown in the BUG "Pacific	Triggers when revolt probability changes from 0 to greater than 0 in a city, or vice versa, and also when occupation (from conquest or revolt) ends in a city unless the city also needs orders.  Shown in the "City" column, taking the spot if the BUG "Pacification/ Pending" alert.  The Pacification alert triggers when occupation ends in a city; the pending version when occupation is about to end. Without the alert, there is no notification about ending occupation although a conquered city will ask for production orders when occupation ends (unless the new owner has already put something in the queue)		
	Now that revolts play a more prominent role (see <u>099c</u> ), an alert is direly needed. The Pacification alert seems fairly unimportant to me, but I've still included it with the new alert. Though not the "pending" option; I don't see why one would want that.  No pacification alert when the city also needs orders; seems superfluous then.		
	Known issue: If the game warns about a positive revolt chance, and the player moves units into the city that reduce the chance to 0, then saves and reloads before ending the turn, a message about the revolt chance being 0 isn't shown. Don't want to show it right when the units move in (could move in and out, leading to multiple messages). Would have to store savegame data to fix this.		

250	Changes to handicaps	
See also	104p sets the target size for AI invasion stacks based on difficulty	
250a	King handicap	

advantage ( the worst sta	ry setting "King" with big initial AI free Worker, free Pottery, humans get arting plots), and moderate ongoing es (akin to Monarch).	Initial AI advantage and ongoing advantages go hand in hand for the 9 BtS difficulty settings.
difficulty rati explicitly thr	difficulty rating from handicap id. A ng from 0 to 100 is now assigned ough a new XML tag. Settler to difficulty 0, 10, 20,, 70; Deity at 90 65.	Handicap ids from 0 (Settler) to 8 (Deity) are used as a measure of difficulty, e.g. when computing player scores at the end of a game. This method breaks when handicap settings are added. If added at the end of Civ4Handicap Info.xml, it's treated as more difficult than Deity; if added in the middle, all the handicaps below increase in difficulty.
Rationale	for Pottery: Free tech from the first row (e.g. Hunting or Agriculture) puts those AI civs at a disadvantage that start with these techs anyway. Pottery should also put the AI on a path to long-term development (Granaries, Cottages), rather than using its initial advantage to choke the human players.	
Config	I've removed this difficulty level in v0.90. Monarch combined with SPaH has a pretty similar result, and I wanted to reduce the complexity of the AdvCiv mod, at least on the surface. (An additional difficulty level is a very visible change from BtS.)	
	To re-enable the King difficulty, remove the comment tags around the last <handicapinfo> entry in Civ4HandicapInfo.xml. Simply using a Civ4Handicap Info.xml from v0.89 should also work.</handicapinfo>	
See also	108 allows the game to give the wors	st starting plot to a human civ
250b	SPaH; see also chapter Start Points as Handicap.	
Tbd.	Allow players to enter arbitrary point distributions, in particular ones that assign start points to human players. Obstacles:	
	<ul> <li>Can't add a drop-down menu for this to the Custom Game screen; if it's done in- game, it will have to happen after game start. For multiplayer, it's not clear who should enter the points; and they'd have to be explicitly synchronized.</li> </ul>	
	• I've tried an XML file, but that doesn't work well for multiplayer – not clear to the players if they should all use the same XML file, or if XML data of the host will be synchronized with the others. I'd rather avoid using XML for custom game settings.	
	Caveat: Code added in CvPlayer.cpp assumes that only AI civs can have Advanced Start when SPaH is enabled.	
Razing (NC	PaH option takes the spot of No City R) on the Custom Game screen; to the bottom.	
Rationale	Had intended to replace the Advanced Start option with SPaH and indicate normal Advanced Start by entering a value greater than 0 into the Base Start Points box. This isn't possible because the box is grayed out by the BtS executable. Hence an additional option couldn't be avoided.	
See also	250c changes the default start points start turn based on the number of sta	s in the Custom Game screen, and increases the art points.
Tbd.	Not sure if the default start points are appropriate for later-era starts.	

SPaH suppresses the adjustment of AI start points based on the difficulty setting. Civs receive no free wins against barbarians and On Prince difficulty and lower all civs are no free initial production when SPaH is enabled. guaranteed to win their first combat against a barbarian unit (regardless of Advanced Start). On all difficulty settings, the AI receives some free production (akin to a chopped Forest) in its capital. When playing with SPaH, any free initial items and any AI head start in terms of initial Rationale items should be covered by the start points configured for the AI. The free win is also a kind of free item. More importantly, advanced players might want to combine a mdeium difficulty setting like Prince with a big AI head start, and those players might find the free win cheesy. See also 250c disables free AI tech from difficulty setting when using (any) Advanced Start option. SPaH gives the human civs normal starts with There is no SPaH option; all civs, human and AI, e.g. a Settler and Warrior/ Scout in the Ancient receive the same number of start points. era, and Advanced Starts to the AI. If less than 10000 start points are entered, all AI civs get the same number of points (flat distribution). Otherwise, if a 5- or 6-digit number is entered, the AI civs receive unequal amounts of points. The first 4 digits determine the max number of points. This is assigned to the AI civ in the bottommost slot. The last two digits are interpreted as a percentage of the max. The resulting min number is for the AI civ in the topmost slot. The others receive values in between min and max, linearly distributed and slightly randomized. The AI start points can be reviewed on the Settings tab of the Victory Screen. Tbd. The unequal distribution is linear between max and min, but also based on pairs that tend to have similar point values. Originally, this was supposed to make the assignment of start plots easier. The human civ and the bottommost AI civ were used as anchors, and the other civs were evenly distributed in between. This doesn't generalize well for multiplayer, so I've abandoned it. Given the current start-plot assignment algorithm, it would be conceptually simpler to use a linear distribution without pairs. Config The randomization of start points is configurable in GlobalDefines advc. SPaH is factored into game-end score. More Game-end score doesn't account for Advanced specifically, the difficulty factor, normally between Start. 0 and 90 (see 250a), is increased based on the start point distribution. For example, a Noble game has normally a difficulty of 30; with 1000 start points for every AI civ, that difficulty is increased by 20, which results in the same score

as a Monarch game without SPaH.

Rationale	The end-score function has numerous issues, but I think players still care about it a little bit as a rough indicator of how well they did. So, the formula doesn't have to be perfect, but, if start points work as a handicap, they should be accounted for somehow.	
	I haven't thought about scoring in muabout.	ultiplayer games – not important enough to worry
250c	Changes to (regular) Advanced Star	t
the technolo	ogies of previous eras when starting	No free units, but free technologies from the difficulty setting are granted in addition to start points.
Rationale		tech differently from free units. Obviously, free anted, so my solution isn't entirely consistent
	Charge 1.5 start points per production (units, puildings, cities).	
1 start point	per 1 culture.	1 culture costs 2.5 start points.
	Revealing a tile costs 2 start points. Can't reveal Costs 5 start points. Can reveal any tile that is Docean tiles that aren't adjacent to Coast.	
	Start point cost for routes and improvements educed to 67%.	
Tech costs 1 change).	Tech costs 1 start point per research point (no change).	
Rationale	Units seemed extremely cheap compared with tech. It's not that dangerous because units can only be placed in cities, and each city has a limit of two military units; still, makes lots of Workers and Settlers a too obvious choice. 1 start point essentially corresponds to 1 gold, so 1.5 per 1 production is still a bargain. Should perhaps be for 1 – not sure if there's a good reason to make techs relatively unattractive during Advanced Start. Similarly, 1 culture per 1 start point is still pretty expensive; seems better to buy Settlers and found later than to pay some 50 points extra for revealing the surroundings of a potential city site.	
A Mine for 24 is very expensive when a Worker costs only 60. Now Workers a and Mines at 16. Dangerous wrt. immediate military build-up?		
		sense to reveal a diagonal across the entire map I all all the surprises, so I'm prohibiting the
Config	Costs for culture, revealed tiles and	Worker builds in GlobalDefines_advc
	shown in Custom Game screen are djusted to start era.	Shown points are adjusted to game era, game speed (silently) and world size. The impact of
All start point costs are reduced based on game speed.		world size is minor; the multiplier is between 80% and 120%.

Rationale	A large world isn't necessarily less crowded than a small one. The BtS auto-adjustment is generally problematic because it overwrites any start point value that the player may have already entered. Also gets in the way of 250b – don't want the player handicap to increase with the world size.		
	start point budget that differs from th	can be a bit confusing – the player ends up with a see value shown by the Custom Game screen. I e the costs instead. Makes no functional bunding).	
No impact of points.	difficulty setting on the human start	Extra start points for human civs on low difficulty settings (150% on Settler), reduced start points on high difficulty (75% on Deity).	
Al start point bonuses increased to Prince 125% Monarch 145% Emperor 175% Immortal 210% Deity 270%		Set to 110% 120% 135% 150% 170% but weren't applied because of a bug.	
Rationale	Want to reduce the number of modifiers that affect start points. Instead of giving human civs fewer points on higher difficulties and AI civs more, I'm giving the AI civs a lot more. This is also to account for the free AI tech that is no longer granted in Advanced Start. Moreover, the general consensus is that the high difficulties are easier to beat with Advanced Start, perhaps, in part, because the AI doesn't spend its start points wisely. So, I'm also trying to make Advanced Start more challenging.		
	Human civs now also get more start points than in BtS on Prince and upwards. This is countered by the increased point costs of units, buildings and cities.		
Dawn-of-Man Screen always shown. The "since time immemorial" text and initial techs are only shown when starting in the Ancient era.		Dawn-of-Man only shown for normal start: not Advanced and in the Ancient era.	
While in Advanced Start, scoreboard help text shows the player's leader.		While in Advanced Start, can only infer leader from text color or by using keyboard shortcuts to access Advisor Screens or Civ Description (Alt+D).	
Rationale	Player needs to know his/her civ and leader upfront, especially if it's set to Random. The initial techs are meaningless when starting in a later era.		
The start turn is based on the number of start points, more specifically, the maximum and the mean of the start point distribution. Only applies when starting in the Ancient era (and only when the mean plus maximum, divided by 2, is greater than 500).		The start turn only depends on the start era.	
Example: If everyone receives 750 points (max=mean=750) on Normal speed, Emperor difficulty, then the start turn is 20, i.e. 1880 B.C.			
Rationale	Should match the real time line better, and, in the case of SPaH, gives the impression that some of the AI civs have been on the map since 4000 BC, whereas the human civs are late arrivals.		

INCREASE\_START\_TURN in GlobalDefines\_advc

Config

251	Start turn and AI tech costs based on difficulty		
AdvCiv		BtS	
Al tech costs are reduced on the lowest three difficulty settings, and increased on the highest three. I've adjusted the human tech cost modifiers for these six difficulty settings so that the ratio between human and Al tech costs remains approximately as in BtS.		Al tech costs are not affected by difficulty. Human tech costs are reduced to 60 (Settler) to 90% (Warlord) on difficulties below Noble, and increased to 110 (Prince) to 130% (Deity) on difficulties above Noble.	
	The overall progress had been too fast on difficulties above Monarch and too slow on difficulties below Noble. It's an aesthetic issue (AI tech matching game date), but also a matter of pace: How much time there is for warfare until another tech is discovered. I don't think, say, Warlord and Immortal should have fundamentally different pace (that's what the game speed setting is for).		
	karadoc seems to have thought so too; in K-Mod <u>1.45</u> , he tied inflation to the global technological progress. I don't like this solution; see the discussion <u>here</u> .		
	Civ 4 Reimagined appears to do something similar to my change ("tech costs for all players scale with handicap setting"; Bitbucket <u>link</u> ).		
	Civ4HandicapInfos.xml. To undo the change, one can set (for each difficulty)  AIResearchPercent to 100 there, and reset ResearchPercent to the respective original value.		
	Perhaps Alpereramodifier should apply to AlresearchPercent; then Al research would become faster as the game progresses. Already the case for Al expenses for civics and units, so maybe that's enough (as far as commerce is concerned). I worry that the total effect of the progressive bonuses would become too noticeable.		
	If I do make the change, higher AIResearchPercent should be set, so that the overall AI research speed stays the same.		
	Even without AI research getting faster with each era, the Deity AI gets ahead of the real time line by the Industrial era. I think a further increase of tech costs (already 150% for the human player and 125& for the AI) would make buildings and units too cheap in comparison. Would have to change the mapping from turn number to year instead. Won't do that because I don't care that much about Deity; with a few more (fundamental) balance changes, Immortal should become hard enough for everyone.		
	On a related note about the per-era modifiers: It's not ideal that the bonuses are triggered (entirely) by the tech era of the AI civ that receives the bonus; it means that the AI civ that is first to reach a new era is also the first to benefit from the bonus. Could be the main reason why the tech of AI civs differs so much in Deity games. Using the game era would also be problematic because of possible human manipulation, and any average would be distorted by vassals/ small civs.		
See also	910 adjusts the per-era tech modifie	rs (which apply to everyone, not just the AI).	
The start turn is advanced by 10 (on Normal speed) for every free Worker Settler (beyond the first) that the AI receives. This only applies when playing without Advanced Start (for start turn in Advanced Start, see 250c above).			
Config	INCREASE_START_TURN <b>in</b> GlobalDe	fines_advc	

300 et sq.	Overhaul of barbarians; see chapter bit through sub-ids, but I doubt they	Better Barbarians. I've structured the changes a could all be merged separately.

civ cities (nor in the surrounding waters), but barb without cities because these continents have cities appear earlier on such continents and more densely than in BtS.  If a continent (or shelf) becomes very densely populated with barb units, the game starts culling them. The greater the density, the higher the perturn probability of removing a unit. The barb Al		100% unowned tiles. While barb units are created independently for each continent, cities are placed globally, and the game prefers to
Rationale	not so many units. The cities actually	e in Colonization, i.e. with lots of barb cities, but y produce too many units, hence the scrapping juard against implausibly large barb stacks. Could alt of barb infighting.
		good because it may leave high concentrations in n't supposed to have an overarching economy.
Tbd.	Barbs can currently be removed from tiles visible to a player, which is a bit jarring. Should show a message then, e.g. "A barbarian Galley has been destroyed as a result of infighting." Perhaps implement this through a random event. Can't simply exclude visible tiles from removal: In one game, barb Galleys kept spawning around an uninhabited continent and targeted an inhabited continent with assaults. In such a case, naval stacks of arbitrary size can form on visible tiles.	
Barb units ar	e never upgraded.	Upgrades are possible using commerce from barb cities, but seem to happen rarely because resource requirements are checked when upgrading; cf.

Fixed two Bt	Don't want a barb economy. Outdated units are still killed eventually, either in combat or removed by the scrapping mechanism above. A mixed bunch of barb units is more flavorful than a uniformly upgraded army; I imagine that barbs acquire sophisticated weapons from the civs (through trade), but also continue making their traditional weapons.  It can happen that civs keep trained and spawned barbs on a continent in check, thus preventing scrapping, but don't attack (all) the barb cities. Then, early-game garrisons will remain unupgraded indefinitely, which starts looking weird once the barbs reach Gunpowder. Too rare to worry about.  StS bugs that lead to barb cities being er in completely arbitrary locations	
`	island without seafood), or in ideal far as the AI is able to figure those	
See also	Thread on CFC	
independent	iveness of barb units escalates ly for each continent based on the cal civ cities.	There are essentially three levels of barb aggressiveness: Initially, barbs avoid civ cities, then they attack them opportunistically, and eventually they seek cities out. This escalation is based on the <i>total</i> number of civ cities, and affects all continents alike.
with more barb cities than civ cities, even when away. Without RB, only the number of civ cit		With RB, the barbs usually seek out cities right away. Without RB, only the number of civ cities is decisive, not the ratio of civ cities to barb cities.
Rationale	To remove implausible repercussion barb behavior on another continent.	s of civ development on one continent for the
	New World barbs shouldn't immedia when half the continent is colonized.	tely attack colonies. Now only turn aggressive
	s don't connect cities with roads, Forests and prioritize production.	Barb Workers build road networks between barb cities and builds lots of Cottages.
Rationale	A road network makes it look like a barb empire, but it's supposed to look like independent cities. Cottages are nice for pillaging, but don't make much sense for the barbs. Chopping: Don't want players to discover a deforested New World.	
See also	DarkLunaPhantom has made a similar change (Git commit $\underline{1}$ , $\underline{2}$ , $\underline{3}$ ); haven't merged it because I still want barbs to build <i>some</i> Cottages.	
guard cities ı	olled, AI civs assign fewer units to unless threatened militarily by	The AI defends its cities against raging barbs, but doesn't defend crucial improvements.
	New AI routine for guarding high- ements against barbs.	Often allows barbs to move onto Mines or onto improvements across a river, negating the 25% combat bonus that the AI gets against barbs on all difficulty levels.
Rationale	Also frees up units for guarding future city sites, which is similar enough to human fogbusting.	
Tbd.	Doesn't help much. Early on, when it matters most, the AI still needs most of its defenders to protect its cities, and doesn't reliably indentify the most precarious improvements. Would be better to move from the city onto a threatened improvement only when a barb unit approaches. Need to be careful not to expose AI cities to human attacks.	

sses when there is nothing else to	AI civs hardly ever conquer barb cities on landmasses where they don't have their capital.	
Needs more testing; probably still no	t satisfactory.	
	K-Mod/BtS	
city owner's era (1 for Ancient, 2 and the city's population. The multiplied with RazeCityProb ase probability for barbarian razing. Ily raze Ancient and Classical cities ave to (size < 2), and can raze size-2 val era and up to size-3 in . I'm capping the era number at	The 10% probability applies regardless of population, but closeness to other barbarian cities can reduce the probability.  BtS used the same procedure for barbs as for Al civs, just with 10% increased probability. There were some fairness clauses to prevent razing in the early game.	
razing only for flavor reasons; baland	barb cities aren't supposed to cooperate. Want ce-wise, losing a city to barbs temporarily is	
RazeCityProb <b>iS in</b> Civ4LeaderHea	dInfos.xml.	
f coastal tiles surrounding each land	Barbs ships are created for each water body; usually, there is only one large water body.	
Early Spearman fix, no spawning of	units older than the previous era	
The game creates barb units with resource requirements only once the barbs have the tech that allows that resource to be traded. This only affects Spearman; now req. Bronze Working.		
Moreover, barb units requiring a resource can only appear on continents where at least one civer has access to that resource (or where a barb city has access to it).  The same barb units appear on all continents, and the game only checks if the barbs could worthen necessary resources, not if they're actually available anywhere.		
	not intended by the BtS developers. Late barb a valid strategy against RB.	
also a game balance problem when the barbs then immediately get horse	don't exist on a continent is highly implausible. It's starting in the Classial or Medieval era. In BtS, e, bronze and iron units while it usually takes the nilitary resource.	
The game only creates barb units from the barbs' The unit to be created is chosen uniformly at current tech era or the previous era, i.e. no Warriors, Spearmen and Archers in the Medieval era.  The unit to be created is chosen uniformly at random from among the allowed units, including those from all earlier eras. Obsoletion isn't checked.		
Ancient barb units become a pointle	ss distraction at some point.	
Would be better to exclude only obsolete units, but this awkward to implement because it's normally checked for individual cities. Perhaps I could at least count Spearman as a Classical unit (despite Hunting being the enabling tech).		
Tech diffusion only from civs sharing	an area with barbarians	
	razing only for flavor reasons; balance already big setback.  RazeCityProb is in Civ4LeaderHeater created for each continental shelf, if coastal tiles surrounding each land losed in the case of inland seas).  Early Spearman fix, no spawning of eates barb units with resource only once the barbs have the technat resource to be traded. This only rman; now req. Bronze Working. The units requiring a resource can on continents where at least one civion that resource (or where a barb city or it).  Early barb Spearmen were probably Spears should make early Chariots at also a game balance problem when the barbs then immediately get horse Al civs some 50 turns to hook up a nully creates barb units from the barbs area or the previous era, i.e. no earmen and Archers in the Medieval Ancient barb units become a pointless would be better to exclude only obserbecause it's normally checked for incomplete.

shared landr progresses. unit on a land ship on the sbarb city isn'CvTeam.cpp research of r driven out of	th. The specific conditions (for a nass) change as the game For the first 100 turns, any barb land dmass with a civ city suffices (or a urrounding coast), later on, a single t necessarily enough. See for details. The intention is that new world barbs stops once they're the old world.	
Rationale	Old World. That way, the New World and occasionally Medieval. Another	rbs to stop once they're (nearly) eliminated in the will usually only have Classical-era barb units, approach would be to use several barbarian uld be a major change; can make this work well
	Also prevents barbs on any continer that continent.	nt from being more advanced than every civ on
	300: Barb aggressiveness now escalates based only on local cities (not those on other landmasses)	
303	Never build culture, can't build cultur	ral buidings, found value considers only inner ring
Barbs never build culture. Can only build the following buildings: Barracks, Granary, Lighthouse, Walls, Forge, Stable, Aqueduct, Colosseum and Bunker.		Can build all mundane buildings except religious buildings and research buildings, Theater, Security Bureau, Int. Agency and Broadcast Tower. Can expand its borders through Monument (or Castle); not sure how often they actually do that. The K-Mod barbarians immediately expand their borders by building culture if they have the Music tech.
Rationale	Want each barb city to appear as an independent entity. If they expand their borders as in K-Mod, the borders can easily touch, and then barb cities appear like a unified empire.  Aqueduct, Colosseum: Want barbs to occasionally have populous cities (think Tenochtitlan); for that they need all the health and happiness they can get.	
See also	Important for the New World because change 300 places barb cities more densely on uninhabited continents. 300 also prevents barbs from building a road network.	
Config	Buildings are disabled through Civ4	CivilizationInfos.xml.
Only the inner ring is taken into account when placing barb cities.  All 21 tiles are considered, no different from the evaluation of civ city sites.		All 21 tiles are considered, no different from the evaluation of civ city sites.
Rationale	Since barb borders never expand, it doesn't make sense to factor in the outer ring. (Even if the borders expanded sometimes as in BtS, the outer ring should be discounted.) I also like that this makes barb city sites distinct from normal city sites, and a bit weaker overall.	
See also	300 fixes barb city placement bugs.	
304	synchRandPlot <b>fix</b>	

plot when the selection crit I'm probabilis	cRandPlot is guaranteed to return a ere is at least one satisfying the teria. For placement of barbarians, stically not returning a plot when our plots are eligible.	Picks plots at random until it finds one that satisfies the criteria, or gives up after 100 trials.	
Rationale	•	very turn (or every other turn) in the same plot, so is good. However, the probability for failure is too ap dimensions.	
305	Barbarian Workboats		
build them e military units	Barb cities can build Workboats, and tend to build them early, i.e. after producing 1 or 2 military units. Build Workers a bit later than in BtS, especially in coastal cities.  Can't build Workboats. Usually build Worker after 15 turns.		
Rationale	been worried that Workboats would	pulation. The original developers had perhaps distract barb cities too much from building military , I have barb cities build Workers later.	
306	Units spawned on Galleys, barbaria	າ (naval) assault Al	
Barb land units can be placed aboard ships in the fog of far. If there is no such ship, the land units are placed on land tiles instead; the total number of barbs placed is the same either way. Barb ships with cargo target a nearby city with a naval assault, though the units can also be dropped along the way to the target. Once unloaded, the ships switch back from assault mode to "attack" mode, which works as in BtS: Harass a city for a while, then move on and patrol.			
direction and	Sarb sea patrols tend to move in a consistent direction and seek out unobserved tiles where hey can receive new cargo.  Sea patrols are memoryless, i.e. change direction a lot, and therefore tend to remain in one place for a long time.		
Rationale	Should make barb sea units more interesting and harder to ignore; allows them to interact with civs that don't have worked sea tiles.		
Tbd.	When a barb ship has been on the map for a long period of time, say, 20 turns, it should stop patrolling and just blockade a city; can get annoying if a player just can't build a ship for lack of a coastal city.		
Credits	The Mongoose SDK PirateMod works similarly, but hasn't been merged; I only learned about this mod after implementing my own changes.		
307	Post-Medieval barbarians		

Barb units can be created by the game in all Can only receive and train Warrior, Archer, eras. Barbs can receive and train Musketman, Spearman, Axeman, Swordsman, Horse Archer, Cavalry, Anti-Tank and SAM Infantry. Longbow, Maceman, Galley. No barb units Cannot train Rifleman, Grenadier, Frigate. created by the game in Renaissance and beyond. Can train Rifleman, Grenadier and Frigate. Barbs can't receive cities in Renaissance and Barb cities still appear in the Industrial era. beyond. Starting from Renaissance, barb research In BtS, barb research always ignores tech preregs, i.e. barbs can research e.g. Pottery and ignores tech preregs. the Wheel simultaneously. K-Mod has changed this, so that barbs only make progress on techs that they could research if they were a civ. RB creates more barb units in later eras: the RB reduces the divisor to 50% in all eras. tiles-per-unit divisor is reduced to 60% in the Ancient era, 52.5% in Classical, 45 in Medieval, 37.5 in Renaissance, 30 in Industrial, 22.5 in Modern and 15 in Future (relative to the divisor without RB). Rationale Gunpowder units mostly for Terra and similar maps. On normal maps, there is typically no land left for post-Medieval barbs to appear on. Therefore the reduced divisor for later eras with RB; so that RB players get to see the occasional post-Medieval barb. Muskets and Cavalry are supposed to represent natives that have acquired firearms (through trade or as spoils). Barbs normally won't be able to train Cavalry for lack of Horse, but may receive some at random. Anti-Tank and SAM as some type of querilla that isn't too effective against Infantry. Don't want barbs with firearms to be on par with properly trained armies, hence no Rifle, Grenadier and Frigate. No Pikeman: Two Medieval barb units (Longbow, Mace) are enough, and want mounted units to be effective against barbs, especially Cuirs/ Conquistadores. Barb research ignoring tech preregs allows barbs to catch up very quickly once colonies are founded. By the time New World barbs turn aggressive, they'll typically have Muskets. No barb cities past Renaissance: Seems more realistic, and enough cities are created in the New World during the early eras. 302 stops barb research if they stop sharing a continent with any civ. See also dlph.6 disables barbarian Spies Thd. Perhaps enable barb Privateers. Historically, privateers were funded by states, and other types of pirates are covered by barb galleys. That said, barb Privateers could add sth. to the guessing game about Privateer ownership (though one can always tell from the turn order anyway), and make navies more relevant overall; unsure. Also considering to allow barb Transports, but only for combat, not cargo; representing pirates with motorboats like in Somalia. Probably better not to include such post-Cold War content. Barbs can train War Elephants, but only in cities No barb War Elephants, and no check of with connected Ivory, and no War Elephants are resource requirements for barb units.

created by the game.

Rationale	Saw a barb city with connected Ivory in one game and was filled with regret that they couldn't train elephants.		
See also	301 lets barbs only build units that some civ on the same continent can build.		
Marines (or i		Machine Gun as free defensive unit.	
Rationale	Can't use Machine Guns to prevent	barbs from pillaging.	
308	Tech speed increased when playing	with RB	
	search speed modifier for all civs in RB in the Classical in Medieval era.		
Rationale	RB forces the civs to dedicate resou research tends to lag behind the his	rces into fighting barbs, and as a result, global corical time line.	
309	No Animals option, patrolling animal	s prefer their native terrain/features	
(i.e. animals "No Espiona	'No Animals" option added; disabled by default (i.e. animals do appear by default).  'No Espionage" option removed. "No Barbarians" converts espionage points to culture.		
		deciding how many barbs to create on a given turn. Therefore, the presence of animals slows	
Rationale	Animals are nice for teaching beginners how combat works, but too silly for some tastes. Of course, one can always imagine they're "really" human hunter-gatherers say, "lion warriors" instead of lions.		
		me screen with options. The No Espionage option n't be recommended in its current state. Players just ignoring it.	
features (as	Patrolling animals favor their native terrain and eatures (as defined in Civ4UnitInfo.xml). They still enter other tiles, but with a smaller probability.  Animals spawn only on their native terrain and features, but move indiscriminately.		
Rationale	Flavor		
Credits	Idea from Mongoose SDK AnimalMod		
	less the landmass gets too crowded	Once the game stops creating animals, it removes one animal per turn from each landmass.	
Rationale	Buffalo flavor for the New World. Once colonized, the animals will start disappearing.		
310	Great Wall reworked, balance changes to Great Lighthouse and Colossus		
Config	Can be reverted in CIV4BuildingInfos.xml.		

The Great Wall (TGW):

cost 250.

req. Archery, 2 Walls (1 on Duel and Tiny world size, 3 on Huge),

obs. with Corporation,

2 Great Merchant points,

abilities based on game settings:

- i. +1 trade route in cities on the same continent except when playing with RB. This ability is based on a "global trade routes" ability that was already in the game but unused. Now restricted to cities on the same continent.
- ii. Prevents barbarians from entering your borders on this continent (no change) except when playing with No Barbarians.
- iii.+100% emergence of Great Generals within owner's borders (no change) if playing with RB or No Barbarians. I.e. TGW doesn't have this ability anymore under normal settings.

cost 150,

Masonry, no prereg. buildings,

no obsoletion, 2 Great Spy points,

abilities (ii) and (iii) regardless of settings.

## Rationale

A strangely cheap wonder in BtS considering that it represents (arguably) the most massive building on Earth. Can be costlier now that barb activity peaks later. Removing the GG ability under normal settings keeps the rules complexity in check (wouldn't be a problem wrt. game balance).

Trade route flavor: One purpose of the Chinese Great Wall was to protect traders. Some segments protected a portion of the Silk Road. Similar to Castles providing an extra trade route. GM points go along with this, but the goal is also to further sideline the awful espionage system.

Nice side effect of the Wall prereq. is that Protective leaders get an implicit discount on TGW. Also makes sure that TGW can't be built before founding a second city – players should analyze whether they're exposed to barb attacks before deciding to build TGW.

The Archery req. is to make Archery a bit better, and to make Masonry less cluttered visually; TGW still requires Masonry for the prereq. Walls. I believe this makes some sense historically as well – walls (with protruding towers) are much more useful with effective projectiles. (But this doesn't explain why ordinary Walls don't require Archery.)

Tbd.

GG emergence from TGW should perhaps, for consistency, be restricted to one continent like the other two abilities of TGW.

The Great Lighthouse (GLH):

cost 250;

cost 200 in BtS, 300 in K-Mod;

obs. with Corporation

obs. with Astronomy

## Rationale

Too powerful in BtS, at least compared with most other wonders. Also don't like that this ancient wonder becomes most effective in renaissance (with Astronomy). I meant to nerf this later on (along with other balance changes), but with TGW obsolete at Corporation, GLH obsoletion needs to be moved right away.

The Colossus:

cost 250 (as in K-Mod);

cost 150 in BtS, 250 in K-Mod;

obs. with Chemistry.

obs. with Astronomy.

Rationale	Don't want both Colossus and GLH obsolete at Astronomy. The K-Mod cost increase seems reasonable; it's an extraordinarily cheap wonder in BtS.		
Tbd.	Perhaps Forge should be nerfed instead – if Forges weren't spammed everywhere, Colossus wouldn't be such a small investment.		
311	Number of units from uprising events reduced (now independent of world size)		
Tbd.	These events could use additional checks and balances.		
312	XP from barbs counts half for Great General		
rounded dov Rounding do combat with doesn't cour already have	hbat against barbs counts 50%, vn, towards Great Generals (GG). own means that 1 XP (i.e. after very one-sided odds or withdrawal) at all towards GG. Units that to 1 XP can't gain further XP from hange), and thus can't contribute to		
change whe can't hope to	XP multiplier for attacking barbs reduced to 3; no change when defending against barbs. Thus, can't hope to gain more than 1 XP (0 GG points) attacking a barb unit even at 95% odds. by fighting a barb unit at odds above 90%.		
	or XP gain per combat set to 6. ly, can gain at most 3 GG points per t.		
Rationale	It's not plausible that wars against barbs should produce no GG. Ancient China had plenty of GG that only fought against peoples that Civ would represent as barbs. I'd also like to give players a (fighting) chance to get a GG without starting a war.		
	The original developers must've been worried about barb XP farming, and for good reason. Having barbs respawn in some cul-de-sac isn't difficult. Can be worthwhile to exploit just for getting units to 10 XP; which is why I think some restrictions were needed regardless of GG points.		
	I haven't reduced the XP that barbs gain from fighting non-barbs, i.e. barbs now tend to gain more XP from barb vs. non-barb combat than non-barbs. I guess the barbs have more to learn from the non-barbs than vice versa.		
Tbd.	Farming may still be feasible; is a 15% risk of losing a unit worth 2 XP and 1 GG point? Could be, especially if it's an outdated unit.		
	See <i>Tbd</i> . about "Barb cities slightly less likely to occur on landmasses where barb cities were destroyed previously" (change 300).		
	Reduce upper bound for per-combat XP to 5 (2 GG points)?		
	Perhaps apply the XP restrictions to all combat; would like to reduce combat XP in general in order to lower the stakes in combat.		

313	Difficulty-based combat bonus vs. barbs increased	
-----	---	--

Set the human combat bonus against barbarians The bonus is 40% on Settler and drops by 10% to 5% on Monarch, Emperor and Immortal (and with each difficulty level to 10% on Noble. Then King; see 250a). This is addition to the 10% 5% on Prince, and 0 on all levels above Prince. bonus against barb Galleys from K-Mod. No The (additional) bonus vs. animals starts at 70% change to the other settings, no change to the on Settler decreases in steps of 10 to 10% on animal bonus and no change to the AI bonuses. Emperor, then 5% on Immortal and 0 on Deity. For combat between AI civs and barbs, the AIspecific settings from Noble are used regardless of the configured difficulty setting: 25% vs. barbs and another 40% vs. animals. Rationale Despite the nerf to fogbusting (300), it still seemed best to rely mostly on fogbusting on the higher difficulty settings because fighting barbs at tech parity is very costly. This slight change to the combat bonus should make a significant difference because when units are evenly matched, even a slight change in combat strength tips the combat odds from 50:50 to 60:40 or more. Haven't changed Deity because I don't to make that difficulty any easier. Actually, the various balance and AI changes in this mod should (eventually) make Immortal challenging enough for everyone, and then Deity will only exist as a bizarre dort of Ironman challenge beatable only through degenerate tactics (such as excessive

fogbusting). Also fits with the degression of the animal bonus, which reaches 0 only

on Deity.

500	Dormant changes; to be enabled sometime in the future	
See also	004h is also dormant	
AdvCiv		BtS
500a	Land of two rivers	
Tiles bordering on more than one river get twice the commerce yield from rivers, i.e. 2 commerce instead of 1. A shortcut on a far-winding river also works. Normally, only a few tiles per map qualify. Exact condition: two river segments that aren't connected along the tile in question.  A tile is either river-side (+1 commerce) or isn't.		
Settling on a double-river tile leads to 2 commerce on the city tile (akin to settling on plains hill).		
Rationale	Plan to nerf the Financial trait first, which will make rivers less useful. The double commerce bonus will make up for that a tiny bit.  But mostly just for added flavor.	
Tbd.	Tile help text should say "Land of two rivers". Implement a similar bonus (+1 commerce) for Coast tiles that have two orthogonally adjacent land tiles opposing each other and call that a "Bay" in help text.	
Config	Disabled in CvPlot.cpp.	
500b	Demand better protection	

Anger from lack of protection computed based on Any one military unit suffices to avoid "We the defensive strength of the local units and population size. A single weak unit doesn't always suffice to avoid "We demand better military protection".

A city requires a total defensive strength equal to at least half its population. Defensive strength is computed as combat strength increased by defensive modifiers (e.g. from Archer, Wall, Garrison promotion)

Outdated units, i.e. units that the city can no longer train, count only half. The anger is proportional to the lacking defensive strength; e.g. an almost sufficient garrison will lead to just 1 anger.

demand military protection".

I aligei.		
Rationale	Requiring just any military unit becomes a pretty nonsensical rule by the Medieval era. Can either abolish it, or change it so that credible garrisons are required.	
Config	Disabled through DEMAND_BETTER_PROTECTION in GlobalDefines_advc.	
Tbd.	Need to show "Garrison strength x.x, population: y" in help text when there is anger. Otherwise it's too difficult to learn. Remove the "can no longer train" clause; would get circumvented by cutting off strategic resources.	
	More changes to the happiness system to come eventually, in particular luxury resources scaled to total population (akin to Civ 4 Reimagined).  Change the ability of Hereditary Rule before activating this change.	
	fight with outdated equipment and de otherwise players might try to play ar	ndatory (if not upgraded in time, units refuse to efect). Then this change will be important because round unit obsoletion (e.g. don't get Hunting so ely) so that they don't have to upgrade their city

550	Changes to tech trading	
550a	Tech trade value dependent on tech score and power	
AdvCiv		BtS
advanced and powerful than the giving side;		Tech trade value is independent of how well the involved civs are doing. (Vassals can receive free tech from an AI master if they're behind, but that's not a matter of trade value.)
relationships, i.e. vassals don't expect to get		Vassals charge less from their master for resources, trade embargos and civic/religion changes. Tech trades are unaffected by vassal/master relation.

Rationale	A little extra catch-up mechanism. Also, when dealing with a backwards civ, it's smarter to be generous than to insist on a square deal.  For vassal-master, the basic idea in BtS is that the master can trade favorably with the vassal. Don't want to turn this upside down.		
550b	Al doesn't make bad offers for human tech		
AdvCiv	1	K-Mod	
trade to a hu	n't propose or counter-propose any ıman civ that gives tech to the AI civ than 50% in favor of the AI civ.	The AI can (counter-)propose trades that are up to 300% in its own favor.	
The AI alway a trade.	s offers something when proposing	May offer nothing at all.	
Rationale		h because I believed that they're due to partial n be the case, but often isn't; so it's a bit of a trap.	
Tbd.	The AI probably shouldn't contact pla	ayers with bad deals at all.	
550c	Changes to tech monopoly threshold	ds ("don't want to trade just yet")	
AdvCiv	1	BtS	
	illing to trade tech if it has contact and still hasn't met most civs.	Al willingness to trade a tech is based on the percentage of known civs (excluding itself) that already know the tech.	
E.g. if an AI civ knows only one civ, the AI civ acts as if 40% of the other known civs already knew the tech (when in fact it's 0%).		If the AI knows only one civ, the AI will hardly ever trade (unless Friendly) because the percentage is either 100%, meaning the other civ already knows the tech, or 0%, meaning the AI tries to monopolize the tech.	
Rationale	This should make civs on small cont	inents fare better.	
The AI leader-specific thresholds for monopolies (TechTradeKnownPercent; between 0 and 100) are randomly increased or decreased by up to 15 points. This random adjustment is applied once per game to each tech separately, i.e. it's not the same for all techs, and can't be manipulated through repeated trade requests by a human player.			
Rationale	ationale The BtS monopoly thresholds are a bit too predictable in some cases, especially when there are just two or three civs on a continent. And e.g. Pleased Tokugawa never trading anything useful is depressing.		
Tbd.	Perhaps the issues with small continents are already taken care of by the other change; not sure if the randomization is needed.		

551	Al trade value of tech reduced	
AdvCiv		BtS
When the AI trades for tech, the research cost of that tech is multiplied by 1.25 as part of the trade value computation.		

	Could argue that research and gold should have the same modifier because gold and beakers are essentially interchangeable. But gold should be more valued in trade because the other side loses the gold whereas imparting a tech costs nothing. By reducing the trade value of tech, I'm making it harder to conduct diplomacy (sponsored war, brokered peace) through tech, and easier to buy tech with gold. I'm not setting the multiplier even lower (say, 1) because change 550a already makes it easier to buy tech (for civs that have fallen behind).
Tbd.	The underlying issue is that it doesn't cost anything to share tech.

650	Changes to nuclear warfare		
Tbd.	Nukes need major balance and AI changes. I've only implemented two little things.		
See also	130q about diplo effects of nukes		
AdvCiv		BtS	
Al uses air re	econ along its coast.	Al seems to use air recon only on rival cities.	
Rationale	Could reveal enemy submarines. Not enough to properly defend against Tactical Nukes, but the BtS AI doesn't even seem to try.		
AdvCiv		K-Mod	
Al willing to build the Manhattan Project unless it looks like it will win the game anyway,		Al considers the Manhatten Project only when in the Dagger or Crush strategy, or when close to a Conquest victory.	
Rationale	Rationale The AI shouldn't take risks with nukes when it's winning anyway (Conquest, or crushing its current war opponents).		
Tbd.	The new conditions are still ad-hoc.		
Al doesn't disband nukes when in financial trouble unless the only other remaining units are cargo units.		As far as I can tell, nukes are disbanded before most any unit. BtS tried to save expensive units, which is fine in the case of nukes, but K-Mod focuses on XP, which is generally better, but fails for nukes.	

700	Rise & Fall game option; see chapter <u>Rise &amp; Fall</u> . Id 700: the fundamentals. Other ids only for code outside the R&F classes. Except for those highlighted in blue, all changes in the following are only relevant if R&F is enabled.			
Rationale	For the term "intermediate period": Ancient Egyptian periodization (Wikipedia).			
Config	The number of chapters, interlude length and scoring delay are configurable through GlobalDefines_advc.xml.			
Tbd.	Proper testing.			
	Text so far only in English and Germ	an.		
	verifyAlive kills all civs because r the R&F code causes this, but appararen't currently supported by R&F. W	supported. During initialization, CvPlayer:: no cities have been created yet. I don't see how rently, it does. Also, the unequal AI handicaps Vould have to store the AI handicap (in RFChapter teover and restore it when AI control resumes.		
	particular the number and length of	s other than difficulty into the Rise score, in chapters. For now, my assumption is that a higher number of turns per chapter, which makes it e, and that this about cancels out.		
	The AI_calculateVictoryStage functions aren't ideal for determining how civis to victory. The purpose of these functions is to determine whether and how much the AI should focus on a particular victory condition; therefore, e.g. AI flavoralues factor in. Would be better to write separate code for measuring the progretoward victory.			
Credits		onnesian War and <u>History of the World</u> (both from which is, I think, included in <u>Fall From Heaven II</u> ).		
See also	Since R&F scoring is partially based 115, which revises the computation	on victory stages, it somewhat hinges on change those stages.		
701	"Require complete kills" option repla	ced by the R&F option		
AdvCiv	BtS			
remaining ບ	inits are removed, and the civ is there is no option for changing this	When "Require Complete Kills" is checked, units remain in the game when the final city is captured. A civ is only eliminated when all of its units are killed and all cities captured.		
Rationale	adding the R&F option. Removed it	kills option (for the reasons stated below) before entirely now because it's easier to replace a game maintaining savegame compatibility).		
Too much of a hassle to keep the complete-kills option in mind for all the AI condoubt that the WL, BtS, BBAI and K-Mod code can really handle it either, espe team games when some team members still have cities and others don't. Not sthis option was ever intended to be more than a gimmick. You even need to kill enemy Spy (or since BtS: hope that the Spy kills itself somehow).				
	Now, in principle, the AI still needs to be able to handle civs without cities because a human player could decide to never found a city. Through Advanced or later-era Start, the player could even have a sizeable army, not to mention scenarios. I'm trying to have the game at least not crash in such cases, but it's not really supported. (Barbarians don't necessarily have cities either, but get special treatment in most of the AI code; this works.)			

some over to any team mates or (war) allies that the dead civ might have had before its demise. This is more plausible and doesn't create issues for the AI.

Fror handling if game settings are incompatible with R&F

Not compatible: multiplayer, team games (including Permanent Alliances), One-City Challenge, SPaH.

"Score" tab on the Victory advisor screen

Showing scores of past chapters and the start dates of chapters still to be played. When R&F is enabled, the tabs "Resolutions" and "Members" are merged into one in order to make room for another tab.

704	Changes to Dawn of Man (DoM) screen		
Show the so	reen at the start of each chapter.		
Tbd.	In the later chapters, the DoM can appear with a few seconds delay. Seems like the EXE is too busy with something else. Perhaps this wouldn't happen if I'd launch the popup earlier.		
AdvCiv		BtS	
Heading of the DoM screen says "The Dawn of Civilization".		"Dawn of Man"	
Rationale	Perhaps they were thinking of Kubrick's "2001", which shows a subtitle "The Dawn of Man"; but this is followed by a scene with apes		

## Rules and AI changes to prevent self-collusion (helping a civ from the previous chapter that hasn't been scored yet, or one about to be taken over) The AI is a bit more lenient in pre-Currency tech trades – accepts if it receives only 90% of what the player receives. If <u>UWAI</u> is enabled, the AI refuses to talk when war utility is 10 or greater. Rationale During a chapter, the player should (ideally) only have to consider the interests of his/her current civ. The AI changes described above (and in the R&F chapter) combined with intermediate periods can't completely prevent self-collusion, but make

it much less relevant.

Restrictions don't apply to civs that have already been scored because it should be quite rare that a civ gets played more than once.

Trade acceptance: With R&F, it can be extra annoying when the AI refuses to trade two techs of (almost) equal value, but won't accept a 2 for 1 either because this would already favor the AI too much.

War utility threshold: Could otherwise use reparations to bypass trade restrictions.

Would be nice to give the player more feedback, e.g. a grayed-out "gift" button, or the AI responding "you're being too generous" when an offer is too good, but these things seem almost imposible to implement. I did manage to get the AI to say "no thanks" to gifts.

Tbd. Perhaps the AI should always show some leniency in pre-Currency trades, i.e. regardless of the &F option.

Perhaps reduce or remove the penalty for playing a civ multiple times. Then, restrict trade with those civs that are ranked lower than the human player (i.e. not based on whether a civ has been scored).

Should the AI be willing to talk when all potential peace deals are too favorable for the AI? E.g. when the AI wants the equivalent of 1000 gold and the player doesn't have that much gold, but does have some 5000-beaker technology. Currently, the AI is willing to talk then, and that's a bit confusing. Though refusing to talk would also be confusing I think – "How is that big technology not enough?"

706	Changes related to Al Auto Play and switching the human-controlled civ				
	When the player "Retires", the current chapter completes on Al Auto Play. The intermediate periods in between chapters aren't actually Al Auto Play; there simply isn't a human-controlled civ at all.				
	UI interface elements during intermediate periods and suppress advisor screens and s has required changes in a bunch of different places.				
Rationale  The player may simply want to end a chapter because he/she doesn't feel like completing it. But retirement is mainly intended for situations when things are going too well. The civ could then become a huge obstacle in later chapters (or just win the game for the AI). Don't want the player to sabotage his/her own civ then.					
Tbd.	After retiring, the player's civ keeps the game handicap, e.g. Prince, but since the civ is treated as an AI, the AI modifiers from the game handicap also apply, e.g. 5% faster training of units on Prince. This is confusing, but difficult to change because the AI modifiers get applied in many different places. AI Auto Play without retirement applies the AI handicap (change 127), which is consistent, however, a retired civ should generally do rather badly because retiring is supposed to help when the player's civ gets dangerously far ahead. Perhaps set the handicap after retiring one higher than the game handicap (or always Monarch?) to somewhat cancel out the AI modifiers.				
Known issue: When taking control of a civ via Civ Changer (Alt+Z) for debugging purposes, all non-expired messages that that civ ever received are displayed on the main interface. Calling CyInterface().clearEventMessages() from ChangePlayer.py doesn't get rid of them.					

707	Changes to the game end sequence	
No game end upon defeat; Rise score shown als "final score" in HoF, scaled up ("normalized score") for the Dan Quayle screen.		
See also 043: Changed (stricter) thresholds for the titles on the Dan Quayle screen.

901	AdvCiv	K-Mod	BtS	
Forest Preserve	at Biology; +1 commerce	at Scientific Method; +1 commerce; +1 commerce if riversi	at Scientific Method; +1 commerce if riverside de	

K-Mod 1.45 has added a 7th effect to Scientific Method, and enlarged all tech boxes to make room for a 7th icon. Not a good solution; surely no single tech needs to do 7 things.

Forest Preserve can use a buff anyway, and nature reserves originated in the early 19th century according to <u>Wikipedia</u>, which fits with Biology. I also don't see much of a connection between scientific method and forest preserves. Not a question of game balance really because Forest Preserves are rarely useful.

Removed the riverside commerce while I was at it. Simpler this way. Not much of a loss because Forests along rivers get chopped anyway (see also change <u>117</u>). Consistent with Lumbermills, which also provide commerce regardless of river.

*Tbd.*: Make the Forest spread ability more predictable and more useful. Grant health instead of happiness.

902	AdvCiv	K-Mod	BtS
Watermill	+1 production initially; +1 commerce with Electricity; 4 turns to build; +1 production with	+1 commerce with Electricity; 8 turns to build +1 production with	+1 production initially; +2 commerce with Electricity; 8 turns to build +1 production with Replaceable Parts

Watermills are decent with Replaceable Parts, but rarely useful before that (whereas, historically, they were extremely useful throughout the Middle Ages). The K-Mod change to Serfdom (+1 commerce from Farms) exacerbates this. One commerce at Machinery (also a K-Mod change) is the least that needs to be done.

Commerce from Electricity is apparently supposed to get the shift from waterwheels to turbines across (similar for Windmill). That's OK (electricity can be sold), but doesn't have to be so pronounced. Electricity boosting local production is also plausible.

Never saw why Watermills should be slow to build. Perhaps originally an attempt to make Serfdom attractive – well, that didn't work. Reducing build time is a way to make Watermill better early on without making it too good later on.

Tbd.: Still a bit unattractive. 6 turns to build but +2 production earlier?

Lumbermill	at Guilds	at Guilds	at Replaceable Parts
	+1 commerce initially;	+1 river commerce and	+1 river commerce and
	+1 production with	+1 production initially;	+1 production initially;
	Replaceable Parts;		
	5 turns to build	8 turns to build	8 turns to build
	+1 production with	+1 production with	+1 production with
	Railroad track;	Railroad track;	Railroad track;
	doesn't remove Forest	doesn't remove Forest	doesn't remove Forest

The middle column is K-Mod 1.45; I'm keeping the earlier version (not shown separately) and reducing the build time in order to give Lumbermill a little extra push. Also, Replaceable Parts is just one tech away from Steam Power, which grants +50% Worker speed, but since Lumbermills are now at Guilds, that bonus is still out of reach, so they really take a long time to build in K-Mod.

I don't think players can be incentivized to not chop all Forests along rivers; not without making Lumbermills too strong in the lategame. Therefore, I don't like the river commerce ability (not on Forest Preserve either).

*Tbd.*: Want to move both Lumbermill and the +50% chopping yield (currently at Mathematics) to Machinery eventually, and apply chopping yields only to buildings and ships (not land units).

903,904	reserved		
905	AdvCiv	K-Mod	BtS
	3 cargo,	3 cargo,	2 moves, 2 cargo, cost 50

Trireme	3 moves, 3 strength, no bonus vs. Galley, upgrades to Caravel and Privateer, cost 45	2 moves, 2 strength, +50% vs. Galley, upgrades to Caravel and Frigate, cost 50	
Caravel	4 moves removed AI types "Reserve" and "Escort"	3 moves	
Carrack	4 moves, 2 cargo, removed AI type "Reserve"	The state of the s	3 moves, 2 cargo
Navigation2 promo	Only available for units that can enter ocean	Available for all sea units	

Should give Galleys a use in early warfare (fast deployment), and make them better explorers. If 3 moves aren't enough to make naval deployment useful in land wars, then 4 moves with Navigation1 should do the trick. Sea units moving twice as fast as infantrymen along roads is reasonable from a historic pov, but 5 moves might be a bit much, also gameplay-wise. Therefore, I'm restricting Navigation2. Makes sense that "navigation" benefits ocean-going vessels more.

4 moves for Caravel to keep it faster than the early ships. Now just as fast as Galleon, which is also more accurate historically. Carracks, caravels and galleons could travel at 4 to 5 knots, triremes at 2 to 3 (much faster during battle; see e.g. Olympias on Wikipedia).

3 strength for 45 production makes Trireme the best warship until Frigate, which should make Triremes more worthwhile overall and might help the AI, which tended to train too many Caravels previously. Should now train a mix of Triremes and Caravels, and use only Triremes for protecting resources and escorting Galleys. May still train too many ships, but at least Trireme is cheaper than Caravel. While I'm at it, the upgrade from Trireme to Privateer is a bit less painful than to Frigate because Privateer is cheaper than Frigate, and this should make AI privateering a bit more common.

Historically, trireme-based ships remained in use in the Baltic Sea until the 18<sup>th</sup> century, and the usage peak wasn't reached until the 16<sup>th</sup> century. "[The Battle of] Lepanto [1571] marks the last major engagement in the Western world to be fought entirely or almost entirely between rowing vessels, the galleys and galeasses that were still the direct descendants of the ancient trireme warships." (Wikipedia)

Carrack: K-Mod had increased the cargo capacity along with the other transport ships, but I think this takes the unit unnecessarily close to Galleon, especially now that I've increased the speed (can't not increase Carrack speed if I increase Caravel speed). Back to 2 cargo spaces.

Tbd.: Further reduce the costs of naval units.

See also: <u>124</u> assigns Galley the Explore AI type.

906	AdvCiv	K-Mod	BtS
Submarine	60% withdrawal chance,	,	0 first strikes, 50% withdrawal chance, +0% attack
Attack Submarine	60% withdrawal chance, +0% attack,	,	0 first strikes, 50% withdrawal chance, +0% attack, 30 strength

Battleship	250 cost	225 cost	225 cost
,			220 cost 30 strength

Subs need a buff. They can't trade 1:1 with Battleships in BtS, and 1:1 isn't even attractive enough for human players. About the K-Mod ability I dislike that it's implemented as a terrain bonus on Coast and Ocean, which is a little confusing, and that it adds another attack-only bonus – shouldn't a high withdrawal chance be enough? First strikes match the flavor of torpedos and invisibility well; consistent with Stealth Destroyer (also has 2 first strikes).

Attack Submarine doesn't need to be buffed that much, but should have the first strikes for consistency, so I'm reducing its strength by 2.

Increased cost of Battleship and Stealth Destroyer makes subs more effective against those units. The original costs are also too close to Destroyer (200) for my taste.

907: Uniques	AdvCiv	BtS	before patch 1.52
907a	strength 7,	strength 8,	strength 8,
	cost 40, starts with March	cost 45,	cost 40
	named "Legionary"	named "Praetorian"	named "Praetorian"

Clearly intended to be easy to recognize as powerful even for new players, and it worked, but this mod isn't for new players, and the unit is toxic for game balance. Supplants all pre-Renaissance units plus Musketman. Because it's so obvious, I'm nerfing this unit before all others.

7 strength for 40 would be fine, I think, but bland. March is a promotion that doesn't give the unit more raw power, but is still useful, and a good fit flavor-wise as the Roman army was known for its forced marches.

As for the name change (only in the English game text), Soren Johnson mentioned in a Twitch video that "Praetorian" was chosen over Legion(ary) to avoid repeating too many names from Civ3, and seemed regretful about this. Legionary is obviously a better fit for the BtS unit, and also fits well with my changes.

*Tbd.*: Nerf other early attackers, starting with Axeman; Legionary should then cost 45 again, which also fits with the high-quality equipment of Roman legions.

910	There's one per	Era tech cost modifiers adjusted; these modifiers were added by BBAI. There's one per era, and it changes the costs of all techs in that era. K-Mod has tweaked them, and eventually (version 1.45) tied them to the inflation rate.		
Config	Set in Civ4Eral	Infos.xml.		
Tech Era	AdvCiv	K-Mod 1.44	BBAI

Not merge	d"Changed condition when is a team considered AP/UN full member (and thus eligible for election). Previously all team members had to be full members, but now at least one is enough."
dlph.13	"Fixed permanent alliance bug with AP/UN leader. Similar as with other permanent alliance bugs, if AP/UN leader had higher team number than its permanent ally an empty team would become AP/UN leader instead of the newly formed team."
	Hidden nationality units shouldn't be too obviously (non-)barbarian." (I'm not allowing barbs to have Privateers, but I might in the future.)
dlph.12	"Removed Disorganized promotion from free barbarians boats with hidden nationality.
dlph.11	"Fixed advanced start bug with reduced unit costs. Advanced start code is bad in general so I just fixed the immediate problem. (There was a way to get extra gold by refunding a worker while having expansive trait.)"
Config	Disabled through CvPlayer::doTurn.
Rationale	Disabled this again. If a minority religion can be state religion, then why not a religion that is mostly only followed by the ruling class. It can get a bit weird when a human player holds onto a religion without followers indefinitely for diplomatic reasons, but I don't want to force a civ out of its religion while it may still try to reconquer its holy city.
dlph.10	"Added verification of state religion. Player shouldn't be able to keep their state religion when there are no cities with it anymore."
	Fixed interface and AI bug that caused the game to sometimes wrongly show an improvement as unbuildable. Sometimes the game doesn't [realize] that an improvement can be built. E.g. plains jungle yields 0 food so farm cannot be built as it requires 1 food, but farm can be built there by choping the jungle as the underlying plains terrain yields 1 food. AI followed the same slightly flawed logic as did the interface. My fix for fallout feature introduced many more such situations."
dlph.9	"Fixed how AI and worker actions treat fallout feature. Fallout had bNoImprovement set to 1 signaling to AI that no improvements can be built there which didn't make sense since fallout can be cleared just like forest and jungle can. This made AI far less likely to scrub fallout (if at all) than to chop jungle although the features are similar. Improvements can now be built directly on top of fallout and fallout will be cleared in the process just like it is with forest and jungle.
	These aren't restrictions that players would intuitively expect, and I'm not sure that they're necessary. (I do think that there should be diplomatic consequences for gifting units beyond "traded with our worst enemy".)
Not merge	d"Player cannot gift combat units to third party which in war with rival with whom the player has unbreakable (temporary or permanent) peace treaty. Also, the receiving player now must satisfy technology requirements (both for the unit itself and for the prerequisite resources)."

kmodx	Bugfixes from K-Mod Extended
Credits	By alberts2 <u>Git repository</u> These issues appear to have been found through a stricter compiler or some other code analysis tool. A lot of it just improves hazardous code, but there are also actual bugfixes, e.g. comparisons betweens different enum types and a mix-up of inner- and outer-loop variables. Hard to say how significant these bugs were, but good riddance! I'm listing the descriptions of the merged Git commits below.  (K-Mod 1.45 includes these fixes as well, but I had merged them separately before v1.45 was published.)
